Golden Angel, Unwilling Sex Slave 4: The Auction Claire Thompson

Fourth in the Bestselling Saga! Laura appears to have become a willing sex slave, obedient to every sexual demand, submissive to every humiliating punishment. Chosen ahead of her peers for auction, Laura must face the final challenge of her captivity--placed on the slave block to be purchased by the highest bidder. Little does she know the auction is rigged from the outset, most decidedly not in her favor- Cover Art: Ello

Mariana Bezerra says

This novella was more intense than the previous, because we can see Laura suffering in the hands of several mans and even a woman, but only during one night. It's really strange seeing how she could actually survive all those things, cane, dildo and several spankings.

She had sex with four man and had to satisfy a woman, after losing blood in a extreme caning session, plus a strip and some very nasty things. Her life is really messed up right now.

She became a different person since the begin of her kidnapping just to survive and to find a way to escape, but this night was a nightmare and she ended up being sold to a woman we serious troubles. Her life is really in a cliff and there's not much she can do to actually make things work.
