More and more fun! Poor Mr. Boddy though, he tries to share his wealth with his friends, but they're all so greedy.

It's still so entertaining though, even though I feel so bad for Mr. Boddy, I live for the entertainment. Even though a lot of his stuff gets ruined, or stolen.

No hard feelings though, right?

They always get what's coming to them.

I got stumped on a few, but most of them were so much fun to figure out.

One of my favorite solve the mystery books.

This is a YA book by Scholastic based on the board game clue. Every chapter is a small mini-mystery and you have to figure out who did it.

This book got old fast when I read a few chapters by myself. However, once I read them out loud to my 12 year old son and we worked on figuring out each one together, it was fun.

The characters are fun and entertaining throughout the book. There is tons of humor that kept me thoroughly entertained as a child. I love whodunit books and trying to figure out the various mysteries and this collection of tales certainly doesn't disappoint.
