If there's anything scarier than ghosts and paranormal phenomenon, it's the criminals who kill for gut-wrenching reasons. What is happening in these people's minds to make them commit heinous crimes without any sign of remorse?

This book will feature some of the craziest serial killers, murderers and sociopaths that have walked, and are still walking this world. You might have heard of the most prolific serial killers, but this book will offer a list you most probably haven't heard of. However, not making the list of the most famous criminals doesn't make them any less terrifying.

From the disabled circus-star who abused his family and murdered his son-in-law to the child who killed other children for fun or the taxi driver who stored his passengers' genitalia in Tupperware containers, this book will offer some of the most disturbing, yet not often heard of stories of true heinous crimes.

Here Is A Preview Of What You'll Learn...

### **Horrendous crimes**

The stories in this book are accounts of serial killers who committed numerous gruesome murders, many involving children. The number of victims range from two to possibly 146.

**So...dry!**

While this book did contain stories of serial killers of which I had never heard, they were related mostly in bullet points and were actually rather dull. And, really, there wasn't much here you couldn't get from the internet in about thirty seconds, so I can't even give credit for great research.

I must enjoy Travis S. Kennedy's style. In a short time I think I have read all the books but two. This one is much like his others. It is short read. It left me waiting one more story. All of the stories were new to me except maybe one. I think the world is mostly full of great people and then there was these guys that will send chills down the old spine. The most terrifying thing about them seems like how so many were caught by chance.

**Peggy says**

Didn't meet the expectations that I had when I received this book. Very dull.

**Thank you.**

Didn't recognize any of these killers, so was pleasantly surprised. Hope to see more from you. Can't

understand how you become a serial killer but was shocked at the youngest aged killer.

#### **Use your own discretion**

I chose this book because human behaviour/mind and true crime fascinate me -- and no, I am not psychotic, that I can assure. This book contains ten short stories of ten killers, how they killed, their childhood, etc. Each as horrifying as the previous.

### **Amy says**

Nothing really new.
