Engrossing medical mystery that will keep you guessing and open your eyes to the dark side of our health care industry. We have little choice but to rely on the humanity of our health care professionals. This behind-the-scenes tale reveals the way the complicated politics between administrators, physicians, labs, pharmacies, insurance companies obscure the truth about a young woman's death.

Judy says

Excellent.

Karla says

This is an excellent whodunit. Long after you finish the last page, the characters stay with you (and the memorable cast of characters includes the place itself – Fargo). The author's rich imagery and thoughtful plot make this book difficult to put down. I'd highly recommend Deadly Benefits and I'm looking forward to Pitts' next book.

Not a bad story. Some of the references to local Fargo culture won't be relatable to the outside world, but I thought they were interesting. Same with the medical references. I started liking some of the characters, so that is good. I think I will try to read Placebo.

If you are looking for a wonderful read, with interesting characters, unique settings, and medical intrigue, this is it. From the title to the close, Pitts takes the reader through a carefully chartered course of healthcare's high seas. Pitts is a talented writer, and I look forward to Placebo!

Janed says

Enjoyable mystery that will keep you guessing. The author really knows hospital politics. The characters are realistic and interesting. A great read.

"Deadly Benefits" was a good read: plenty of suspense, interesting and well-planned plot, great characters, good local color (Fargo), timely themes, and a dash of Finnish culture. I recommend it! I got to meet the author, Ryn Pitts, at a book club tonight and really enjoyed her insights into the writing process.

A medical murder mystery. Takes place in a hospital and pharmacy. A young woman dies who should have gotten better. When the doctor, the pharmacist and the hospital are threatened with being sued lawyers are brought in and investigation begins.

The book is written by a Fargo woman who was a pharmacist retired to write. It's a very "local" book with recognizable stores and sites. It was fun to read it because of that. But it read like a medical record and I think it will be difficult, even boring, for people who have no medical background. Her plot is clever but some of her characters are not well defined. Lots of holes. I'm glad I read it and look forward to her next book.

WOW! Finished reading DEADLY SINS by Ryn Pitts...I had a hard time putting this book down. Have to admit that I read the Epilog and wasn't so sure about the book....only to find that I didn't think the Epilog had much to do with the book??? But, I could have easily missed something there...This author is from Fargo, ND, and has had careers in pharmacy, health administration and insurance...and then I find out she is a quilter on top of all of that (but the book didn't refer to any quilting :)) I think this would be a good Book Club read....lots of twists and turns until the end. Just to show how good it really was....finished the last 100 pages (of 337) in 2 hours on a Friday night :) Can't wait for her next book "Placebo".

Pauline says

Placebo, her next novel, would benefit from a better editor. Not enough mistakes to get in the way unless you are persnickety.

This has a lot of health care lingo but is a great read. There are many twists and turns. some of the descriptions of Fargo are very real and i could picture where the author was thinking about. This is the first time i have known an author of a mystery book that i have read, that adds a new perspective.
