AngelFall Book III - A Novel of Hell S.E. Foulk

The ancient prisoner's identity is revealed, and the importance of Aristotle's discovery fuels a new initiative to escape from the gilded cage of Limbo, which has been recently discovered to be infiltrated by metamorphosed high demons. The fugitive hunters, tasked with finding the dangerous escapee, are bearing down, and Chiron, in search of answers, soon becomes part of the hunt that will change Hell's landscape forever. Panos, shredded by the Harpies of the Wood, has been captured by the human-despising centaurs of the Seventh Circle. This is Book III of the AngelFall Series. Book IV will be available in July, 2012.

Just to get the formalities out of the way - I won a copy of AngelFall Book I in a Goodreads giveaway, and the author has been extremely generous in sending me a copy of each subsequent book for review. Which I'm extremely thankful for, as I'm now hooked on the storyline.

Book III picks up from the closing chapter of Book II, which can be a bit of an issue if you've read other books in between as there is no 'so far, in AngelFall' catch up. That said, the chapter numbering continues on from one book to the next, so I'm guessing that once all six books have been completed they will be combined into one set intended to be read end-on-end.

What I liked about this book was the addition of further strands to the existing plot, particularly the appearance of a modern character. I also found the horror of hell more apparent in this book - I found myself physically shuddering at the painful descriptions littering the book on more than one occasion. I think it's taken until now to realise that since this is set in Hell no one actually dies from injury, which makes the extent to which characters can be physically traumatised even more horrific.

What I found tough going was the quality of writing (which seems, after picking up in Book II, to have been sacrificed in order to meet publishing deadlines, I think), and the fact that there are way too many characters with very similar names - sometimes it seems like most of the descriptive content is taken up with detailing what each of a large number of characters are doing at any given moment. Tough going, and not really enhancing the plot in any meaningful way. Maybe it's just my tired brain ...

All said, with Limbo on the ropes and a huge plot-bomb dropped in the very last line, I'm really looking forward to Book IV.

Review of AngelFall, Book III – A Novel of Hell

Book III of this engaging series picks up where the previous one left off. The action ranges from Limbo down to the lower levels of Hell and follows the adventures of humans, centaurs, a minotaur and gaggles of creatures of the Underworld.

Demons have infiltrated Limbo and The Fallen, the masters of Hell, are taking action to quash any attempts at rooting them out, with cruel reprisals for any who dare oppose them.

Dante's Inferno is well recreated in this series, bringing modern language and expression to a centuries old meme.
