Really cute book, read it to my seven year old. Loved that this one was age appropriate for her since she is right in between and has started reading chapter books. I will def have to get the rest of the books from this series for her she really enjoyed reading this book with mommy!! Love that she is so much like me and can read forever!

When they were trying to get in to Jack Frost's ice castle, they changed into snow flakes. They looked more like snow flake fairy princesses. That was my favorite part. by Mischa
