In this DixieChix story we are introduced to Alexa, a shy young woman that in her past has been abused by her uncles, making her attitude towards men and life in general a fearful one. She prefers to blend in the crowd then to stand out.

Working and living with her friends and sister has been good to win the feeling of being bruised but she still has a long way to go.

Brad and Michael are true military men, hard and dominating, alpha to the core, they are still in service and are used to count on each other.

When they realize that this DixieChix can become more important than anything in their lives, they wonder if this can make them heal from the nightmares of the war.

But first they have to convince Alexa that they can fulfill her heart and not hurt her, that they are worthy of her trust and love.

When a menace comes their way and takes Alexa into his evil, can they save her in time and keep the forever after in their hearts ?

I enjoyed this book in the same measure as I enjoyed the other ones, between the romance and the action, everything was balanced and into proportion.

M. Dwyer has the ability to write and picture in her books the perfect picture of the small town ambiance that I came so much to appreciate in the small town romances, with tradition and modernity coming hand in hand.

The plot line was believable enough. Nothing more normal for a military man to go undercover, and their fellow mates to come to the rescue.

Nothing more normal to screw with the bad guy and he will most likely come after you.

My emotions ran free on this one, innocence with trust and hot love in bed is always good for a good read, at least for me.

Alexa was the perfect innocent, sweet girl, with her hesitations and fears. A very true character in the sense of the story.

Now Brad and Michael are another story. The motto feel nothing, see nothing, say nothing is known to you ? Well it is applicable to these two. The way that they change throughout the story and the track that they follow with Alexa is a heart worming change in the book.

Nothing complicated to tell you that reading this series is a good "waste of time" for me, if you haven't already picked it up, what are you waiting for ?

I'm so happy when I discovered this series. The stories of each lady in Delite are really different. I like the way the author portraits the characters. I will recommend this series ...

Her double delite is book three in this series but I enjoyed this book the most so far, which surprised me as although there was danger in this storyline, there wasn't a lot of it in my opinion. Although all of Dixie's

storylines are more or less nearly the same, I enjoyed the slight change up in "her double delite warriors". From start to end, the storyline kept my attention.

After a horrific past full of abuse, Alexa and her sister Sally are now safe, thanks to their cousin Susannah. Alexa can help but hide herself away; after all she is still scared and wary of men. Michael and his brother Chad are not used to showing their feelings, they are tough and a lot of the time, cold hearted. But they both can't help but want Alexa. But every time they try to approach her, or make conversation she runs off. After she her useless heap of a car breaks down during a thunderstorm, Michael is the one to come to her rescue. After a while they finally convince Alexa to date them, and they soon grow closer, but the closer they become, the closer the danger moves toward them. When Alexa is injured and kidnapped, will Chad and Michael be able to rescue her in time?

I thought this story was the best of the series so far. I liked all the characters. The only thing I had a problem with was that the night the guys had sex for the first time with virginal Alexia, they screwed her about 6 times each. Seriously? Wouldn't she be so sore she wouldn't even be able to walk? lol

It seems things in the series are heating up! This is Alexa's story with her two sexy military bikers Michael and Chad.

In this story the guys have help Alexa overcome fears from her past. Then a figurer from their top secret military job is a threat to her.

The story flowed nicely and I loved the mixing in of the other girls stories. The narratives have become much cleared and easier to follow.

It took awhile for the main trio to get steamy but when they do watch out it is hot and heavy! There is a bathroom scene that is super sexy! There is also a bit of steamy action between past couples that burns up the pages in the beginning!

I am really liking this series and can not wait for the next book. I really love the hints for the other girls stories that are mixed into each book. It helps keep you salivating for the next story!

The best one yet. This is a great series and as far as I'm concerned you can't go wrong with any of Dixie Lynn Dwyer's novels.

I really liked this story. Alexa is one of the most scared in the group of women that own Dixie chix. Michael and Chad had to really work to start a relationship and eventually fall in love. My only problem with this book was the first time they had sex. Alexa was a virgin and they had sex all night. She wouldn't have been able to walk never mind sit down. Anyway good action and great HEA.
