Excellent book for 6-9 years old children. The story is interesting even for adult readers. Enjoyed while my daughter read it out loud.

This is obviously geared towards someone who likes horses more than I do because I found the story to be fairly dull in comparison to the other Nevergirls books.

Fairies, girls and magic horses... what could be a better fit? Kate is fascinated with a herd of mist horses and runs off to ride one. The only trouble is, these horses have been rumored to bewitch and capture their riders so they never stop riding. Will Kate be their latest victim?

One of the strongest books in the series so far. Even as I write this, my eight-year-old daughter who I read it with is trying to change the rating to five stars! This was an atmospheric thriller (though only mildly tense, mindful of its young, target audience) that was well-paced, richly detailed, and filled with stronger character development than past entries into this series.

I enjoyed reading the first three with my daughter last year or the year before I can't remember. But I finally got to book four.

These are good books if you like fairies and want some more of Tinkerbell and her friends. The good thing about these books it brings one fairy to the front of the story. So you get to know that one a bit more. But a

lot of them are always around and part of the story in some way.

Gabby, Mia, Lainey and Kate are able to go back and forth to Never Land via a portal now located in Gabby's closet.

They wake up to discover Gabby's room is for some reason full of fog that seems to be coming from the closet. But they can't wait to go to Never Land. They go through to discover Never Land is covered in a thick Mist. They can't see too much of anything.

Slivermist and some of the other water fairies are trying to get their boats to shore without crashing because they can barely make out each other in the mist. Slivermist keeps thinking of something in the back of her mind. But then they discover the mist horses. That is when she really starts worrying. She worries so much it sends her to the library. That is where she discovers the legend of the mist horses. She knows legend are not always what they seem to be but what if the worst part of this one is true? But on top of that they discover that Kate is now riding one of the mist horses. Can Slivermist help the girls find her in time? Or will the legend be true and it's already too late?

I love that this book is so fun to read. I really want to finish them even without my daughter.

This is a sweet series, especially good for very advanced young readers. The writing is great and features a varied vocabulary, but the content is light and appropriate for little ones.

I enjoyed reading this book to my 5 year old who loves the Never Girls adventures in Neverland. I appreciated the way this book highlights the importance of friendship and doing the right thing. I would recommend this series to young readers and readers who have their presents read to them

Most Exciting and Suspenseful Volume in the Series So Far

This is the fourth book in the Never Girls series. I was pleased with the first two books. I was very

disappointed by the third book, which was sour and out-of-sorts, loaded with irresponsible behavior, and completely humorless. I am happy to report that not only is this book as good as the first two, it is actually very suspenseful and action filled as well as very fairy oriented.

The four girls who visit Pixie Hollow, (Kate, Mia, Lainey, and Gabby), continue to display distinct personalities and are more developed as characters than I've generally found in books like this at this reading level. Kate is athletic and sporty; Lainey is the animal lover; Mia is a bit of a fashion maven; Gabby is Mia's five year old fairy obsessed sister.

Book 2 featured Lainey, Book 3 featured Mia and Gabby, and Book 4 features Kate. Don't know beyond that, but there are at least a few more after them.

The plot for this book is a good one. The girls return to Pixie Hollow and find the entire land covered in a creepy foggy mist. MAJOR SPOILER AHEAD. Mist Horses appear out of the fog. The fairies are wiggled out because old tales identify Mist Horses as portents of bad events. Nevertheless Kate starts to ride one of the horses and it appears she is under a spell, can't get off and has to be saved. Lots of running around and confusion. All of the fairies and kids cooperate to track down Kate and the spectral horse kidnapper. Very exciting stuff. So, as in the first book, there is some action, a bit of adventure, travel in and about Pixie Hollow, and more examples of common sense decision making. (There is also a surprising happy ending). END MAJOR SPOILER.

As before, the writing is direct, descriptive and not overly cutesy. The author respects the reader and the genre, and is stepping up from just a fairy book to more of a fantasy/adventure style. That said, the books remain generally cheerful, with a satisfying and pleasant feel. This book is distinguished by a lot of action on the fairy side, with lots of different fairies involved.

So, if you want an early reader that has a bit of fantasy/adventure and a nice vibe, the books in this series are certainly worth considering. For what it's worth, you can read the books out of order, since the background is always laid out in the first few pages. If you start at the beginning of the series, though, you get to start with the girls' initial discovery of Pixie Hollow, which is sort of fun, and you get to see the development of the characters.

Please note that I secured my copy of this book from my local library. I have no connection at all to the author or the publisher of this book. (But I do vaguely remember when Uncle Walt would come over to babysit. Not really.)

Such cute series! In this fourth installment, the girls return to Pixie Hollow where a strange mist has rolled in. Since it is rarely foggy in Pixie Hollow the fairies wonder what it could mean! The mist horses have returned, and Kate goes on a wild adventure!

These are such good books for a reader that is just stepping out on their own, wanting a story with a little meat to it. It's just over 100 pages long with excitement and mystery.

Kate, Mia and Lainey are the best of friends and then there is Gabby, Mia's little sister who is a true and ardent believer of fairies. It is early in the morning and the girls had a sleep over at Mia's house when they decide to visit Neverland through Gabby's closet...but what is this? There is a white mist floating out of the closet. What in the world is going on in Neverland? The girls have to find out so off they go into the mist together. There is a reason for this. They had a made a promise after their last adventure (a dandelion wish) to only going to Neverland together.

Pixi Hollow is engulfed in a thick white misty fog...so thick that they can barely see anything if front of them. All of the fairies, except the fairy scouts, are "grounded" by the order of Queen Clarion for safety. Suddenly a herd of misty horses show up and Kate is captivated. As they all head back to the Home Tree to wait out the mist, Kate decides to take one more look at these misty horses and the adventure begins.

"Mist in the morning, fairies take warning" ..that is what kept going through Silvermist's mind. Silvermist is a water-talent fairy and she heard this phrase before; but what did it mean? Kate and her friends would soon find out.

The Never Girl series is perfect for the beginning chapter reader. The story is captivating, the characters are everyday believable, the length is just right and yes, there are a few lessons to be learned. I first discovered the series a little while ago with the first adventure, in a blink. I have read all of the adventures and when I am done, I send them to my 6 year old granddaughter. She reads them and then we talk about them on the phone. It is our very own book clutch. We talk about the story, of course; but also some "whys". It makes her think...why did Gabby do that or "cause/action and effect". She feels so grown up talking about the books. She even goes on line to see when the next adventure will be out so I can pre-order it! What a wonderful way to spend some time with my granddaughter long distance! By the way, the next adventure (#5) will be out in January 2014 and it is called wedding wings!

I loved the perspective of Gabby. I think the author has done a splendid job making each girl come to life even when switching between their point of view for each book. such a cute and fun girl series!

This was really cute. My daughter and I (she's 8) would read it before bed, at least one chapter and it's a fast-moving, easy to comprehend book. Actually, I'm sort of looking forward to reading more from this Never Girls series. I like that you get to know more of Tinkerbell's little fairy-friends and use your imagination to step into the fairy world with these four little girls. It's not too cheesy and the situations are about as bizarre or far-fetched as one would expect from a trip to Neverland...

This book centers on both Kate and Silvermist. Kate and the girls head to Neverland, get waylaid by the mist horses (that also come along with a nasty rumor/legend about these darn horses being really bad juju). Somewhere along the way, we witness Silvermist doubting her choices and leadership ability, and we see Kate totally ditch her friends to ride off - literally - into the clouds on the mist horse (HER mist

horse)...which, just because it's a horse made from mist doesn't mean that you can't ride it, touch and pet it. It nickers and neighs. Basically a real horse. Only from mist. But not really. Yea.

Anyway. So, the moral is cute, the ending wraps everything up nicely and, like I said above, left me wanting to read others from this series.

The book " from the mist" by kiki Thorpe is a great fantasy story because it is about girls that have a great imagination and it is all about girl power. Another reason I love this book because it is a great child book (which I am). I would recommend you reading it.
