### Jasmin says

Love Iran and can't wait to go back!

---

### Valters Bondars says

10/10

---

### Diana says

Insomma, contiene pregi e difetti, le solite cartine imprecise e soprattutto i prezzi dei musei indicati per le persone del posto e non per gli stranieri... a meno che negli ultimi due anni non siano triplicati!  
In definitiva comunque ci è stata molto utile e ovviamente l'abbiamo letta, vissuta, imparata a memoria (o quasi!)

---

### Theut says

Soliti pregi e difetti: ottima per la parte pratica, meno per quella storica e culturale. In abbinamento con la Polaris sono perfette!

---

### Xunuo says

I have just come back from my two weeks trip in IRAN. This is the worst lonely planet I have used, and I cannot refrain from making some complaints. This book is abusing the legacy of lonely planet.

- Too much mistaken information. I have encountered a dozen of mistakes during my short trip. For example, this book said Tochal telecabin closed on Mondays, but actually it is Sundays; it said Vank cathedral closed on Friday mornings, but it is Friday afternoons; it said Shiraz to Kerman took 12 hours bus, but it is 8 hours. Indeed, Iran is a changing country for travelers, such as in tickets price, but I checked with local people, many points in this guide have been wrong since 2011.

- There are minor mistakes in editing and grammar, which I have not seen in any other lonely planet guides before. For example, on the same page, Khomeini has two different dates of death: 3 June and 4 June. Much information is only copied and pasted from earlier version, but has not been kept consistent with the latest update.

- USD labeling simply inflates the price of everything. Despite IRR depreciation, many hotels recommended by this guide use the USD price consistent with this book, while inflation in Iran has not been so significant. You can find many low key accommodations and restaurants at much lower price, as long as they are not recommended by lonely planet.

- Its country insight and background information are very fluffy. It does not look into the reality of Iran and

somehow worsen the misunderstanding. Neither have I found any interesting articles and columns as I have found in other lonely country guides. I think Wikipedia and wikitravel work much better. If you are making a trip in Iran, I hope you can exercise some caution in using this book. Also, Iranians are among the most friendly on earth, if you need more accurate information, check with the locals.

### **Pedro Bello says**

Adorei o livro porque adorei a viagem

---

### **Darren says**

Very informative and makes me dream of going to see all the historical places and great museums. I hope I could get a visa and that we don't have a war with them, too.

---

### **Ugtakh says**

This book was very helpful when we traveled there.  
Love this wonderful and ancient country, rich historical and beautiful minded people of Iran. Miss them a lot.

---

### **Paulo Jan says**

What a fantastic country! I visited northwest , north and Central Iran using this book and the informations that it countains were very useful and trustable. Visit Iran!
