## **Green-Eyed Demon** Jaye Wells

Things to do:

1. Rescue sister.
2. Murder grandmother.
3. Don't upset the voodoo priestess.

The clock is ticking for Sabina Kane. Her sister has been kidnapped by her grandmother, the Dark Races are on the brink of war, and a mysterious order is manipulating everyone behind the scenes.

Working on information provided by an unlikely ally, Sabina and her trusty sidekicks--a sexy mage named Adam Lazarus and Giguahl, a Mischief demon--head to New Orleans to begin the hunt for her sister. Once there, they must contend with belligerent werewolves, magic-wielding vampires and--perhaps most frightening of all--humans.

But as much as Sabina is focused on surviving the present, the past won't be ignored. Before she can save those she cares about most, she must save herself from the ghosts of her past.

## From Reader Review Green-Eyed Demon for online ebook

### Carolyn Storer says

After reading the first two books in fairly quick succession and really enjoying them both, I was so pleased to receive a review copy of the third and latest instalment in the brilliant 'Sabina Kane' series by Jaye Wells.

As with all the 'Sabina Kane' books this one begins with a fast-paced action scene, which pulled me in to the story from the first page. Sabina and her team, consisting of Giguhl and Adam, are on route to find Maisie, Sabina's twin sister.

Adam is still the scorchingly sexy mage, Giguhl is still his snarky lovable self and Sabina continues to be the fantastic kick-arse chick I met in Red-Headed Stepchild. She's also feeling more for Adam, well, who can blame her, but unfortunately, she's still not sure if she should let herself fall for him - she doesn't do love, does she? But while Sabina is questioning every emotion and action, Adam is taking metaphorical cold-showers as sexual frustration oozes from every pore.

The relationship between Sabina and Adam moves along at a snails pace - it's still complicated and Sabina is still holding back. Some of her decisions later in the book are questionable and she had me frowning at her in disapproval, but at the same time I understand where she was coming from.

I loved this book, it's fast-paced, edgy. There's plenty of action, and the banter between Sabina and demon-cat Giguhl, which I loved in the first book but found lacking in the second, is back!

"Is this gonna take long?" Giguhl said.

I frowned at the demon. "Why - you got somewhere else to be?"

He shot me a bitch-please look. "No but I'd like the record to state that getting shot in the ass still isn't fun." He shifted around to show me his left ass cheek where his black sweat pants now featured a perfectly round bullet hole. I couldn't see any blood in the dim light, but I could smell it.

"Sheesh, G, again?" Adam said.

"Yes, Mr. Perfect, again. Lucky for you bitches I'm a fast healer."

For those of you who've read the previous books will know what this refers to but hopefully the rest of you will just capture the fabulous snarkiness - I really enjoy this kind of dialogue between characters, when done well, and Ms Wells writes in brilliantly. It also lightens the tone but not too much as this is still a nicely dark urban fantasy.

There's lots of fab action throughout the book and there's a bit of a showdown between Sabina and her evil vampire Grandmother. However, finding Maisie is not that easy, of course. There's lots of ups and downs on the way. Sabina, Adam and Giguhl are now a pretty good team, although sometimes Sabina forgets that and occasionally slips back into loner-assassin mode, as she's not used to having friends and 'teammates', it does freak her out a little bit but deep down I think she's actually liking it. Sabina is growing as a character very well.

Maisie also has a bit of a tough ride in the instalment, but as I found her a little sickly sweet in The Mage in

Black, it was satisfying to see her act a bit more like Sabina, even if it was forced upon her by the torture inflicted by her Grandmother.

There are a few new additions to this instalment: a feisty werewolf, a drag queen called Cleopatra Pussy Willow, a voodoo priestess, who's human no less and gorgeous, which causes a touch of jealousy from one killer-assassin...tee hee.

VERDICT:

This series is truly fab. I really didn't want to get to the end of this book as I now have to wait ages for 'Silver-Tongued Devil' the next instalment...I can't wait! I love this author and this series - a great urban fantasy I would definitely recommend!

### **Vanessa theJeepDiva says**

This is a series that must be read in order and cannot be read as a stand-alone. Green Eyed Demon starts at the very beginning with very fast paced action and holds a steady pace until the nail biting end. There is a very climatic fight at the end of the book. We have quite a few new characters and beings, also many of the mages from book two carry over, while several characters from the first book drop by to wreak havoc on Sabina's life. One of the characters from Red-Headed Stepchild that makes an appearance is so out of left field I am still wondering how it was pulled off and it made complete sense. A new big bad evil is also introduced

Sabina's quest to find her twin sister takes her, Giguhl and Adam to New Orleans. They acquire the tip from the being that they kidnap in the fight at the beginning of the book. Rhea has arranged for them to stay at her friend's home. This friend happens to be a voodoo priestess who resides with a drag queen. There is hilarity from the moment the drag queen is introduced. The voodoo priestess and Sabina get into a mess of trouble in cemetery one night. This installment in the series is going to answer a lot of questions. Before the majority of the questions from the previous books are answered several new problems and conflicts will arise to give you all new questions.

I love how Sabina's character is evolving. Her attitude is changing. Sabina is taking Oprah like advice from Giguhl and getting to know her emotions. I love Giguhl. He is dishing out advice that one can only imagine came from Dr. Phil's mouth. This does not take away from the tough kick ass heroine that drives this series. It actually makes her more likable. She is still tough and snarky, yet she is beginning to trust the people that have come into her life.

**MINOR SPOILER**

My list of favourite UFs consists of only three series. And Jaye Wells' Sabina Kane series is one of them!!!

Sabina's narration is one of the few out there in the genre that I don't find tedious or boring. I loved Sabina in the previous books, but I think her character has grown immensely from the first two books. Sure, she's still got her quick-fire temper and bitchy moments, but she wouldn't be Sabina if she lost that fire in her.

When we first met Sabina in book one, she was a cold-hearted bitch. She was devoid of any emotions, which made her the perfect assassin. But by the end of this book, Sabina opens herself up in a way that reveals old wounds and brings hope to a lighter future. So much so that she finally lets Adam, the hot mage into her heart. Finally! I've been waiting for this moment since RHSC and I am thrilled to say that there were at least three moments when tears threatened to spill. Wells just knows how to play on my emotions. The fact that Sabina refers to Adam as "the man she loves" shows how much she's overcome to care for him so much.

Another thing I loved about this book was the change in setting. New Orleans brought so much life and magic to the series. Wells did a great job of taking the surroundings and incorporating it into the storyline. In addition, she added new eccentric characters that really embodied the Big Easy way. Of course, I'm talking about PUSSY WILLOW! I loved her and when she was beaten, rage boiled through my veins. I was so pissed! Needless to say, I loved the secondary characters in this series!

And then there's Team Awesome aka Sabina, Adam, and Gighul. What a team! I adore this trio! With friendship and teamwork, these guys seriously kick some major ass. I can't wait to read more of their little adventures!

But there was one thing I felt that was missing from this book, and of course, it was Maisie's absence. I didn't expect to love Maze as much as I thought I would in THIB, but I really missed her sweetness in this one.

*Green-Eyed Demon* was a great book in the Sabina Kane series! With great action, humour and romance, I don't think I can love this series more than I already do!

Favourite Quote:

"You ever let a demon through your portal before?" he purred to Calyx. The tip of one claw swirled lazy circles in the mossy pond water.

"Um, I don't think so," she said hesitantly.

He winked at the faery. "Trust me, sweet cheeks, you'd remember having a demon in your portal."

## AH says

I'm a little addicted to this series. I can't say why, other than they are fun to read and a great escape. *Green-Eyed Demon* is the third book in the Sabina Kane series. In this installment, Sabina, Adam, and Gighul must rescue Sabina's twin sister Maisie from her criminally insane grandmother Lavinia. And, oh yes, Sabina must save the world from Lavinia's sinister plans to rid the world of mages, among other things.

This book is set mostly in New Orleans, which provides the perfect atmosphere for this book. New Orleans is an easy place to believe in magic, voodoo, and all things paranormal. Sabina and Adam enlist the aid of

Zenobia a voodoo and magic store owner, to help find Maisie.

The characters really make the series. Gighul the demon is up to his usual mischief. Zenobia's assistant Brooks has a flamboyant alter-ego as Pussy Willow, a transvestite entertainer. Throw in the mage shock rock group Necrospank's lead singer Erron Zorn and you have a most colorful cast of characters. The dialogue alone had me in stitches.

On the relationship side, Sabina has difficulty with commitment. She makes a few bad decisions and I felt frustrated with Sabina as she avoided Adam. However, Sabina does mature in this book. She still can act as a loose cannon, but she learns to depend on the others around her.

I especially enjoyed the battle scenes. I loved how Sabina developed more control over her powers. These scenes had me on the edge of my seat. Well done!

4.5 stars!

Now, see, this is what an urban fantasy book is supposed to look like. It has absolutely everything: vampires, mages, weres, mischief demons, fae transvestites, voodoo priestesses, kidnapped twin sisters, evil murderous grandmothers, epic battles and great love stories. Jaye Wells has come a long way since writing Red Headed Stepchild . Truth to be told, she's spending an awful lot of time with Nicole Peeler lately. Maybe Peeler's general awesomeness rubbed off on her somehow.

While Sabina Kane certainly isn't Jane True, the person she's become cannot leave anyone coldhearted. I think Wells finally realized that the MC had to actually feel something in order for someone to connect with her. Green Eyed Demon is all about revelations and personal growth. It kept me interested from the first to the last page. You all know how I feel about writing summaries, so I'll just skip that part. This series is really worth reading, even if it means suffering through the first installment.

Brava, Ms. Wells. You did very well!

this book was AWESOME with a capital A

this book is the 3rd installment of the Sabina Kane series, and after reading the first 2, this is what it was all building up for, and let me tell you, you would not be disappointed at all, I just love the magepire Sabina and her mancy Adam, and them FINALLY getting it on, (bout time), the other characters just bring it all together and wouldn't be great without them, especially Gigi the demon, I soooooo love him, no matter what happens you can guarantee that Gighul will diffuse the whole situation, and get a joke line in there somewhere, it just wouldn't be same without him, well off to read the next installment, don't let me down Magepire xx

### A buddy read with my MacHalo Freaks family!!!

This was the third installment in the Sabina Series and our half Vamp half Mage chick is on the hunt for her grandmother Queen bitch, who has captured and tortured her twin sister M. Things seem quite hopeless and Sabina, along with her potential love interest Adam the mage, her minion the Demon Cat Gighul, a gender bending Fae, a human Voodoo priestess and an old lady mage, all have to find a way to free Mazy, kill the old Queen bitch, and prevent the beginning of a war between the Fae and the rest of the Dark magical creatures.... A tall order for a potentially powerful mage who has no idea how to work her magic....

This time around the action moved to New Orleans and as always, the city comes with its own unique personality. It is a good backdrop for the multi race and multi species encompassing plot. We even get several religious and mythological legends snuck in between the drag shows, midget porn, and zombie animation.... Yea, it all happens in the span of just this book!

So, the question is why, after all these gems contained in this issue, I am only rating it a tad over 3 Stars??? Because as much as the story kept me interested, it also lacks in something and I just can't put my finger on it. Some of it has to do with the predictability of the story, but this usually does not bother me - after all, I always say that every new work of art is just a variation on a recurring theme. Some of it is that as much as Sabina gets to do, as a character she is a bit shallow and not much growth has been happening... But most of all, it is that undefined "something" which makes the read magical and I just did not get it from this book.... The heart and soul of the series is still the gossiping, smart ass Demon Cat and I hope he can continue bringing the laughter with him, because he definitely brightens up the place. The romance is OK, but I am not as invested in it as I could be yet... I did enjoy the lesbian couple - there was electricity every time they were around:-) And the zombie accident was very fun - definitely some sparks of brilliance here and there...

Overall, this is a solid middle book in a series and I am not giving up on it. I still hope that greatness is possible!

Now I wish you all Happy Reading and may you always find joy in a book!!!

## Sh3llraiser (grumpybookgrrrl) says

I guess I'll attempt to rewrite this review now that I've had some sleep and gotten over my rage at losing the whole thing last night. I'll try to keep it short. Sabina goes to Louisiana to try and rescue her sister, Maisie, and finally end her evil Grandmother, who also happens to be Queen of the vampires.

I liked the change of setting. Louisiana was fun. We got to meet some new cool supporting characters. One thing I have to say for the author, she writes very diverse characters. We've got a lesbian couple in this one (and an inter-species couple at that!), a transvestite fae, lots of varieties of skin tones, different age groups, etc.

My favorite new character? Two words for you: Pussy Willow. The romance factor was a lot more prevalent. There were zombies! The action improved. Basically, everything improved. Sabina grows and wasn't as annoying.

I was going to give this four stars and then some drama happened. So I'll just list my issues and put them in spoilers and then anyone who has read this can check them out if they want and maybe they'll agree. Probably, it won't bother you as much as it did me. I'm very Drama-Sensitive™ these days with books.

(view spoiler)

### **Original post:**

Ugh, don't you hate it when you lose your whole review? I need to start writing them with Word and then just copy/paste them over here. \*frustrated\* Anyway, maybe I'll get around to reviewing this later. Better than the previous two books, but something is yet again missing for me. I still haven't connected to Sabina although there is definite improvement and growth.

Previously Published on my blog: [Welcome to Larissa's Bookish Life](#)

\*Contains Spoilers if you haven't read the first two books in the series.

I read the first book in Jaye Wells' Sabina Kane series, Red-headed Stepchild, before I started reviewing books in 2009. By the time the second book in the series, The Mage in Black, came out I ended up postponing reading it. Last week, I got Green-Eyed Demon from NetGalley and I finally buckled down and read Mage in Black. I could hit myself for taking so long to catch up on this series. I had forgotten how awesome these books are!

Green-Eyed Demon starts off not very long after the events of Mage in Black. Sabina, Adam and Giguil are trying to find out where Sabina's sister, Maisie, is after she was kidnapped at the end of Mage in Black.

From page one, Sabina Kane's newest adventure is a wild ride and I didn't want to get off for one second! Between trying to find her sister, dealing with her feelings for Adam, planning to kill her grandmother, being attacked by magic weaving vamps and feeling her world spin on its axis, Sabina has her work cut out for her and all I had to do was sit back and enjoy the ride.

One of my favorite things about this series is that the hero is actually a nice guy. It sounds crazy when I put it like that, but in a genre where most heroes are of the anti, problematic and the not-so-clearly-a-hero kind, I find that a breath of fresh air!

As for the heroine, Jaye Wells has done a spectacular job in creating Sabina. She is the ultimate damage heroine that I love to get to know and see grow with each book and each adventure. Sabina's growth from the selfish, temperamental lone-wolf to someone who has learned to admit that she can care for the people in her life was amazing. However, that change will definitely not be the easiest one and I can't wait to read all about it.

All in all, Green-Eyed Demon was the perfect addition to this awesome Urban Fantasy series that I sincerely hope will be around for a long time!

4.5 This is what happened to me during this book

I can't believe how much the main character changed in this book! The first ones didn't deserve 5 stars because she didn't really seem like the smart hero type. Guess what?! She is now!

As the previous books, this was really fast paced and damn hard to put down. And I really liked the new characters, even the bad ones were so good at being bad that they were good (if that makes any sense...). And I'm so glad I got to see more of Adam in this book. He's not as *meh* as I thought he was.

And the best part? The series isn't over. Can't wait to see what happens the next one!

### **Michelle, the Bookshelf Stalker Queen of the Undead says**

I'm not sure why I wanted to read an early copy of this book. After book 2, I did not know if I wanted to continue with the series at all. Frankly, I was bored with the series, and I really did not like Sabina. I know, this is not how you start a review in which you rated the book 4 stars but please stick with me. I'll make sense eventually... or not.

Anyways, book 3 in the Sabina Kane saga started really darn good. I was squealing with joy (no, not literally) but I was happy. I so did not regret my decision to read this book. There was tons of action with Sabina trying to recover what was taken from her at the end of book 2 (trying to avoid a spoiler here just in case). Then, a few chapters later, it was yawntown for me. How do I explain this? I'm going to try to give you example:

Note- this is NOT from the book.

I walked upstairs.

I sneezed.

I put a sock on.

I looked into the mirror.

I sat down.

I wondered what Herman was doing

Blah, blah, blah.

The author's writing is like the examples I gave above. The writing is so mechanical at times. Now, I am NO writer but I have a rule, if it looks like I could write the book, something is wrong. At times, the writing in this book felt wrong.

So, what the hell right? I'm still giving the book 4 stars and all I've done is complain? Yeah, I know, I do ramble. So here is the good stuff:

I loved Sabina in this book for the exact reason I hated her in book 2. Seriously, the best part of this book has nothing to do with the story (I'll get to that shortly). This book is about Sabina struggling with her inner self and who she is. I'm not talking about the fact that she is half Mage and half vampire but instead, the part that makes her 1 part lethal assassin and one part vulnerable, fragile woman. This is what I loved. No, the book is not sappy at all. In fact, you still have all of Sabina's wit, and her kick ass heroism. However, you also have her insecurities, and her sense of hopelessness.

By far, the best part of the book is Sabina's and Adam's relationship. Not only is it conflicted but also it is darn right fun. You add in jealousy on Sabina's part, frustration on Adam's part, a demon with an opinion, a drag queen, a pissed off werewolf and you have a lot of fun antics.

I learned to like Sabina in this book. I realized I did not want to change her but instead, I was hoping she learned to open up to the people (ok not people but Mage's, werewolves, demons, etc.) around her. She could still be a kick ass tough bitch but in this book, she learned what really mattered. Wow, I sound like a romantic. How sickening!

---

## **Maria Dimitrova says**

*Green-Eyed Demon* picks up right after the events of *Violet Tendencies*. Truth be told you don't need to have read the story but it was pretty damn fun so you probably should. So our rescue quartet is down to a trio again and I'm quite happy with that development. Valva was a bit too much if you ask me. Mostly because Giguhl acted like a love sick puppy around her and that was gag inducing. Where is your pride, demon?! So we're still looking for Maisie. And Sabina's brilliant plan is to kidnap one of the Dominae to exchange for her sister. The plan goes somewhat successfully and they manage to nab Tanith and deliver her to the Hekate Council. Which is hiding with the Queen of the Fae which is a major bitch. Tanith gives them a clue to Maisie's location in exchange for getting her on the vampire throne eventually. So as with the previous instalments we're off to a new city.

New Orleans is a great place to set an urban fantasy novel and because it is New Orleans one of the new layers is a voodoo priestess. The catch is Zen is not a member of the dark races - she's a human. Or as she prefers "mortally challenged". And her assistant is one of the more colourful characters in the books - a feary drag queen. How cool is that?! At first I found Zen annoying but she was a positive influence on Sabina. The merry band was joined (a bit reluctantly) by a couple of recreant mages musicians with some strange fetishes. The lead one Erron Zorn proved to be a real treasure trove when it comes to information about the

Caste of Nod and it's mysterious leader (view spoiler) so I'm hoping that he'll be around for the next couple of books.

We had the usual drama that included some awesome fight scenes, Sabina accidentally raising a zombie, one dead creepy owl and (view spoiler) before the final confrontation with Granny Dearest and the ultimate victory. As the prophecies predicted Sabina united the dark races and thus avoided the war. So far. Because Master Mahan aka Cain is still alive and still wants Sabina chained and obedient, a servant to be used in his own plans. Also after that little stunt Queen Maeve pulled (view spoiler) I'm not so sure that the peace is going to last. More likely it will fall apart a couple of minutes after Sabina opens her big mouth :)

Talking about Sabina I have to point out that she went through quite the transformation in this book. Character growth doesn't even cover it. More like someone kidnapped her and installed her with an emotions chip. While I like the new and improved Sabina it left a bit artificial. Still I'm happy she's finally opened up and accepted the fact that there are people who love her. Because she'll need them in the battles to come.

**Green-Eyed Demon** is the third book in the Sabina Kane series by Jaye Wells and it was freaking, damn awesome. And by awesome I mean mind-blowingly epic. I seriously had so much fun with this one! DEFINITELY the best in the series yet.

Third book in the series, so I don't want to spoil, but Sabina Kane is in New Orleans to save her sister and lots of stuff happens. We have the original team of awesome (aka. Giguhl, Adam and Sabina) with a whole bunch of new delightful characters. I seriously cannot ramble on enough about how fun this one was!

### Things to Love About Green-Eyed Demon

New Orleans! *N'Orleans!* NEW ORLEANSSSSS. Sure, hey, I haven't been there myself, but *The Originals* is set there and that's partly made me fall in love with it. I love the feel of the city, the vibe, it's soul. Previous books were set in Los Angeles and New York, but this one was definitely the best setting yet. I just loved the feel of the whole setting!

ALL THE PEEPS. At last, in this instalment, we have all the possible types of paranormal you can have in a brilliant urban fantasy gang. We've got vampires, mages, werewolves, demons, voodoo priestesses, zombies, faes and changlings. SERIOUSLY. And I love them all! All the new characters we got to meet had so much sass - I loved Georgia and Mac's relationship (especially once Mac got feisty!) and Zen (even though she clashed with Sabina initially) especially.

The action! Stuff was happening constantly, the pages just kept turning and I honestly didn't know what to expect next. Even though most of the story was spent searching for Maisie, so much stuff was happening in between, it was impossible to feel bored and resentful that they weren't able to succeed for most of the book. It was fast-paced and gripping, and I loved it so much.

Overall this was a brilliant continuation. I loved it so, so much. This series is really shaping up to be quite something!

Mrs. Wells please let me shake your hand. Thank you.

I am so surprised by *Green-Eyed Demon*. When I finished the previous book I was thinking of reading this just for the sake of knowing how it will end. Or evolve since there are two more books coming out. And then I started reading having a bored face and cringing a bit when thinking that I'll get to taste some more of Sabina's "sexy" attitude.

And then this happened:

Nah I'm kidding, don't worry. There was no creepy Japanese person rubbing a bunny against his face in the book. At least as far as I remember.

Actually this is what happened:

Yep! It was **awesome!**

My question to Sabina right now would be: "Who are you and what have you done with Sabina?" She is a totally different person. Probably if she'd be more perfect than this I'd say Jaye Wells actually did a reboot on her. Maybe she did but not 100%. Of course she still has some attitude issues but at least she's acting like a heroine now. And an actual person/trampire. I have to admit that the change was rather sudden but it worked wonders for the book.

We also had a nice amount of Adam in the mixture. The lovebirds had way better chemistry this time. Too bad Sabina is manlier than him. We also had lots of new interesting characters. Some I liked more than others. Giguhl was still meh. I lost my hope of him getting out of this annoying phase.

*I probably shouldn't have been offended that a zombie just shooed off an opportunity to eat my brains, but I had to admit it stung.*

Heh! Loved that quote. One extra star for the zombies. What? I have a weak spot for them.

Damn, Jaye Wells surpassed herself \*grabs tissue and blows nose\* What? I just got something in my eye.

### Sarah says

The stakes have never been higher for Sabina, not only is her grandmother trying to start a war amongst all

the Dark Races that could destroy half the world's population but she has also taken Sabina's twin sister as a hostage. Having seen first hand exactly what Lavinia is capable of Sabina knows that she has a limited time to save Maisie's life, she may have only just met her twin but Sabina wants the chance to get to know her properly and she will do whatever it takes to rescue her.

While I enjoyed the first two books in this series I feel like **Green-Eyed Demon** really sees things step up a gear. We get more action, more romance, the introduction of some fab new characters and a fun new setting as Sabina and friends visit New Orleans in search of Maisie. Sabina takes a long hard look at herself in this book and it made her character so much easier to relate to, she has always been a loner (with good reason!) but she is starting to realise that she isn't quite as heartless as she has always pretended to be and that as a team her, Adam and Gighul are pretty much unstoppable. She makes a slip up towards the end but I'm going to blame that on temporary insanity and hope that she's finally learnt her lesson once and for all.

I love the development in Sabina and Adam's relationship, I like that he's supportive of her and understands where she is coming from but that he doesn't let her walk all over him. He tells her in no uncertain terms that he cares and wants to be with her but that he's not going to put up with her dithering indefinitely so she'd better pull her finger out. Gighul is one of the stars of the show as always, his snark always puts a smile on his face, but he has some competition in this book in the form of a fae transvestite, a voodoo priestess and a very angry werewolf. I hope we're going to see more of all the new characters introduced here because they all had something to add to the story.

This series has definitely captured my interest and I'm looking forward to reading the last few stories to find out how everything turns out for Sabina.
