Dreamer John Dunning

A powerful executive is confronted by a man claiming to be her son

Her name is Dreamer Calhoun. Raised in South Carolina, she grew up dirt poor, married young, and was soon burdened with a child she could not care for. When her old life slipped away, Dreamer moved west, working on an assembly line and taking night classes until she could gain a toehold in business. Two decades later, she is the biggest name in town—a mogul with the world at her feet. But a boy named Bobby is about to drag her back down to earth.

Ever since a newspaper article came out about her long-lost son, young men have been appearing, claiming to be Dreamer's child. But something about Bobby Shields convinces her to listen to his story. He is an odd boy, an impudent drifter who sought Dreamer out on a psychic's advice. She does not want to believe him, but Bobby Shields may have the power to change Dreamer's life forever.
