## **Mistfall** Olivia Martinez

Mags has lived in hiding most of her life. One of the two last jinn of her kind, she's being hunted by one of the Kings of Hades and the menacing Elf King for her power. When one disastrous date sends her on the run, Mags knows her life will never be the same. The only question is, will she survive it?

## From Reader Review Mistfall for online ebook

### T. says

Excellent story and. Characters' but the punctuation and spelling errors were distracting "and made some an otherwise fun and witty story a rocky read. I loved the book and I dsfinitely want to see what happens;' after the. cLiffhanger ending; but more care needs to bE focused on spelling and proper punctuation. Clean up the editing and I would have given it 5 stars.

---

### Cate Knox says

Read my review at <http://andthentherewasink.wordpress.c...>

Good luck, Olivia, I look forward to seeing what's next from you!

### Bex 'n' Books says

I do love it when I pick up a book with little knowledge and therefore few expectations other than I hope I enjoy it, only to discover that I'm bowled over by the characters and plot.

I immediately enjoyed Mags' character, the protagonist. She is somewhat similar to other heroines of urban fantasy; feisty, ballsy, attractive and overall pretty bad-ass. I have no issues with this at all. That's one of the main reasons why I love female leads in this genre. What Olivia Martinez offers, however, through the creation of her character, is a new type of supe. And a pretty cool one at that!

I foolishly thought that I had the plot figured out, that everything would pan out in a pretty straight forward way. But boy oh boy was I wrong. Olivia Martinez, the clever and crafty author that she is, seriously knocked me for six with her twists and turns. Be prepared there are several. I laughed out loud on several occasions, and was pretty darn shell-shocked at another pinnacle moment in the story. It's been a while since a book led me to tears; this book did that!

The editing could do with a little tlc. Although this was nothing to do with the plot development, I did notice the need for a fine tune. The story, characters and voice overall were successfully crafted and extremely enjoyable.

If you are looking for an urban fantasy with a bad-ass female lead, several twists and turns and with an ending that left me dazed, then Mistfall is a read for you. This is the start of a super series.

Disclosure: This book was provided by the author in exchange for an honest and not necessarily positive review.

### **Kaza says**

Good but not great. The writing was a little choppy. The storyline had a lot of potential though.

There was a big cliffhanger at the end.

---

### **Shelly says**

I really enjoyed this book, it's not your average paranormal/fantasy story, I felt it had a bit more of a grittier and mysterious edge to it, which for me is a good thing. after re-reading I gave it 5\* it really is a fantastic book, also it finished on a cliffhanger so I suspect there will be a second book to follow.

---

### **Dena Maisonett says**

Great characters! The twists and turns of the plot keep you enthralled til the end! Your heart will ache for Mags toward the end but you can also feel her anger and pain as it erupts! Can't wait til the next book to see how her fury erupts and if she can change the prediction of her future to save the world!!!!

---

### **Layla Darnell says**

Reading this book was like entering a crazy dangerous fun filled magical world. The author has surprises around every corner. The story contains tons of adventure as well as sarcastic and witty characters. I was also pleased that it wasn't your typical vampire or werewolf story! You will encounter witches, jinn, elves, the fae, werewolves and more. Tons of fun and more laughter than imaginable. For a debut book I was very impressed and look forward to the next book in this series!

---

### **Diana Jacobsen says**

Mistfall, Olivia Martinez debut novel was terrific. I enjoyed every moment I was reading it. This is truly a story like no other about genies. There is a twist to the norm, there are no magic lamps. This is a magic carpet ride through the life of a genie. With a number of elements from Celtic Mythology it is filled with all kinds of magical creatures from pixies, the Fae, werewolves and even a goddess.

Mags, is a gal to pull no punches. She has extensive powers that are not fully discovered. Pull up a spot on the couch; you will enjoy the ride she will take you on.

---

### **Albert Vidal says**

What a GREAT read! I can't wait for the next one (and the movie).

---

### **Amy says**

I enjoyed this. It was very fantastical with elves, jinn, werewolves & more! It was a different set of characters - but that was really cool. I just really wish the ending wasn't such a cliffhanger - it seemed to stop suddenly. There was quite a few spelling & punctuation errors (sorry that sort of thing jumps out at me - that's the teacher in me). I did really enjoy this though!

### **Ayush says**

The first thought when I found the book was : Hmm, a jinn! Finally a paranormal book NOT based on Vampires, Werewolves, Mermaids or Ghosts, the most common ones in the market. I picked it up and read it, finishing it within 24 hours.

The main female character, Mags, is a perfect heroine, with just the right amount of humor, sarcasm and action filling the pages. The story moves smoothly and you will easily settle down into the pace of the story. The backstory of Mags has been explained in a perfectly appropriate way so that the flow never breaks. The only problem with Mags was that she didn't use her brain much and many revelations could be easily induced by the surrounding events. I mean (view spoiler) That is not what exactly happens but is close enough. The first twenty chapters of the story proceed in this way through Mags narration. But the start of the twenty-first chapter begins to uncover most of the hidden secrets there were throughout the story, in which one I didn't expect and later, the POV switches to Luc and another, and a different type of, jinn Haliz who continue the story after the point where Mags leaves the role of narrator. The last six chapters are the reason this book got four stars from me. The story ends so well that I can barely wait for the next book in the series. If the author makes small changes to the characters, this book has the potential to become one of my favorites of all time.

### **Aria says**

Because it was a paranormal romance set in my home state of Kentucky, I expected to love it. ENH! WRONG! This quickly became a DNF for me. The writing was subpar, failing what could have been a great premise for a story, I couldn't feel the Kentucky vibe from the description of the location, and the characters - don't get me started on how utterly shallow they were. (shudder)

The moment that made me put the book down was when the main character's best friend, the one who has made it possible for her to survive in the world, doesn't believe her when she tells her about the attempted rape and fight she survived the night before. Why, you ask? Because the would-be rapist/attacker was the BFF's boyfriend's buddy, so of course, HE wouldn't do such a thing! Clearly, her traumatized best friend is the one who must be lying, or she just \*misunderstood\* rapist-boy's intentions. (Insert sardonic glare and eyeroll)

Just... NO.

## **Sheila says**

Told in a pleasing voice with great personality and humor, Olivia Martinez's *Mistfall* builds from a premise that's intriguing and thought provoking, whatever (if any) your faith. Earth's gods and monsters keep their distance from earth's inhabitants, but warring parties reveal there's a lot not yet known about the female protagonist, a jinn on the run, unsure of who she can trust. When best-trusted keep darkest secrets, and best-loved might be best-failed, the old phrase "ignorance is bliss" gets turned on its head, as does the protagonist. Ignorance drives men to war, and war is coming to *Mistfall*.

An intriguing story, with strong enough characters to really pull in the reader, this novel draws to a convincing conclusion, leaving the reader wanting to know more. I hope there will be more.

Disclosure: I got this on a deal a while ago and wish I'd read it earlier. Definitely intriguing.
