Suave Man Blues T.D. Mulhern

Suave Man Blues is a transgressive fiction novel that follows the gradual self-destruction of one man. After losing his dead-end job and his woman, the main character's alcoholic tendencies lead him to dark places, both mentally and physically, as he travels around the western regions of the United States. Using the raw, sarcastic, over-opinionated and self-loathing views of the narrator, Suave Man Blues takes you unsparingly through the alcoholic mind while showing you the dirtier side of this great country we call America.

Susan Walker says

This is a bit of a dark story. The male lead character loses his job, woman and his interest in life. You follow him on his travels and keep hoping his life gets better.

Jess says

Was referred to this book-- the beginning draws you in but by the middle and end it seems to drop off. I did enjoy the authors short stories on his site especially Frank & Priscilla
