I had been hearing great things about this Bible study for years, as had a friend of mine. So she bought the CD, and 3 of us did the study together. As with other Moore studies, this one works best if you use the video and the workbook of daily lessons.

It's a 12-week study, one for each chapter in the book of Daniel. The first half of the study (covers well-known stories like the lion's den and the fiery furnace) was best, in my opinion. Moore effectively pulls out the theme of living above our culture, a culture that tells you to put yourself and your interests first. We are called to more important things than self-serving.

The second half was interesting and thought-provoking. It deals with the eye-opening prophetic chapters of Daniel: some that are now history (eg, Alexander the Great and other rulers -- prophecied in amazing detail) -- plus the coming of the Messiah) and some that are still in the future (end times prophecies). Moore explains her stance ("dispensational premillennialism") but is careful to remind participants that there are many different views. She urges her viewers to read commentaries to help them form their own opinions, which I appreciate.

I was raised amillennialist (don't take any of these prophecies literally; don't spend much time trying to make sense of end time prophecies because this knowledge is closed to humans). So I was very interested in learning other, more literal interpretations and the evidence for them (though it's clearly not her aim to promote her view -- I'll need to find another book that compares and contrasts in detail). Moore's dispensational premillennialism is defined as the view that "Israel and the church as two separate peoples of God, the rapture of the church before the great tribulation, and God fulfilling His promises to Israel through the 1000-year earthly reign of Christ." Easier to understand in the context of the study. But appealing because it gives a merciful second chance to God's special people: my sweet Jewish friends.

I really like Beth Moore and her studies. In this study, I often wished she wouldn't call her audience "girls" and repeat how hard the lessons are and how proud of us she is for thinking and working so hard -- it made me cringe; seemed a bit demeaning to her (obvious) intelligence and ours. BUT she does it such Southern charm and sincerity and humor that I can't help but like her anyway. And she has appeal to a broad audience, so lots of women must like that approach. Anyway, I would definitely do other studies by her.

This is an excellent study to help you get into the book of Daniel and finally understand the dreams and revelations held within. Throughout the course of the study I was amazed at how much I had missed in my own study of the book. This study, though extremely sugary at times, is an empowering revelation of itself as you begin to see the similarities between modern culture and Daniel's Babylon. Insanely good. Highly recommend.

Second study by Beth Moore, I have to say this is not your usual bedtime Daniel not being eaten in the lion's den story. It definitely showed the real side to the Daniel story, a really great Bible study. I especially loved the prophetic side to the study where we got a timeline of Church Age and the Anti-Christ. Really compelling stuff. However, brace yourself this study will take a lot of commitment, and research, you have to commitment to learn. Nice one Beth Moore.

This was a very good work book to go through but... Its just not something you can do once. HOnestly this needs to be read two or three times to really grasp the history and the prophecy part fully. She does a great job with the info and her real life applications are excellent also. But for me, the material is just to complex to go over in 12 weeks and say "Yep, now I understand Daniel!" BOttom line though is that its another excellent study worth doing..twice even:)

I throughly enjoyed this study on Daniel. It is an intense study and did require a time commitment, it is well worth it. I didn't realize just how much the Babylonian mindset has seeped in not in our culture but into our churches as well. In this study I'll take away just how important it is to a woman of integrity and to be discerning.

I want to be a Daniel!

This is an amazing study of the Book of Daniel. It is amazing how Babylon is such a reflection of our current society. The first half focusses on Daniel and how he lived a life of integrity and purpose....the second half deals with eschatology (okay I murdered that spelling) and end time events. I don't have a strong background in this, but this study definitely gave me some insight into difficult-to-understand scripture.

I am so excited to do this study. I bought the workbook with birthday money in March, and then the DVD's at church went missing. Well, now they have been found and I can't wait to get started. I am excited about what God has to teach me in the book of Daniel.

William ended up joining me in the study. It was a refreshing time together in God's word. I really enjoyed diving into this book that has seemed so elusive in the past. I am slightly hesitant to leave it, and I am going through each chapter one last time, just taking a day to review. The daily homework didn't seem as intensive

as I hoped, and at times she can be hokey--but that fluffy encouragement at the beginning of each chapter must be for someone.

We are living in a babylon, and we do need to learn to be Daniels in the middle of it. A couple things that really struck me--

1-Friendly captivity is dangerous, like the lobster in the pot we begin comfortable and get cooked (my own metaphor)

2-In the fiery furnace, the only thing that burned was the ropes--there was no smell of fire on them (complete deliverance). Beth made the application that sometimes God allows us to go into the furnace in order to free us from longstanding sin or bondage in our lives.

3- Finally, I was interested in the concept of their being both a near (it has already been lived out) and a far fulfillment to some of Daniel's prophecies. I really believe that is how scripture plays itself out, all throughout the bible, stories point to Jesus, and it is the same with the end. God gives us many layers of understanding.

It was fun to read this at the same time as my pastor preached through the book of Revelations. The eschatology is exciting, but it is also applicable here and now.

I would love to read more about this topic from other viewpoints. Does anyone have any suggestions?

This is an intense study and was many firsts for me. I've never done a study by Beth Moore before me and she definitely has her own teaching style that you either enjoy or get turned off by. She did grow on me throughout the twelve weeks though. It also is a study to learn about Daniel and his prophecy, not necessarily find your story in the Bible. Many stories can be related and applied to today, but Beth reminds us multiple times during the study that there is also value in understanding the story being recounted. It is a powerful study that can be life changing, but I definitely think I need to do it again and again and again to understand what's happening.

One of my favorite Bible studies! I learned so much about the Old Testament by doing this study. I love the way that Beth Moore sets up her lessons-she gives word studies (in Hebrew) as well as historical background, and then helps you to apply the lesson to the rest of the Bible as well as your life. I hope to do all of her studies someday--she is such a gifted Bible teacher!

I asked my Mom for tips in facilitating this study and this is what she said:

Hints: discipline and accountability. This one is a tougher study, because it is historical, detailed and not just a fill in the blanks. The daily study can take up to 45 min. a day. So be prepared and start praying now that God will begin to prepare all your schedules to allow you the discipline. It will be well worth it. God's Word is not only going to come alive, it is going to show God's sovereignty. Start praying now for God to prepare your heart, mind, and schedule, so that in the end, you will not only Know Him, you will also Believe Him. It is a wonderful study that shows God's Word back then, but how it is very appropriate to especially today. My biggest suggestion would be to pray, pray, pray and then get some others to pray along side for you as you go through the study.

Love Mom.

P.S. I will be happy to pray along side you.

We're reading this book for a small group at church. I can already tell that I really, really don't like the way this lady writes her Bible studies. What with the "precious one"s and the "beloved"s scattered throughout the text, I also have sentences like this to look forward to:

"By the way, have I told you recently how thankful I am for the privilege to study God's Word with you? Getting to love and seek Him by your side is one of the greatest joys in life to me."

Lady, I've never met you. So we're not really "side by side" as you've already done this study (because, hey, you wrote it!) and I'm watching VIDEOS of you, not you in person.

It's just so cheesy. No matter how good this study is, sentences like that are always going to make me flinch. (And scoff, and read them aloud to anyone sitting nearby.)

My favorite of Beth Moore. Intense study on Integrity, Accountability, Discipline, Prophecy and End Times. She opens our eyes to how we live in today's Babylon, with so much distraction keeping us from daily seeking God. I did this as a summer study with my mom (a new believer) and a group of women from church. We purchased the video's and Mom did it on vacation and we went over the study on the phone! 2 main themes, in this 2 part study. 1) Integrity, accountability and discipline, how not to get sucked into living in today's Babylon. (Amazing). 2) Prophecy and Eschatology. (the end times, Christ's return) She gives Many points of view from other scholars and leaves you to make up your own mind. The more you put into this study the more you are Blessed!

Great study when used with the video. Not sure how it would work without it.

Loved this. I want a faith like his.....

I can't give a fair rating on this study guide. I did this with a group of girls and we attempted to complete this book without watching the DVDs that should accompany it. If you are interested in this book, I would highly recommend looking into the DVDs. I feel like it would've had much more depth and insight if I had been able to view the six DVDs that can be purchased to go along with this book.
