The War has begun.

Prince Corin and Prince Laen, united against the light fae, are battling their way to the capital, Aos SÃ, where Corin will claim the Kingdom for his own.

The land is pleading for a new leader, someone to save it, and the people, from its treatment at the hands of King Auberren but has Corin waited too long... has he time enough to do what he must as the land screams for him in his mind, pushing his sanity to the limits of what he can bear?

Laen is his ever present defender, brother, best friend and the man he will have no choice but to betray if he finally succeeds.

In winning the war, what, exactly will Corin lose?

The war leaves no one untouched and Claudette is torn in two directions as she fears for the lives of three men in her life. She is following Corin to the Capital, terrified that she may lose him, and waiting desperately for news from Bram, her personal spy; a disgraced nobleman turned highwayman.

He has gone to find her brother in the human world but trouble follows Bram like the tail on a cat, and this time, instead of running from his problems...

heâ€™s going to have to take them home with him.

I loved this, maybe even more than Book 3, if that's possible. Emma is an amazing writer and her characters are some of the best I have had the pleasure to 'meet', albeit not in person (unfortunately :)). I like how they all grow and learn from each other and I loved how this last book brought all of the main players from the other books together. I do hope we will see more of all of them in the next ones.

To say this book series is addictive is an huge understatement  
every last book will leave you craving for the next book.

The characters are amazing , The way of writing is so nice that it pulls you into the book.

The plot is mind blowing and most of the times you feel like on a roller coaster of emotions....

Few books can make me cry and much lesser can make me laugh  
but these books managed to do both of them

The characters are so well written you sort of form emotional connection with them

I cried a lot of times while reading this book ,Specially when Lean went away from Corin I thought that was  
the end of their friendship, And I was like.....

Their childhood stories were so sweet and sentimental.

*Who wouldn't want a friendship like they have?*

And I love it when all the dark boys (Corin ,Lean,Bram and sometimes Dannon too ) are in the Same place ,  
The situation , no matter how grave it is  
Things go from.....

To This...

*In matter of seconds*

Corin , he is my favorite , He is charming, awesome ,Amazing , Funny , Fabulous , Fantastic.....( *all kinds of  
good adjectives*)

For anyone who is looking for a fabulous book to read ,This book is definitely something you should read

And last but Certainly not the least,A huge Thank you to the Writer,Emma V.Leech for making these  
amazing book series available on Wattpad

I really enjoyed this, though I hope to re-read it when it's been cleaned up a bit. I got the first two volumes from Amazon (The Dark Prince and The Dark Heart) and wanted to pursue the story, so I read this and The Dark Deceit on Wattpad. I think it's safe to say that the editing process is a good thing. I enjoyed the story a lot, and I will read the next instalment with interest, but the writing was much less polished than I experienced with the first two books.

All that aside, the story is enthralling and the characters are very well drawn and enjoyable. Bram/Tully is

particularly fun -- a wannabe 'wolf' who is just too honourable to quite make it, and a highwayman who is much more Robin Hood than Dick Turpin. Corin is still larger-than-life (and getting bigger by the day) but still accessible. Laen, I find a bit opaque, which may be the point. Dannon is proving to be better than he was painted initially. Only Devil is still really despicable and scary, though Ines (another wonderful creation) clearly sees through him. The Queen/mother is also intriguingly nuanced. The girls are a bit harder to separate in my mind, perhaps because throughout the series it is mostly through their eyes that we see the story. The impact of quite so many feisty human women on a Fae society whose mores are essentially those of the nineteenth century will, I hope, provide material for many more stories  
Scene-setting is very good, both in 'normal' France and in Faery.  
So, I heartily recommend this, and the two books that precede it, with the caveat that it will be even better when it's properly published.
