Jacqueline Nalbandyan says

Absolutely fascinating, even though unfinished.

Alice Bailey narrates through the lens of the observing objective awareness her life path and strives to give the reader a clear vision of the Victorian era with its definite peculiarities. She is devoted to a clear use of language which is appreciated in a postmodern realm. Her spiritual journey is very much a natural development of inherent impulses toward the truth of the world and of the necessity for clarity which oftentimes makes for situations that may appear unlikely; her observations are fun to read, she confesses to having the ability to laugh at anything in the most detached manner possible, which points to a mind that is ever alert and a predisposition to perception which is unbiased, more so, extrasensory, yet perfectly adapted to all of the challenges of a public or/and a society that are torn by the world wars.

Sherry says

Probably the most interesting to me because I learned a lot about Alice Bailey. She intrigues me because she has intuited all this interesting esoteric wisdom that she credits to "the Tibetan." My bias wonders if she would have been given any credit if she had just written it as her own. Esoteric knowledge at the time she wrote was a man's world.

Insight into the human identification of AAB

I have followed the teachings Alice Bailey brought to the world for 50 years, I found this book to be very inspiring as to what I took for this great teacher to fulfill her purpose to serve the Masters.

I was very grateful she took the time to share her story so we might see what it takes to serve,

Joan says

Alice Bailey had three daughters and grew up wealthy in England, was a Missionary for the Church of England in India, and at the age of 15 was visited by the Tibetan to begin her life's journey. She ended up in a bad marriage in USA and left that to meet Foster Bailey and the rest is her story.

Roger Buck says

How devoted I was to this author all those years ago at Findhorn ... Provided almost the entire meaning of my life there.

Fortunately, *Meditations on the Tarot* saved my soul <http://corjesusacratisimum.org/2009/...>

For here I found an esotericism which was neither de-personalising, nor de-humanising ...

Nancy Davison says

Alice A. Bailey wrote over twenty books of esoteric philosophy, in collaboration with a Tibetan Master, over a period of more than two decades. This is her story.
