I have just received this book as a reward from the Goodreads giveaway and I am excited!

Andreia Gomes has created a wonderful resource for a beginning weaver. In the introduction she describes her inspiration and process for becoming an artisan in the craft of weaving. She states " This book is meant for everyone who wants to learn the fascinating art of weaving in a simple, fun, and modern way." This book accomplishes her goal.

As in any how to book, Andreia Gomes describes the materials, tools, and types of fibers you will be using. She then describes a variety of weaving techniques. Text is supported by clear photographs to 'demonstrate' the process. The reader is shown how to warp the loom, create a tabby weave, and then a variety of techniques to create different artistic results for weaving. The book continues with descriptions for a variety of projects. Each project begins with author comments about the project, lists needed materials, project size, difficulty level, and instructions supported by wonderful visuals.

The variety of projects contained in this book will support the interests of many beginning weavers. Andreia Gomes shares instructions for wall hangings, woven jewelry, and household decor items. I am inspired by the variety of looms she has included- one rectangular loom self-made, purchased looms, looms created by items found in nature- tree branches and driftwood board, and a circular loom. Creating with a variety of looms and a variety of fibers opens the field wide for artistic expression and creation.

This book is an excellent resource for someone interested in learning how to create craft using little loom weaving.
