A funny duo in characters, sci fi, first time reading from this author, I enjoyed the book.

I won this book through Goodreads.

I plodded along with this high school freshman boy's nerd fantasy of a science fiction/car love dream as long as I could stomach it. But when a character turns to another character and tells her she has to leave a negotiation meeting because it's militarily MEN only, I quit.

Mr. Cohen, grow up.

Please read my notes if you want to know more.

I received this book free from Goodreads in exchange for an honest review.

Alan says

Ok story. Had trouble initially getting into the book. Have the sequel and hope it works better for me.

What a delightful sci-fi adventure! I adored this fun, slightly silly and sincerely relatable story. Bob was funny and real and Saabrina was bright and interesting. I loved that the lead pair was a middle aged dad and an AI car. Really can't say enough good things about this book. Excellent for the rest of this series, will definitely be reading it!

If you enjoy happy science fiction, with a funny dad and snappy female duo as the leads, you'll adore this book. Highly recommend! I received this book for free through Goodreads Giveaways. My opinions are my own.
