K says

Great job on this book! Highly recommend it! Can't wait for his next book.

Peter Charleston says

I enjoyed reading this adventure. The plot thickens as you progress through the pages and the people portrayed could be your next door neighbor. Along with spies and government Mr. Wash tosses in a little organized crime action. Thanks Mr. W. F. Walsh for the entertainment along with Goodreads for introducing myself to this author.

Kasey Cocoa says

This novel is a great read for those who enjoy this genre. Believable characters with layers, flaws and appropriate skill sets. It's quite clear the author has considerable knowledge on the topic and has done a fine job intertwining plots, places and people. Intriguing and not watered down at all. A real page turner that leaves enough at the end for another book in the series. Well done.
