Rachella Baker says

I haven't received yet

Megan Nelson says

not what i thought it would be like. good stories. the endings are a little "blah"

Aryka Alvarado says

I love stories in which the endings give me reason for involuntary shudders and risen gooseflesh; and these stories satiate that bit inside of me! Xiao Wang's stories will leave you clawing for more, compelled to know what follows his short, yet deviously tasty!, stories and after momentary pause, will make you curious as to what could possibly have lead up to the circumstances you find his characters currently wrought between. This book is a short yet well enjoyed read and I find myself easily itching to know what happens next.

If only all nightmares could be so sweet!

Sabrina says

I received a copy of this book through a Good Reads first reads giveaway.

I haven't read a lot of short stories, and these are extremely short... but good!

I read it all in one sitting and stopped to think about the collection as a whole. Each story starts out with not quite knowing what's going on & they don't necessarily have a defined ending. Exactly like the dreams that happen when dozing off on the sofa or trying to squeeze in that tiny bit of extra sleep before the alarm clock goes off.

Great collection with a great title.
