The Celtic Rebel (Richard) says

This was Dominick Dunne's first novel in 1982, and it was a sequel to Joyce Haber's *The Users*. I chose to read it because I like Dunne but I also read *The Users* and wanted to see how Dunne picked up the storyline.

I enjoyed Dunne's book much more than I did *The Users* but was disappointed in that only a few characters from *The Users* were used or mentioned. The ones that I really wanted to know more about weren't even mentioned or only mentioned by name.

I loved the pace in which Dunne wrote here. It was easy to read and didn't bog down. My only problem with the writing was some repetitiveness in things. For instance, every time he mentioned Mona Berg's secretary Bill, he didn't simply refer to him as Bill, it was constantly thrown in that he was Mona's secretary Bill.

The characters in the book were interesting and well developed, but not many of them likable at all.

Overall an entertaining read.

Not my usual genre. Chose it because of Mr. Dunne's recent death. Had to start with this one since it was his first book. I finished it, but I called it trash whenever anyone asked me what I was reading. Hollywood climbers using one another to get what they want. Predictable. Abrupt ending.

A QUOTE ABOUT DOMINICK DUNNE:

"Dominick Dunne is the best chronicler of American Society since Truman Capote. He is the only person writing about high society from inside the aquarium" -Tina Brown, "Vanity Fair"
