Secrets of the Kill Lawrence Kelter
Two governments-one objective, stop the spread of terrorism by any means possible. America and Israel, lifelong allies in an age-old war. To win this battle they will have to sell their souls. A mutilated body has been discovered; a body not meant to be found, but now that it has, Pandora's box is open and secrets never to be learned have been revealed. An Israeli woman living in New York has been murdered. She has been raped and butchered; an outrage that ignites a fuse that burns all the way back to Tel Aviv. Enter FBI Agent Chloe Mather, a hard-charging ex-Marine who has no sympathy for the kind of maggot who could commit such a violent atrocity. A veteran of the war in Afghanistan, she was one of the first woman Marines to be deployed into an active combat area. She struggles with PTSD and the consequences of a fatherless childhood, yet this is a woman who accepts no pity and operates according to a moral code that is second to none. She'll stop at nothing to find the psychopath responsible for this unspeakable crime. In Secrets of the Kill, Mather and this code will face the ultimate test. What begins as a challenging homicide becomes more, much more, and Mather is pulled into an investigation that involves the mob, Israeli intelligence, and a radical terrorist faction. They say that blood is thicker than water but is it thicker than the bonds of patriotism? Mather will ponder this question and many others as she fights to bring an innocent woman's murderer to justice, and prevent a geopolitical atrocity from taking place on American shores.

LaVina Altebaumer says

Sophomoric at best

The dialogue was painful to read most of the time. A 20 year veteran pilot trying to help another pilot land a disabled jet would NEVER utter the phrase "cool beans". Beyond the dialogue, however, the story took off in too many different directions, introduced too many characters that didn't need to be introduced, and ultimately left me wondering exactly which story line I was supposed to care about.

BookLoversLife says

Review to come.

Randee says

Was not overly impressed by the first two chapters of the book - felt the intros were a bit too over-the-top. I think if they'd removed the first chapter (or two - can't quite remember), the characters would have more naturally emerged. I stuck with it (I was traveling) and ended up enjoying the book. I'll try another and see if it's a series I want to continue with.

Tulay says

Solomon's law.

Israel's agents, Russian and Italian gangs, FBI agent Mather. All of them will make you guessing. If you think maybe in the next chapter you'll catch your breath, you'll be wrong. Better start reading when you have uninterrupted five hours. Fast moving thriller.

Arthur says

Secrets of the Kill (Chloe Mather book. 1)

Smelter at his best, SA Chloe Mather, in secrets of the Kill, takes you through each twist and turn of the action. Complete with characters you're not going to want to meet in a dark alley and others who are just what the world needs to keep us safe and secure. Great reading and writing. On to rules on the Kill.

Jennie Ersari says

Intriguing

The storyline was very intriguing and the characters outstanding. I really loved reading this book. I want to read more from Lawrence Kelter!

Michele bookloverforever says

FBI, terrorists, rival mafia dons, spies...this book has it all.
