I myself can't believe the situations the Howard siblings get caught up in but the plot is thickening and so far they are holding down the isle with their vampire William. Relations between the characters are starting to heat up too can't wait until the next book

Megan Sheffield says

awesome book. read the whole thing in one sitting. my favorite book of the series so far.

Barbara says

This second book in the series is even better than the first one. I loved how Melinda can't decide between Riley and William. I loved learning more about Charlie and how he handleiding his wolf. I think lots of things happened in this book that kept me reading. I'm very excited to read the next book, because I can't wait to see what happens between Melinda and William and Riley, but I'm also very curious about what's going to happen between Eva and Charlie.

Crystal says

so far these books are just ok...quick light read...

Shelly Burrows says

I'm really digging this series, granted it was off to a rocky start since the author changed names and titles. I actually had to do a bit of looking to find the new titles etc.

Oh what a tangled web she weaves. Eva is a devious creature. Such twists and turns in this book. It seems like there will be more to come.

I actually did enjoy this book. It took me a while to get the book though. Apparently, the author couldn't make up her mind what to call any of the books in this series. Book 1 has 4 different titles and this one has three. It made my head spin when I saw one title but clicked on the Amazon link and saw another one. Oh and if you look at the editions of the book, there are more titles all for the same book. Once I got past the confusion stage, I finally got a copy of the book.

If you like paranormal books, then you will enjoy this one. You have witches, vampires, werewolves and even a guardian. The story line is enjoyable and moves at a pretty fast pace. Will I read the next book in the series? Now that I know that each book has several titles, I think it will take me less time to find the next one.

I debated and finally gave in and bought this book... I was skeered it would be a let down... it would ruin what I loved about the characters... but what it did was ingrain the love I have for these characters deeper and more meaningful. I mean to tell you this author has the talent to weave a story and pull you in until you gasp for air as your there in the woods with the Howards. I cried for a character I knew briefly but the talent this author has to make me feel. Awesome!!

The older brother Charlie has grown already into something I surely want to witness. Then Michael and Emily will surely get married soon. Now Melinda has had the encounter with the dark haired mystery guy and I must see what happens with that too. I was skeered he may have been the Alpha, I am glad he isn't and sorry I can't tell you who is....

William ... I feel there is more we will see from him, waiting on his character growth to begin.

I have questions I want to know more and yet I'm skeered of being let down as so many authors tend to do.

What is to become of Eva and her father?

Melinda and the mystery guy.... and why did his brother want to move there?

Charlie ? William? Mack ?

So many questions ...

This series is amazing and I can't get enough! There are only two more out, so I need to slow down and pace myself, cliff hangers at the end.....
