She Said: He Said Kerry Taylor

She Said it was a packed filled day on the tube. Normally, I am a sandwich or under some guy's sweaty armpit. This particular day I was under Justin's masculine armpit. I spent the tube journey inhaling his masculine ora and I was hooked, when he gave me his card I did not think twice about calling him. I asked him out to coffee, he asked for us to go for a shag which lead to us permanently shagging by living together, so when I took it to the ultimate level and requested his hand in marriage . He said it was too much and moved out !

He Said I like her we got together not sure when. She started getting demanding asking me to marry her, the next thing will be kids. It got too much for me, what a fool, Mel was the best girl I have been with ever !

Will she take me back ?

Find out in this romantic comedy which proves Men are from Mars and Women are from Venus.

A good book, it was nice to hear both sides of the story. It's a fast-paced romance between two people who accidentally met on the tube. It kind of reminds me of "you'll find love when you least expect it".

It begins with a very passionate relationship but they hardly know a thing about each other. She only starts asking him questions when her friends start enquiring about him. This only makes her more curious about the bloke who gives amazing sex and cooks amazing meals (bonus!). It's like reading a real story about someones relationship, this really could happen in real life.

This is actually a short story, it's only 42 pages long, but Taylor manages to pack so much into the story that it feels a lot longer (just the way I like it!). Taylor proves that even a short-story can be very entertaining and fulfilling to the reader, which is even more so because it's so life-like.

Although her side of the story was a lot longer than his (which isn't really that surprising, ha ha), the ending was still quite satisfactory. It still felt like the book was completed nicely.

You can totally understand where she's coming from, being together with a bloke for a few years and then wondering when it'll become something more... after all, they're already living together. I think every girl wonders this from one time to another when they've been in a relationship for a while.

All in all, a good story. It's entertaining and fast-paced. If you like hot romance stories then this is the book for you.

I enjoyed this book thought it was interesting and felt that most likely things do go down this way sometimes. I know of couples that just have benefits without dating so I found that to be realistic. I enjoyed the humor this book gave. I did feel the ending was rushed and need some more closure.

I can't say I blamed Anne for how she felt and it was time to call him on it if she wanted to get married. I myself would have moved on and found someone who wanted what I did. Some many times when you do the calling out things do not work out the way you hope and you are left alone. Not saying that is what happens here but a few times it works out and is worth it again not saying that is what happens.

I found the characters to be fun loving with humor. I felt this story could have been made longer which doesn't mean it wasn't a good read it would have just made it better to have more information and closure.

I do love the humor Kerry puts in her books and her plots are always interesting. I did like this book but not as much as I have her other work. I do feel that Anne has a lot of growing up to do and as for Justin he was an okay guy who I felt was up front from the start. He did grow up and learn what was important in the end.

I do look forward to reading more of Kerry work, I think with time and each book she writes she will grow more as an author and each book will get better then the last.
