**Hunter** Emmy Chandler

*“He wants her released into the enclosure. He wants to hunt her.”*

Recaptured during her escape from zone four, Maci Bishop wakes up in the mysterious, heavily fortified zone two, where wealthy citizens come to sate sordid, homicidal appetites by hunting death row inmates in a wooded enclosure. Live on camera, for spectators watching from the Resort.

Maci is rented as a plaything for a guest at the Resort, but when she kills her first customer in self-defense, her life sentence quickly becomes a death sentence. To teach the other women a lesson, the warden throws Maci into the enclosure, to be hunted alongside a vicious death row inmate named Callum.

Though at first he believes the beautiful, half-naked woman is bait intended to lure him out, Callum saves Maci from a brutal death. As they fight their way through the enclosure, taking on hunters, guards, and ruthless robotic hounds, he falls hard for the tiny, clever hellcat and discovers she may just have the skills to get them both out of the enclosure alive.

But Maci won't abandon the other women to pay for her escape. Not again. She won't be satisfied until she shuts down the entire Resort: clients, guards, hounds, and all. And there's no way in hell Callum will let her walk into the lion's den alone...

## phoebess says

*Hunter* had a different vibe than the previous book. I truly enjoyed how Maci was fighting the Big Brother. And even though Callum played mostly second fiddle, it didn't take long for me to start rooting for him.

---

## Gemma says

I absolutely love this series, can't wait for the next book

---

## kookyquinn says

I really loved the characters. Maci wasn't annoying, had a good head on her shoulders and was someone to root for! Cal was super swoony and just perfect.

My only issue was for what should have been a suspense type situation I was kinda bored there in the middle of the book. It needed something you know? More characters? Maybe some laughs? Not sure.

Either way it was still a great PNR - onto book 3!

---

## Kristy Mills says

AUDIO: I liked the female voice, and I liked the male voice too, but the male sometimes sounded robotic. It got annoying. He pronounced every letter and over-enunciated, which took me out of the story sometimes. I don't remember him sounding like that in the first book, so maybe he was just trying for a weird accent with Callum since Callum spoke a different language...

This was Maci and Callum's story. I really liked this one, probably better than the first book, which is impressive. I usually am pretty devoted to the first two characters, making it hard for me to enjoy the second book in a series. But I really liked Maci, in the first book. She was pretty mysterious. She didn't talk much and there was something going on with her that was a little unusual. Also you could tell she was techy and smart, so I was really looking forward to her reading her book.

Callum was on Death Row. But instead of just giving him an injection and being done with it. The warden decided to make a sport out of it and rich people could pay to come and hunt down a death row inmate.

Through a series of events Maci and Callum both end up in the hunting arena together. They pair up and work together to survive and try to find a way out

One thing I found interesting was when Maci met Callum she immediately spoke, a lot. I think it's funny that with Callum she was immediately pretty comfortable. And Callum had no idea that with everyone else, she

barely spoke.

I so enjoyed their journey. I loved that it was so different from the first book. Same planet, but completely different setting and enemies/threats.

I loved that with Maci, Callum was gentle and kind, but with anyone else, especially threats he was a savage beast.

There was that annoying dumb girl moment where Maci thought she could go out and fix things on her own, just like in the first book when Audra tried to sacrifice herself to Jamie for their freedom, then Tyson had to step in to save her. Maci had her moment too, and of course Callum had to step in, but as annoying as those parts are, it did not detract from the story for me at all. And I don't know if I agreed with their plan at the end. I feel like they created more problems for themselves (view spoiler)

So, on to the next book. I'm really enjoying this series so far.

### **Rosa Maria Garcia says**

#### **Great Book Two**

It was just as captivating and exciting as the first one? Loved it that, Maci, for being such a shy person pull such a great escape and found love with, Callum, to boot! Plenty of action, adventure, passion for survival, and steamy hot romance with awesome characters. A must read and so read to read the next book?

### **Victoria says**

4.5 Stars

---

### **Fly FreeBird says**

That was fast! So good though. Can't wait to read moreeee.

---

### **Jen says**

Loved it! Maci and Callum are awesome!

---

### **K.M. Montemayor says**

4/5 hellkitten stars.

Maci has been separated from Tyson and Audra, and sent to a brothel for the wealthy. When she kills a "client", his hunter brother wants revenge. She is sent to become the prey, along with another inmate on death row.

At first I wasn't sure I would like Maci. Although she has a sixth sense, and knows her tech, I wasn't sure she was made of tough enough stuff to survive. It irked me when she still refused to talk. I was thinking she was really stupid when they could hurt her or worse. Finally, she starts speaking and making better decisions. She become a likable and believable MC.

I can honestly say I like Callum as much as I like Tyson, which is a whole lot. He is the brute strength she needs to survive. She is the savvy tech guru they need to survive. They make a great couple.

I liked Audra and Tyson's story better, but this was a very good one.

---

### **Mandi Schreiner says**

The romance in this one didn't work as well for me like book one. I still like this world though

#### **Red Prison Planet Rhodon**

5 Stars

Book Review

Release Date-22/3/18

#### **In most cases, the only difference between the guards and the inmates is the uniform each wears**

"Hunter" is the second book in the prison planet series and I enjoyed this even more than the first if that's even possible.

This continues right after the events at the end of book one.

And this time we get to spend time with Maci as she is transferred to zone 2 as entertainment for the wealthy patrons of The Resort.

This book is a totally different ballgame than its predecessor each instalment having such a distinctly unique flavour.

So after accidentally killing one of the paying customers, Maci is thrown into the enclosure alongside fellow death row inmate Callum to be hunted live for the viewer's amusement by the deceased's brother.

Think Escape from the New-York / Running Man / The Hunger Games but with super sexy shenanigans and you'll get the basic picture.

Unable initially to speak the same language and despite some initial suspicion understandably on Callum's behalf; these two very swiftly bond; pulled together through their shared experiences and also through utter necessity each needing the others skill-sets for their very survival. At the onset, their lack of spoken language maybe helping them to bond in a much more physical fashion. Actions sometimes speaking louder than words.

**.He lifts a thick strand of my hair to his face and sniffs again. Then he rubs it on his cheek and says a word I hope means soft. Or pretty. Or something complimentary. Anything other than, "After I kill you I'm going to eat your flesh, shave your corpse, and wear your hair as a braided trophy." Because that would definitely be a mood killer..**

What I also loved about this was that though Callum was ultimately the muscle Maci was also no slouch when it came to saving her own butt.

Lacking the physical strength she uses other weapons in her vast arsenal and in a way it's her actions that change the course of her and Callum's eventual fate.

I also really liked that Callum was secure enough in his own masculinity to appreciate and be impressed by the skills Maci herself brought to the table.

**I stare at Maci in awe. Shaw may have thought he was putting her in here to die, but all he's really done is arm the little tech-ninja with her weapon of choice. My little hellkitten is crazy smart. She's just used the warden's own security system against him.**

I also adored how blunt and Alpha Callum was while still managing to convey his affections towards Maci. He was a typical male sometimes not thinking to just express himself verbally expecting Maci to be a bloody mind-reader.

**I already told you, hellcat. You're mine. I'm yours. If that weren't true, I wouldn't be here. I wouldn't have come after you in the enclosure. I wouldn't have given myself up. I wouldn't have escorted thirty whining women through the woods in the middle of the night. I'm sorry if it didn't occur to me to actually say the words, but Maci, I love the hell out of you.**

I absolutely adored the overall execution here especially the epic finale we are treated to when Maci goes all GI Jane on their butts. Sometimes the Damsel needs to rescue the prince; loved this so much it was totally epic.

And Callum himself may not be all hearts and flowers but he does express himself with such heartfelt individuality that I just couldn't help falling for this deadly prison inmate.

**Hell yes, you belong to me," he growls. "And not in that 'prison dibs' kind of way. You belong to me like my own fucking hand belongs to me. Like you're a part of me. And I will fuck up anyone who tries to sever you from me.**

See such a way with words has Callum; how could you not bow down and just appreciate his pure masculine yumminess.

There is just so much here to adore and while this has some serious life and death struggles it is also filled with some terrific one-liners and tongue in cheek humour.

Everything about this book just worked for me on all levels and I'm so looking forward to the next exciting instalment I really can't recommend this series enough.

I accessed Hunter (Prison Planet Book 2) with my Kindle Unlimited subscription.

All opinions expressed are entirely my own.

## **BookPauper says**

What a fun find this series is! Here we have Maci's story. She was grabbed at the end of book one, and now we're getting to see what other zones are like. I'm still diggin the series and the world and the characters...yeah, I can't wait for book three.

---

## **Jacqueline's Reads says**

3 Stars

I'm giving Hunter 3 stars, but I still liked the book. I think if 30% of it was edited it out, I would have bumped it to 4 stars. My interest got kind of lost towards the end, but overall, I like Maci.

Maci was the quiet one in the first book. I was really curious about her, since she's the virgin and she seemed to have a unique ability, but we never really knew what it was. In Hunter, she really shines.

Callum is on death row, he lives in a cell with the other death row inmates. He doesn't understand why he isn't just killed, but after a year in death row, he realizes what awaits for him.

The hunt. In the Hunt, he is thrown into an enclosed kind of "woodlands" area where a rich person will be hunting him and kill him. What an interesting storyline right? Maci is thrown into with him and they two will have to learn to survive.

The author does a great job at world building and story-telling, but like I said earlier, sometimes it's a bit much. I wanted a lot of that edited out towards the end. I enjoyed the story most of all. It was unique to see how Callum and Maci interact. I also liked that they didn't speak the same language. I kind of wanted that to be continued throughout the book because it would just make for a harder relationships.

I usually like books where there are not that many characters and you really get that with this one. They have to use each other to survive.

Despite the book being too long, I was entertained and will be moving on to the next book!

## **B. Truly says**

The Running Man in another galaxy meets savvy diva.

I enjoyed book #1 so much that I didn't think book #2 could possibly be better. But I was wrong. So far, book #2 is my favorite. I wasn't sure what to expect from Maci, but I was pleasantly surprised by how much I liked her.

I will say that at the beginning I didn't understand why Maci refused to communicate when the women were only trying to show her the ropes. It was silly for her to refuse to talk to them. So when Maci did start talking and coming into her own, I thought it was a very quick character shift—like she turned into Audra within a matter of hours.

That being said, I did like Maci a lot. She was very intelligent with the will to live. I'm glad she fought back instead of letting that tool rape her. He got exactly what he deserved.

The running man plot was interesting. Callum and Maci speaking differently languages added a nice touch. Being put in the same situation where a hunter was plotting to kill them made them have to work together to stay alive. They quickly became close, spinning into a heated romance. Emmy writes steamy love scenes. What I like best about them is that there're not too raunchy.

One of the most interesting concepts in this book were the robot dogs. They reminded me of the dogs in Hunger Games, although I think those were actually mutated humans. But the dogs in Hunter were done much better. Maci's tech savviness and being able to manipulate the dogs was great.

In the situation that Maci and Callum were in, I would've been okay with them just saving themselves.

Maci's rescue mission seemed farfetched and suicidal. In the end, I'm glad it worked out well and I loved seeing those robo dogs in action.

Hopefully, in the future we get to see more of Maci and Callum. I loved them as a couple. I also want to know about Zone 3 and what happens with the girls. This series is very addicting, and is now one of my favorite sci-fi series. Book #3, here I come.
