Craig Cunningham says

Dr. Yosef Ben-Jochannan is an incredible scholar. He has done such excellent work in the recovery of Ancient African history. His particular thesis demonstrates that Africa, as the Mother of Civilization, birthed much of the ideology of Western Civilization. Through the Middle Passage, much of the European slave traders denigrated Africans and African history, suggesting that African history contributed nothing to the world. Texts like Dr. Ben's text emphasize the importance and the major contributions that Africans and African history has made to the world, generally, but specifically to the Western Cultural and Western Civilization feature. Before the Romans, Before the Greeks, the Egyptians, the Nubians, the culture of Kemet, existed in Africa, and Dr. Ben articulates and demonstrates how these cultures reached a high level of civilization in spite fo the anti-African sentiments that were very prominent in the 19th century. This is a very good book .
