Max Davis

**The Insanity of Unbelief: A Journalist's Journey from Belief to Skepticism to Deep Faith** Max Davis  
**How Science and the Supernatural Changed My Life** “One day one of my professors asked me if it was true that I was a Bible-believing Christian. When I answered yes, his polite, upbeat attitude instantly turned rude and arrogant. In front of my peers, he insulted my intelligence, belittled my faith, and discredited the Bible. To him there was absolutely no doubt that science and academia had shown the pure ‘*insanity of such belief*,’” writes author Max Davis. Written from his journalistic point of view, *The Insanity of Unbelief* is a result of the author’s 30-year walk from childlike belief, to skepticism, and finally deep, secure faith. The contents are based on his expert and thorough research of solid facts versus what many atheists, agnostics, and even some believers tout. Different from other apologetic books is the addition of true, documented, supernatural experiences and miracles making a compelling—and exciting—argument for the reality and power of God!

## The Insanity of Unbelief: A Journalist's Journey from Belief to Skepticism to Deep Faith Details

## **Karen Caires says**

Good read. Very interesting the way scripture was related to science and history.

---

## **Ryan says**

Max's background in journalism helps him write a compelling, looking-at-the facts kind of book about his journey from skepticism to faith, helping the reader confront many of his or her own doubts head on. Different from many apologetic books, he spends a lot of time investigating the supernatural a Christian yet journalistic standpoint. Very fun.

## **Dave Wheeler says**

### **The Great Debate**

This is a term well over used, but this really is the greatest of debates. For those that believe in GOD and HIS son plus the HOLY SPIRIT this simply argues very powerfully what we believe, but if you are a unbeliever this will test your resolve and test your arguments. A great book in my opinion Max, thanks

---

## **Jerry Blackerby says**

This was one of the best apologetics book I have read. The author has degrees in Journalism and Biblical Studies. His writing skills and Biblical knowledge are very apparent while reading this excellent book. I highly recommend the book.

---

## **Bobbie says**

A very good book demonstrating that unbelief in God truly is insanity

---

## **Wayne Pelren says**

### **Very good**

An excellent work with just the right balance of scriptural teaching and indisputable testimonies of how God still does miracles today.

---

### **Anne M. says**

This book cannot be read in a hurry, you really have to think about what the author is saying.

Max Davis a practicing Christian when at university was demoralised on front of other students by one of the professors. He was belittled for his faith in God on front of them all. Later the same professor spoke to Max alone, admitting he didn't have all the answers. This taught the young Max something, always question, listen to the other person, but challenge and research.

Max calls himself a skeptic although he is a devout Christian. However he questions everything. On his chapter about miracles, he visits the person who has been cured, looks at their medical records, speaks to doctors, before admitting that yes this was a miracle. He questions why his own son is blind despite so many prayers for a cure. He tells of the many scientists and people knowledgeable in all walks of life who believe in God. He reads of their reasons for believing that there is a God despite science which in many cases actually proves the case for God. There is so much in this book that if you have any interest in God or Christianity or are just curious, it is a must read.

---

### **Lee Button says**

While the book contains more quotes than most apologetics books and traces Davis' journey to faith it is just another apologetics book. I was not moved by the author's attempt to demonstrate that remarkable (he calls them miraculous) healings prove the existence of God.

---

### **Emily Howitt says**

There is definitely an emphasis on facts in this book. I know that "facts" is a relative word when dealing with things such as belief in God, but Max really does try to get as many facts as he can from the people he interviews. I also like that he included quotes from people in different fields, both present and past, about their belief. If you're already a believer, I think this book will definitely strengthen your faith. And if you're not a believer, I'd like to know how you'd respond to some of the things Max talks about. Either way, I'd recommend this book to anyone who was curious about God.

---

### **Dennis Thiessen says**

very good science based facts. particularly liked the part about the speed of light!

---

### **Linda says**

Like so many similar books, this one made a good case for belief in God (which I've never doubted) but a less effective one, I thought, for faith in the inerrant Bible. Some interesting stories of miraculous healings, but less convincing in other areas.

---

**larry brashear says**

**Excellente!**

I truly love this book. In the way of feedback the author continually used the word though instead of the intended word tough. God bless you for this wonderful work.

---

**Denise says**

I'm not sure that I believed the near death accounts and other stories, but it was an interesting read.
