The Gold of the Gods

Erich von Däniken

The Gold of the Gods Erich von Däniken

Erich von Daniken, whose books have enthralled millions of readers around the world, now presents astonishing new confirmation for his revolutionary theories. Erich von Daniken's *The Gold of the Gods* unveils new evidence of an intergalactic "battle of the gods" whose losers retreated to, and settled, Earth. He explores a vast, mysterious underworld of Ecuador-caves filled with gold and writings in solid gold that go back to the time of the Great Flood, bolstering von Daniken's theory of a prehistoric earthly "era of the gods."

Michelle Tempted By Books says

Outstanding evidence. I find the most intriguing aspect of these theories that they are quite old. My copy of this book is from 1973. I think we tend to believe that all "sightings" of UFO's come from more recent America and as American's we tend to believe we are the center of the Earth. As such we think that all sightings have happened around Area 51 and only since the advent of hand cameras. The truth is that there is evidence from possible "visitations" since the dawn of time. Long before modern time, heck back when Humans were still on the Stone Age. My brain and eyes can't stop eating this stuff up. Modern Conspiracy Theorists should really check these books out.

Nuno Almeida says

Estava a ser uma leitura mais ou menos engraçada até o von Daniken perguntar:

- Se a humanidade evoluiu dos macacos, porque é que continuam a existir macacos?

Não, man. A sério. Não. Para por aí. Uma coisa são teorias do arco da velha sobre placas de ouro escondidas em grutas, outra totalmente diferente são diatribes criacionistas, que conseguem atingir um nível de loucura e estupidez incomensuravelmente maior.

M. Joseph Murphy says

An interesting yet flawed read. While Daniken raises very interesting questions, the latter parts of this book veer off in to wild speculation that diminish the strength of earlier arguments.

Most of my inspiration for my own writing comes from writers like Daniken who point out the obvious holes in our current understanding of history. I'm seen enough evidence to know that alien life exists but you won't find much of that evidence here. Perhaps it is simply a matter of the book not holding up well with age. More likely it was a case of a publisher pushing the author on to make ever-more audacious claims to help sell books.

Daniken's Chariots of the Gods blew my mind when I first read it 30+ years ago. He is the forefather of an entire genre of books now...many of which are better written than The Gold of the Gods.

Stefan says

"Probabil c? tehnologia ne va permite s? intr?m curând în contact cu alte inteligen?e evaluate. Cum ne vom defini când vom fi confrunțați cu ele? Ce va însemna atunci catolic ?i protestant, luteran, husit, mahomedan ?i budist, hindus ?i israelit? Astea vor fi criteriile dep?șite. Îi vom prezenta pe semenii noștri ca pe niște debili pentru c? nu vor s? r?sucesc? nici m?car un comutator sâmb?ta (evreii)? Sau pentru c? nu m?nânc? carne de

porc (musulmanii)? Sau pentru c? consider? sacri ?obolani ?i vacile slabe (hindu?ii). Sau pentru c? ?i-au b?ut în cuie pe cruce Dumnezeuul atotputernic?"

P says

A follow-up to Chariots of the Gods. Food for thought.

Evadeen says

Read some of the comments by "readers" - Hello!!! He wrote this in the seventies and even went to prison for 2 years under highly mysterious circumstances at the time. We've come a long way since and many people have become more open-minded to controversial ideas. Okay, many people are also more closed-minded these days. I'm not fond of the translation errors and meagre answers to questions, but you can't argue away the ancient books he quotes and you can't call him conventional...

J.T. Wilson says

Daniken raised eyebrows with his first book, 'Chariots of the Gods?', which married a sensational theory with evidence that didn't hold up to the slightest scrutiny. By the time of 'The Gold of the Gods', he'd already served time in jail for fraud (he embezzled money from his employers to fund his research) and was a best selling author derided for his ridiculous conspiracy theories. You know, like Dan Brown.

'Gold' has EVD in an odd position: he's well aware of his critics yet invites further scorn by backing a wilder theory with flimsier evidence. Unlike 'Chariots', the nonsense in which was obscured by a careful ghost-writer, the lies in this one are right there in the text. How can Daniken find a large quantity of plaques in an unknown language in a subterranean labyrinth, yet be unable to photograph any? How can he fail to navigate his way to a library in China due to language barriers, but be capable of reading a book of early Chinese mythology in the same language? And how exactly did his ancient astronauts create life on Earth, a point he all too often skips over? It's strange to think this stuff ever attracted international attention; these days it would be left where it belonged, on a poorly-maintained Wordpress site or a rambling post on Reddit.

This should have been entitled "The Gold of the Gullible," for that is what Mr von Däniken obtained, including my hoarded pocket money back when I believed.
