Silver World Cliff McNish , Geoff Taylor (Illustrator)

Millions huddle in Coldharbour, waiting for the huge and terrifying Roar. Milo, the silver child, is the first line of the Earth's defence. Under his wings, Helen probes the Roar's mind, while the twins, Emily and Freda, struggle to free the mysterious Protector. Walter's task is the hardest of all - keeping the others alive for long enough to find a weapon to defeat the Roar.

Only Thomas can release that weapon - if he can finally discover the true purpose of his remarkable gift. But a second enemy is also ranged against them.

As the Roar approaches from space, her firstborn, Carnac, is crawling from the depths of the Earth. Only a small number of children, the drill-handed Uneathers, led by Tanni, stand in his way.

Jena Marston says

Well, I planned on finishing last night, but I got too busy and too tired.

I just finished today and was very happy the way the book ended. The last few chapters were amazing. I am very glad I read this series. I loved how he wrote from a different child's point of view every chapter.

McNish did leave it open to more story if he wanted to, but I don't think he needs too, he pretty much leaves it up to the imagination on what happens next.

Good books, just wish that I could have read them faster!

Oh well...

---Jena

Dave Reiss says

this series was quite unique. much of what happened was so weird it is hard to tell if I liked it. it is one of those books that if I tried to describe it, people would think it is just dumb. But it was well crafted and very imaginative.

Erin says

A wonderful ending to a great series. A bit creepy and weird, and I loved it.

Annika Brock says

I'm glad I decided to see this through to the end, because things certainly picked up for this last book, and it was my favorite of the three. I'm still not entirely sure how I feel about the story arc as a whole, but there's no denying it's one of the most original fantasy concepts I've read in a long while.

Carolina Cristobal says

amiazeballs

Kami says

I loved it. Third in the series and I want to know more. I would love another book, but I know they have to end sometime. Too bad.

Flower says

Great story. How can there not be a 4th book? The ending was a left hanging a little. I did enjoy this series. The 1st book was the best, with the 2nd one as the 2nd best and the 3rd last, although that could change with a 4th book. I would really like to see this series continued. Great view of the characters.

Maja says

wow, what an incredibly unique story! I'd never heard of McNish before I discovered this series at the Lacrosse public library. With so many sci series out there now, this is fresh and newly written. yes, it's about saving the world, but with constant surprises in every chapter. I highly recommend this for anyone interested in Juv sci fi fiction.

Brittney Haase says

As a whole, this was a decent story. I am not sure it needed to be a trilogy, or even more than one book really, but it wasn't bad. The ending . . . I still don't understand what happened exactly, but it is what it is. Overall, I would not recommend it, but that is my opinion. I don't really get this trilogy...

Stefanie says

A brilliant conclusion to a crazy trilogy, Silver World gives the final battle between the Roar and the enhanced children of earth. Hope is gained and lost as are some of the battles, but the Protector and Milo are strong allies. McNish presents this novel as carefully as the first two, letting each character have their own scenes and struggles and introducing new issues while still resolving the existing ones. The ending is powerful.

Crowinator says

2.5 stars

Raquel Herrera says

It wasn't as good as the first but it was alright

Theo says

This book is EPIC. I liked how Milo kicked some roar butt. It was cool how in the end they go hunting. I hope they win. Carnac was cool but hey got whooped.

Koorihime-sama says

Checked out from the library.

Review/Rating:

2 out of 5

2ND REVIEW. 1ST REVIEW IS HERE.

The Roar has finally made it to Earth. Will these children be able to stop her from destroying their planet?

First, what was I thinking when I thought I should re-read this?!

Okay, my feelings haven't really changed from the first time I read it.

I'll summarize since I don't want to think that much about this book. Things I didn't like:

- This book is a little bit shorter than the second book, but longer than the first one.
- Even though this is the last book, I still think it wasn't that well thought out. Still too many plot holes and not that many details.
- Descriptions, wording, events, etc are all still very choppy and strange.
- Too much like a junior fiction than a young adult one.
- Personalities of the characters have never really developed.
- Also, the ending doesn't feel completed. Though, I'm happy there isn't any more books in this series.

And there isn't anything I liked about the book. :(

What would make this series better is better description, more detail and background, and more of a plot to go by. So, I would not read this series unless you are truly bored.

Bella says

:D
