Scott Hyde says

I was so torn while reading this book. I couldn't tell if it was fiction or non-fiction. The drama was almost unbearable at times, riveting and engrossing. Then there were times when an Ambien would have kept me awake trying to turn the pages. Overall...the ending really made the book.

Huhu...nostalgiku! Gw inget nih pas akhir2 SD ampe awal2 SMP doyan banget baca nih ensiklopedia. Tapi ini sih koleksi Babe gw sih dan edisinya juga udah jadul...kalo ngga salah edisi 1982. Waktu itu, gw paling suka baca tentan sejarah negara sama tentang tokoh. Iseng juga yak....

My dad bought a set of these when I was 14 or 15, and I often got jacked up on caffeine and read some of the 'macropedia' (long version article half of the set). [The micropedia is pretty much your standard encyclopedia- short entries on everything from Aardvarks to Zymurgy] The macropedia has some great articles on just about anything. There is also an index to learning in the front that puts everything in a comprehensive manner--Essentially, if you can't get into a fancy private university or two, or if your parents are those dowdy homeschooler types, this encyclopedia can function as a virtually endless education (without the degree).

Works well in conjunction with the Great Books of the Western World series.

Dale Harrah says

I love these. I bought the set as a graduation present for myself. And of course I haven't read it all.

John says

A bit long, but very comprehensive.

Encyclopaedia Britannica Inc. (2010) The encyclopaedia britannica

ISBN-10: 1593398379. \$3,550

Content/Scope: One cannot get much broader a scope than this set of encyclopaedia's, and its scope includes all historical times, up to 2010. The company has ceased to print volumes, they will only be digital copies from now on.

Accuracy/Authority: Encyclopaedia Britannica is a world-renowned publisher of encyclopaedias and, as such, is consistently accurate and very authoritative.

Arrangement/Presentation: Alphabetically arranged, in separate volumes. Visually satisfying and very thorough.

Rationale: A good print reference collection should have an up-to-date encyclopaedia set, and this is the most current edition from E. B. that I could find available.

Call me crazy, but one day I want to read the whole thing.

Kristina UK says

as a kid i would sit and read Encyclopaedia Britannica. I would pick an article and hop to another one mentioned in it and see how long a chain i could make from the original starting point!

A set of these plus some other related books appeared in our house some time in the mid-fifties and stayed with the family until the 90's. They didn't get much use after the 60's but I used them a lot in my schoolwork. Mostly I just copied reports verbatim. Didn't seem to bother the teachers any. "Cobalt" and "John Cabot" come to mind. There must have been others. Date read is approximate.
