Fourth and Inches Kata ?ui?

Rob's life is spiraling out of control. All his carefully made plans have been laid to waste. His friends aren't speaking to him; he's estranged from his family. Drafted to the worst team in the NFL, everything he's worked so hard for seems to be slipping away.

The only thing he's still sure of is that he needs Evie.

Evie is lost. Once a driven, ambitious young woman, she's paying penance for all the wrong choices she's made. Stuck in a downward spiral, she craves a spark of hope to ignite the change she so desperately needs.

The only thing that hasn't faltered is her devotion to Rob.

Realizing they need to make changes to go the distance, they challenge each other to do and be better.

Rob knows that to fight for the woman of his dreams, he'll have to let go of his endless guilt and find a way to be the man she fell for years ago.

Evie understands that to reach their happily ever after, she needs to feel worthy of herself before she can fully accept Rob's love.

They make a pact to hold each other accountable.

The time frame? One year.

The deal? Get it together or walk away. For good.

On the line? Everything.

When losing isn't an option,
And the clock's running down,
How far will they go to win?

book bruin says

I started this book immediately after finishing **Third and Long** because I couldn't wait to see what happened to Rob and Evie. Just like I stated in that review, I did not read this series in order and started with book 3. I don't regret that decision and I will eventually go back and read the first 2 books to see how everything began, but I feel like I needed to meet these older versions of Rob and Evie first. It would probably have been too traumatic for me to meet them as teenagers and watch them endure all the events that transpired in this series.

One thing that I truly respect the author for is never shying away from the truth. There are some absolutely brutal and painful events and subjects that readers face in this series, but for better or for worse, Kata Cuic pulled no punches and took readers to the lowest of lows and the highest of highs. Sometimes you have to break something to allow it to grow and become even stronger. You need to strip it down to the studs in order to build something that can truly survive the ups and downs of life. Even though I did not meet Rob and Evie as teens, you could see so much growth in their characters just from the previous book to this one. It was such a relief to not see these two struggle due to miscommunications and omissions and to witness the power of forgiveness. These characters face the ugly truths of their pasts and I definitely feel that readers who were so turned off after book 3 should give **Fourth and Inches** a chance. This final book in Rob and Evie's story gives the readers some much needed healing, closure, and joy. This is not a series that I will soon forget. I would love to see books one day for Mike and Alex though ;)

What a conclusion

Rob and Evie have finally grown up. They are torn apart by each other wanting more for the other. They are tired of hurting the other in ways they have no control over. So why do they still mourn the loss of their marriage? Rob is spiralling out of control in his rookie year. He's drunk more than he's sober and could care less. His team is at the bottom of the barrel and they are disappointed in his performance. Evie has no direction on her life. She comes to terms with her health problems but wants the extreme way out. Thankfully they still have common friends that help them along the way.

As with the rest of the series, this was an emotional book. This time their future as husband and wife is what is at stake. They make a bet with each other similar to the ones from their youth. He has to work on staying sober and making nice with his team. She must let the doctors try other things to improve her health. What happens is they start talking about everything that went on between them from the very beginning. They get to know one another again and find their love never disappeared. It only grew stronger. I loved their story from the first pages to the end.

YES, IT HAS A HEA!!

That was my main concern and certainly had to find it on the last page (just to be sure).

Rob is truly, truly one of my top book bf's and how couldn't he? but the thing is he is not who he is by himself, Evie is always there physically or not.

Kata takes this series to a very deep level where you are allowed to reflect about the human being and our depths.

I wanted to give 4.8 stars because I'm still missing one more chapter at least to let us know about Mike's and Alex's stories but still loved it.

If you fell in love with Evie and Rob such as I did definitely you will love to read they got the HEA they deserve.

Fine job Ms. ?ui?

A phenomenal must read series! Bittersweet feelings as this story concludes. Rob will always hold a special place in my heart, and Evie is the strongest, and most selfless survivor I've loved and rooted for. This book, this series will definitely have you feel all the emotions! Worth the fumbles, the Hail Mary's into the red zone, never punting with inches left and praying for the game winning touchdown! Highly recommend this book/series. Must be read in order.

Malene says

I'm so content and satisfied with Rob and Evie's story and how it ended. Their story was all consuming. This fourth and final book brings all the loose ends and unanswered questions to a close. I had to go through a lot but it was necessary because what these two people had experienced and did to each other wasn't just resolved by ignoring/hiding their truths or secrets. They love so fiercely and doesn't think they have a future together when that's exactly what they do have and want.

It takes time to acknowledge that and to open up and talk about it and work on yourself. That's exactly what Rob and Evie did. They made so many mistakes in the past, that hurt their relationship and each other only because they didn't communicate with one another or wanted to do right because they didn't deem themselves worthy.

Now they took charge of their lives and themselves individually hoping to make their marriage work. This was exactly the character development I was hoping for and got. Rob and Evie have grown so much since the first book but also since Third and Long. They were open with one another and communicated about their fears and what they wanted for their lives together and from each other. It was emotional as hell especially when they shared their secrets and fears. I love how unconditionally they support and love one another. They were destined to be together from when they first met in that hallway at their school ten years ago. Destined to fight and overcome these struggles that were thrown at them because they were meant to be.

Mike and Alex are Rob and Evie's family too even though they had a falling out but family love and are loyal no matter what and these two men didn't disappoint. I was devastated because of their ruined friendship and wasn't sure they would make it but their love and shared history conquered their pasts.

The epilogue was incredible! I'm so happy and on cloud nine right now. My hopes and dreams were shattered in Third and Long but they were beautifully put together in Fourth and Inches. Kata Cuic delivers a

flawless and powerful conclusion to Rob and Evie's journey. Full of angst, heartbreak and most of all love. Now I only hope I get Alex's story cause you can't leave me hanging like that!

*You MUST read the first three books in the series before reading this one! If you haven't, maybe don't read my review as *may* spoil the first three books.*

What a great conclusion to Rob and Evie's story! Man had they had some horrible things happen to them during their relationship. Life is hard. Life is messy. And we don't always make the "right" choices, especially by judgmental people's standards. The thing about life, is you get to make your own choices, wether good or bad. And you have to live with the consequences of those choices. And Rob and Evie paid a price for their choices. Instead of communicating they chose to keep secrets. They thought they were doing it for the right reasons though, self sacrifice for the one they loved most. They say the bumpiest roads are paved with good intentions....and Rob and Evie sure found that out.

It was hard reading this, reliving all the things of the past. All the heartache, Evie's attack, Robs sexual assault, and everything inbetween. It was hard watching these characters that I fell in love with start out with an epic love story only to fall and crumble under life's harsh situations. But the best thing about that? Is that sometimes, it makes you stronger. Fight harder. Push past the pain. Put the past in the past. Start healing. And that's exactly what we get in F&I! And I couldn't be more happy with how things ended!

***This is exactly why we have a chance to make it.

Because when one of us falters, the other is willing to pick up the slack.

I once thought touching Evie without lust meant I loved her.

I was wrong.

Love is sacrifice.

Faking it when you have to because you have nothing left to give, but understand your partner in life has even less.

Love is being on a team, without any desire to tap out. Not permanently, at least.

Great job Kata on approaching subjects that are overlooked, or cast aside because they are just too difficult to read about, or swept under the rug because no one wants to know about it. Rob and Evie will always have a special place in my heart. So will Alex (I hope he gets a book soon!!!!) and Mike (he needs a book too, just saying).

Cathy says

The final instalment of Rob & Evie's story and I had to know if they could work things out.

In this book Rob's life has fallen apart, using drink to numb himself, his career is on the rails. Evie has her head in the sand with her health issues, I found this to be annoying after a while because whilst I can understand people not wanting to know about health issues through fear, this seemed different and was having a massive impact on her daily life. Finally pushed to do something the two of them make a pact to give themselves a year to sort their lives out, separately.

I was thankful that in the end they got their Happy Ever After, Alex unexpectedly broke my heart and I would love to see him get his own story.

This was an enjoyable series, highlighting the real aftermath of sexual assault and its effect on not just the victim, but those around them, the role of the media in victim shaming, and how rumour and whispers can add to the already catastrophic effects.

I love this couple.

I love their friends.

I this the story.

I love this ending!

Hands down this was my favourite book in the series. I want to say so much, I want people to read this series, I want to write down what's in my head, but right now I'm stuck. I'm stuck on how to write this review and do Rob, Evie, Alex, Mike and Kata justice. It was a true coming of age, it had so many emotions, and was just pure brilliance. I'm so happy I was on this journey, one word... PERFECT

Ann Mays says

I was lucky enough to get an ARC of this book. Kata once again doesn't disappoint. The powerful bond between Evie and Rob is still there. It just gives you the hope you might have been looking for. I can't say enough how much I loved the entire series. It was more than the true love aspect but more about the survival aspect. How in the world we live in today that victims are still treated differently and that there is not enough help for them. Not to mention she brings forth issues we are so scared to talk openly about. When my daughter is old enough I hope to share this book with her. I can't tell you how many times my heart broke, got put back together and finally came to a peace. It's been a roller coaster ride that I jumped on and I am sad to see it end. I don't want to say too much to give away anything for everyone else waiting to read the story. I hope everyone who finally finishes the series gets what they are hoping for. Can't wait to hear what everyone else thinks.

This has been an amazing series to read. I read books 1 - 3 about 3 times before this final book came out. I will admit at first I was so mad at the direction those other books were taking because all I ever wanted was Rob and Evie to have their happy and the hell they went through the first 3 books just makes this final book the icing on the huge 10 layer cake because this book gives you all the answers but it also shows you how much they both grew up from meeting them in high school and then seeing the hell they experienced in college to now as adults. I fell completely in love with Rob since book 1 and always wanted so much happy for him - Evie at times just wanted to smack her to make her see what Rob saw when he saw her. She never thought she was good enough for him and vice versa that he thought the same but both so in love with each other. So much miscommunication between them that it was good to finally have them talk to each other and admit everything in this book. I hurt for her so many times in this book with her endometriosis and her scars but she was strong and loved that she and Rob never gave up. The ending was one of the bests that I have read. The scavenger hunt at the end was beautiful and the closures she had with Alex was emotional but again very beautiful. I loved this book from beginning to end and will read it so many times again because they are one of my favorite couples.

Melissa Travis says

I so so so love this series!!! While it's been a while since I read the last in the series, I was able to pick this right up and get sucked back into the lives of Rob and Evie. They grew so much in this one, not only as individuals but as a couple and their undying love is inspiring!!

I'm really hoping there is more to this amazing set of people! I want some Alex and Mike!!! It's their turns at happily ever after!!

Melissa Jones says

I'll never have the words to express how amazing this book is, it's simply THE BEST and that is exactly the message I sent to the author when I finished reading!!

I want so badly to be able to write a review that will convey how meaningful and inspirational this whole series is. I love romance but what I love more is romance that goes beyond into the hardships of life and relationships, delves deep within the worst happenings of life and doesn't make it all better with love or sex but shows how hard it can really be to overcome, to not merely survive but to thrive and find a way to love yourself in order to love and be loved.

I fell in love with series, with Rob and Evie, with the whole cast of characters in book 1 First and Goal, and it has been an emotional journey throughout each and every book, and I've become so invested in this heart-wrenching, heart-pounding, heart-melting story!! To now finally get to book 4 Fourth and Inches is soooo bittersweet, while it is the best HEA EVER leaving me with the happiest heart for Rob and Evie and all that they endured and worked so hard for, my heart is happy but also heavy with not wanting to let go of these super special characters that feel so close and real, which is a true testament of this authors powerful writing skills of putting words to the page that have swallowed me up heart and soul!!!

Rob and Evie's story is not all hearts and flowers, it's not always pretty or easy....no, it's real which means it

is hard and sometimes very ugly hitting you in the heart so fiercely that you're not sure you can take it but you got to keep moving the chains with them because no matter how many plays it takes they deserve the biggest touchdown with the most amazing end zone celebration of all time!!!

Fourth and Inches is my most favorite book in the Moving The Chains series and the series is just so super special to me that I will reread time and again and this story, these characters will be in my heart FOREVER!!!!

This series has been a rollercoaster of emotions. It has twists you never saw coming, and each book made you feel. This last book wasn't any different. It was everything I was hoping for. I love Rob and Evie. Their story is full of heartbreak and love. It was amazing seeing how they changed and grew in each book, especially this one. I couldn't put this book down. One of the best series I've read!

Annie says

Wow! This is the final book in the Moving the Chains series. But series is not an appropriated enough word to describe it. It is life in word form. This series is so much more than a romance and football story.

Book 4 answers all the questions from the previous books, it fills all the empty spaces and brings all the

heartache (for both the characters and the readers) to a conclusion of epic proportions.

The characters are real, the narrative is perfect and this book wraps the story of Rob and Evie beautifully. This book touches so many important subjects, and it does so without diminishing their impact on the real world. Very often books reduced impactful events to make it fit the story.

This book and this series did not. It never shied away from the ugly, the hurtful or the truth. This book made no excuses wrapped in fluff. And it made it all the more perfect.

If I had to describe this series in one word, it would be "unicorn."

You know, that mythical and illusive symbol of something so rare and beautiful, we all want it, but very few attain it.

Now, stop reading this review and go read this unicorn series, so you too can be touched by it.
