The Twelve Coins Trevor J. Brunsink

Upon a distant magical island, seven animal races have taken on human characteristics-sheep, goats, llamas, horses, eagles, wolves, and snakes. Medieval kingdoms have been built and alliances formed. Prince Angor, raised by the evil king, desires justice. However, his plan leads him down a road that he never quite imagined. To make things right, he must journey across Choice Island and back again to find twelve gold coins-or, rather, for the coins to find him, based upon the purity of his motive to love in the midst of unexpected circumstances. Will he gather and return the twelve coins to Sheep Kingdom in time to face his destiny, or will he be overcome in the island's untamed wild?

Nicole says

There are so many genre's in The Twelve Coins, that's one reason I loved it. Fantasy, Drama, Adventure, Thriller, Comedy, and best of all Enlightening.

So at first I thought it was going to be more of a children's book because it is set on Choice Island where animals live like humans. The more I read it the more I came to realize that it's not a light read and no one under 13 should read this.

There is violence and betrayal at the beginning, which turns to realization, caring, and safety. This story is kind of like a roller coaster, it brings you down to a darker place then lifts you up to a sense of understanding and love.

The writing was excellent, I learned a few words and new ways to use common words. The characters were so well developed, my favorite character was Zee.

If this became a movie I could imagine it like the animals in Narnia or Beowulf.

I would love to say more, but I don't want to spoil things for anyone.

IF you haven't already, read this now, you won't regret it.

Barbara White says

Love conquers all. What a wonderful story. The characters are great. This is a book for all who cheer for the underdog. Thanks to Goodreads First Reads for a copy of The Twelve Coins. I look forward to Trevor's next book.
