Eyeshot Taylor Adams

James and Elle Eversman are a young couple travelling through the Mojave desert on their way to a new life. When their car mysteriously breaks down they are stranded in the middle of nowhere without much water and no cell-phone reception.

A mile away a deadly sniper has them in his cross-hairs. They are pinned down behind their broken-down car, surrounded by open ground in all directions. There's nowhere to run and no one to help them. How can they possibly survive?

With relentless tension, razor-sharp prose, and a surprising dose of dark humor, EYESHOT will keep you gripped till its stunning conclusion.

From Reader Review Eyeshot for online ebook

Arwen Davis says

I've been looking for a book recently that really grips me and have been left disappointed before Eyeshot. From start to finish, I was enthralled with this story. While I, admittedly, don't read many thrillers, Adams tag line is highly appropriate...this was the most gripping suspense thriller I've ever read. It is excellent!

Valerie Downs says

I hated it, and I loved it.

It's an understatement to say this is a thriller. I was caught up in it so fast that it was all I could think about. The characters are interesting and real. It causes the readers to wonder what goes on in people's psyche that causes them to deviate so far from the norm. If I need to clarify that I hated it, it's because I think the world has a lot more people out there like this, just under the radar. But we pretend it's not so. I didn't hate the book, but it was quite frightening.

RedemptionDenied says

This was a tense little thriller, about a serial killer, who uses people as target practice. And he's a damn good shooter, too.

A young couple, James and Eileen Eversman, are on their way to start a new life. At least, that's the plan. On their way, they nearly drive into the ass-end of a cop's car, who's vehicle is left in the middle of the road. Deputy Doogie Howser approaches their yellow Rav4, and apologises. He was inspecting a white truck that is left unattended; with its engine running, As they leave, James' notices the initials MPR on the rear bumper sticker of the truck.

When they stop at a Fuel-N-Food to fill up on gas, Elle notices a creepy looking guy in a black jeep, paying them too much attention; especially her. James' gives him the finger, as they leave, and also notices him speaking into a handheld radio. They nickname him: The Soviet Cowboy.

Further on, into their journey, they see someone in the distance, and stop to give him assistance, and this is when their Rav4 breaks down. Another vehicle, with three occupants inside stops; their vehicle has broken down, too. What are the chances of two vehicles breaking down, next to each other? When one of gets shot, it's a fight for survival, from an enemy they cannot see; and they're on his turf. Plus, the only cover they've got is the two vehicles; there's no cell phone reception, and it's blistering hot in the Mojave Desert. Will they be able to turn the odds in their favour? Luckily, James' has got Duct Tape.

In summation: I really enjoyed this book. The tension at times was excruciating, and listening to their inner monologues was amusing. I'll have to check out other books by the author, sometime.

Teresa Collins says

HIGHLY recommend this book. It grabs you from the first few pages and never lets go. The tension continues to mount until you think you aren't going to be able to catch your next breath. Well written, tight with very few typographical errors, it is one of those books that you almost hate to have grab a hold of you because you know you aren't going to be able to do anything else except read until you finish it! The characters are so well fleshed out that you really begin to care about them and can't stop until you find out what happens to them. Can't say enough about how well done the twists and turns are. Surprises hit you right between the eyes at the most unexpected moments. The sub-title is most definitely a true statement. A terrific read.

Sharon says

Why did I bother to read this?

I didn't like this book. Most of the story was about a sadistic man who got his jollies by trapping people with nowhere to run. Then he would shoot and eventually killing them at his leisure. I thought the book was boring but I did finish it to see how the main characters turned out. The fact that the story ended was it's one redeeming quality.

Nicholas Masters says

Wow, what a brilliant debut novel.

Although the book focused on a an event that encompassed only a few hours and a few characters, the suspense build-up was absolutely brilliant.

The flash-back character development was carried out brilliantly, too a point where I was definitely emotionally invested. Not to mention that the ending was played out exceptionally well.

I look forward to your new editions.

Pat says

Nice try, but overdone

Good try at terror, violence and brutality - but a bit overdone, tended to get tiresome. Too much ? Yes

ChopinFC says

4 Stars

Eyeshot really surprised me in more ways than I expected. The writing was edgy there was a crescendo suspenseful thriller that started in the beginning of the book and didn't let up until the very end! For those looking for a quick read and an entertaining thriller I highly recommend this book. Full RTC.

Lynn Mccarthy says

With this book I was sucked into the story immediately and it never let me go till i had finished the book. James and Ellie travel to a new home but before they can get there they are attacked by a sniper out in desert with no place to hide. Another group of people comes along and is also caught in the same trap (that makes 5) but how many will get out if any?. You will have to read this book to see you will not be disappointed.

A thrilling book I just devoured it.

I think this book would make a great Movie.

Thank you netgalley

Sean Peters says

Marketed as " The Most Gripping Suspense Thriller You Will Ever Read" ... Is this True...That Is the Question !!

Exciting, fast paced, suspensful thriller, with a action packed plot, with some added humour, although a little far fetched story and a little heavy on the background stories.

This a a difficult book to rate as had some great fast paced action, but then sometimes ruined by slow background stories.

Although the main characters were very good, especially James and Elle Eversman who are a young couple travelling through the Mojave desert on their way to a new life.

When their car mysteriously breaks down they are stranded in the middle of nowhere without much water and no cell-phone reception in the boiling heat with a marksman/sniper a mile away.

The action never stops, with this very different story which plays like a low budget action thriller film in a good way.

A great debut author, but a four star for the action and pace, but loosing a star to the slightly far fetched elements, and slower background stories.

But saying all the above I couldn't put the book down, the survival of the fittest !

Jon Gregory says

Difficult to review this without sounding like all the other 5 star reviewers, however, I simply couldn't put it down. The story slowly builds for the first 20-30 pages, then takes off, gets inside you and doesn't let go. I constantly had to stop myself and look at his writing to see how he could pull this off - it's simply a fast, slick story that doesn't waste a word. At no time did I see a sentence or turn of phrase that stopped the flow of the story.

This is no airport Jack Reacher paperback with all the predictable obstacles; this has depth, comedy, rising tension, twists and thoughtful dialogue. The synopsis tells you all you need to know about the storyline, Adams takes it from there and leads you through the plot with never a doubt as to how he wants you to react - with complete shock at how words on a page can change your heart rate so quickly. Looking forward to more from him, and for you suspense writers out there...the bar has been raised.

Michelle says

Eyeshot seriously has to be one of the best and most riveting books that I have read in a long time. It kept me on the edge of my seat from the word go and I found it practically impossible to put down.

This book would make an excellent movie in my opinion. It was amazing how the author managed to make such a thrilling read that stayed interesting in a situation where the scenery and characters didn't change for over 95% of the book.

To be honest, there were some developments in the plot that were a bit eyebrow raising and kind of far-fetched but to me that's the whole point of reading sometimes, to escape from reality and be entertained by a book. None of these developments took away from the flow of the story in any way and just made you want to keep turning the pages even more to see what could possibly happen next.

I really felt for the main characters, James and Elle, and found myself quite emotionally invested in their wellbeing by the end of the book. They were a very likeable and believable couple and after I finished reading this book I found myself stopping and wondering what would I do if my husband and I were ever faced with a similar situation.

If you are a fan of a good thriller that pulls no punches and moves at a rapid pace, I totally recommend giving this book a go.

Marian Phair says

This is one of the most gripping, fast-paced books I have read in a long time. This author will have you on the edge of your seat from the get-go. I couldn't put it down...I didn't put it down until the end. I highly recommend this book, and will be purchasing more of his works. I have added him to my 'Favourite Author' list.

Dawn Allen says

Eyeshot is Speed on steroids. It's been a while since I had a book grab me by the throat increasing pressure with each page but this one did. Lock your doors and windows and only read in daylight.
