Lindsey's Rescue Michelle Howard

Lindsey Ferra signed up for Earth's Singles Program wanting love, marriage and happiness. She found the first two but the third required a bit of work. Fighting aliens, running from aliens and making friends with aliens all seem to be on the agenda for the day. Her only question now is can she find her way back and will happiness be on the schedule this time.

Senate Leaders Baruk Laars and Zadal Gatar planned a marriage for business reasons. Their wife Lindsey gave them something else...love. Can these two work together to correct their mistake and will Lindsey be rescued before it's too late?

I enjoyed this story the most so far, I just thought the ending was too abrupt and again too many things with the relationship feeling unresolved. I know it is a ploy to get you to want the next book, but I am getting fed up with every relationship feeling lacking at the end and gipped when it moves on with another couple and we only get scraps of their future. I think the books should be longer and resolve the couples/menage futures better before moving on.

I think this is one of those stories that are "It's not the author, it's me" type thing. I am of an age that I remember when women were considered less than men, in all things, and it was considered quite normal at the time. So having seen how hard women fought just to be accepted as having the same brain capacity as male's I'm not ok with going backwards in the future, not even in my reading matter.

The h was so nice and sweet and to be really blunt, dumb as a post. The men in her life treated her like a dumb pet they slept with. She had her uses, did what she was told and they occasionally patted her on the head and gave her a bit of attention, but even that was mostly for sex. She didn't even have enough backbone in her to demand medical attention when she was ill.... really?? How is that supposed to be a good thing.

When writing or reading a romance I always ask myself three questions.... would I want my daughter to act like this? Would I want my daughter to be treated like this? Would I be proud to have raised a woman to be like this?

And my answer to those questions in this story is a resounding NO!

Lindsey's Rescue is a great first attempt at menage by Michelle Howard. Honestly, the relationship between Lindsey, Baruk and Zadal didn't feel organic and the sex scenes felt stilted but the talent Ms Howard has for storytelling made up for it.

By far Lindsey is the best heroine of the series. She isn't without her flaws, but she seemed better fleshed out and relatable than Faye and Sylvia. Unfortunately the heroes lucked out and fell short of being potentially amazing. I'm a sucker for the dark brooding types and felt that Zadal wasn't explored deeply enough. Even Baruk's character fell short of his potential.

Despite this, I enjoyed Lindsey's Rescue immensely and can't wait for Kylee's story!

I didn't read the first two books in the series. But I have to say, I like the world Michelle has built. Even coming in midway, you don't feel lost or confused. Kudos for that!

I think Lindsey was a really delightful character. She's cheerful and positive all the time and she's really good for Zadal.

I like the pace of the story. There was no insta-love or even insta-lust. Other than Lindsey's initial attraction to Baruk, they had a reasonable amount of time to build up a proper attraction. There were even some doubt along the way.

I'm surprised at all the glowing reviews of this book. I found it to be stilted and very poorly written. The heroine is comically silly, and not in a good way. Yeah, it's a ménage book, but dude, there are so much better ménage books out there to spend your reading time on!

Lindsey Ferra goes into the whole *Earth's Singles Program* with open eyes. She knows what she wants and knows what planet she'll find it on. Planet Gerulax marriage units are *Triads* of two males and one female. No brainer decision there.

Senate Leaders Baruk Laars and Zadal Gatar want Lindsey as their Triad bride but would have to agree to be spouse partners to have that happen. Being strong opponents in the Senate would make that unlikely except that Lindsey is worth doing just that.

The three will have to come together mentally and physically as outside forces will make it hard to stay together if they're not. Some will be more determined to force the Earther female leave by any means possible.

I've been looking forward to this installment in the *A World Beyond* series ever since I finished Torkel's *Chosen* which left Lindsey's fate dangling. Totally happy the author resolved that little problem....

The story line and cast of characters were well developed and made the world building a believable concept. I continue to have a problem with the core premise regarding the monetary fee required for the women but it wasn't a major component in the story so it is what it is and that's fine. I would really suggest that this not be read as a stand alone for the simple fact that portions of this story do cross over into events from Torkel's *Chosen* which would be lost if this was the first book in series you read.

The adult content scenes are of the ménage m-f-m persuasion. I appreciate the author's risk to go for the ménage as it is much more difficult to coordinate than people realize. Unfortunately the scenes did had a forced quality between the three instead of an organic natural flow. I would have liked to have seen more integration between the three or even a better visual of any voyeuristic enjoyment of the passive character.

As for the secondary cast of characters. Many of the characters from previous installments make an appearance and some new character pop up. Of course I can't leave out my new favorite side kick Smiki. I do

expect him to return along with maybe Daphne, Courtney, Jolie, and others. :D

My issues have to do with the lack of follow through and follow up on details. Unfortunately mentioning some of the more problematic ones would be spoilers so I won't.

While this series isn't on a five star scale for me, I'm still a fan. For those looking for a feel good SFR with a touch of suspenseful twists and turns this would be one to check out. If for no other reason than to find out if owning a pet paxal might be in your future.

Lindsey the beautiful Earth chick and Baruk the wealthy politician and Zadal the not so wealthy politician. I am so tired of menage. But I did like this one, because all three characters were interesting as individuals and their dynamic together.

The story starts where Faith (from book 1) and Lindsey meet on their way from Earth. (Faith was just as much a wet blanket in this one as in her own book).

Lindsey pays a lot of money to escape Earth and marry aliens in the hopes of having a loving family. When she gets to Gerlaxion, she finds herself at a disadvantage as so often happens to immigrants. Even though she is pretty and sweet, she is the outsider. The three of them end up together almost by accident. Lindsey is bubbly and upbeat always, while Zadal gruff and austere. He has a huge chip on his shoulder from being born out of wedlock to a prostitute. Baruk is the complete opposite, coming from a wealthy family who loves him. Both he and Zadal are Senators.

The story starts out kind of clunky but after they all get together it flows better. The last quarter is devoted to what happens to Lindsey after she is abducted (as mentioned in the first book). It was humorous in parts but didn't really add to the story overall and went on too long imho.

But overall I liked the story more than I thought I would even though parts were glossed over. It felt like the author was feeling kinda lazy when she wrote the plot to this one. I would have rather read more about their getting to know each other.

I have to say that I really enjoyed Lindsey's story. I did have to wait until the last 25% of the book to get to the 'Rescue' part of Lindsey's Rescue but when it came I did enjoy her adventure. I have the fact that in this book class played such a big part. I guess no matter what year it is if you are not born in the top 1% you still are looked upon as being shit. But I cannot wait until Kyele's Passion comes out on Audiobook.

I have been enjoying all the books in this series but was a little worried about how dark this book would get has Lindsey had been in the hands of the slavers through out the other books.

We get the romance before she is taken and the contrast of the two heroes to her sunny personality is lovely.

The falling in love with each hero and they with her is charming journey. The heroes do not have a sexual relationship but there is a nice adversary to friends to family arc here.

Lindsey shows grit in her captivity and the cast of characters widens and is a great deal of fun.

The who done it part could be better and more satisfying and the delay in the return a bit vexing but overall this is a good science fiction romance with fine world build, love story, and characters.

This one is my favorite. It doesn't have anything to do with the menage and everything to do with the characters. I really enjoyed the development of their relationship, it was a slow paced love at first sight, if such a thing exists! I loved Z, specially because it brought back memories of my favorite Z ever. I loved the dedication of the heroes and how dedicated they are to their female. also I really enjoyed that this book is not all on board of torture and horrors for the captured heroine.

I was really excited to finally see if Lindsey ended up married to her 2 hunky men that she was hoping to in Faye's book.

One thing I really loved about this book was that each person had their own securities that they needed each other to help get over.

Lindsey isn't a master at seduction. She trips over her tongue and spaces out making the men seem like she's not interested during the Marriage Ceremony.

Senate Leader Baruk Laars goes to the ceremony to find him a triad, but he doesn't expose the fact that he is from one of the richest families on the planet. He wants a woman who doesn't care about what he can give her with his money, but with his love.

Senate Leader Zadal Gatar is abrasive and rough. He makes no apologies for how he is, everyone judges him anyways because his mother was a sex worker. He's worked hard to be where he is and is mainly looking for a triad to help improve his status. What he didn't expect was a bubbly human to break his walls down.

I think the only thing that I didn't like about this book was the end felt a bit rushed to me. During the entire time Lindsey was gone not once did Baruk or Zadal think to look at the people who have recently caused them problems or expressed hate towards their wife like Zadar's ex-first assistant or the other grabby senate leader. What happened to him? He just disappeared?!?

I love Happily ever afters. Don't care if it's male/male or female/male. As long as it's two! I only read menage if it's in a series and it helps to advance the story. Not a fan. What a nice surprise! I really enjoy this and I thought the story between Baruk; Zadal and Lindsey was funny and sweet. I would recommend this, even to others that feel the same.

“Kick rocks!” (163/291)

Nevo Xyman (222-223/266), “The man standing behind them grinned. He was handsome. And human. Dark hair fell carelessly over his brow, friendly green eyes glinted with humor[,] and full lips curved up in a half smile.”

So the paxels were cool. The three main characters had compelling personalities; very likable main heroine. But ... that’s about it. And overshadowing those few pluses was the problematic writing: WTF kind of editing job can’t distinguish “then” from “than”? Or keep straight the possessive vs plural apostrophe “s”? The writing problems ranged from those and other basics like the affected/effected distinction to the author’s odd but consistent use of “lessened” for “lessened” and dozens - seriously, *dozens* - of other comparable fuckups that the author -or any decent editor - should’ve caught.

I confess I’m more anal and unforgiving about that small stuff than are most readers. However, I do tolerate it if an author is creating a story and crafting writing that are otherwise worthwhile. Unfortunately my appetite for reading good alien smut will continue without consuming any more of this author’s work.

Just finished this. I've been waiting for Lindsey's stories and her two husbands since she was mentioned in Torkel's chosen.

Holy Cats. Her two husbands are beyond HAWT, and go right into smokin' magma HOT! Her befriending the "ducks" was hilarious and her running off with Smiki was too cute to shoot.

I felt the end was rushed a little. I think it's because I wanted, so badly, for Zadal to be able to lay the smack down on his snotty assistant. I guess I feel like Lindsey didn't get closure because she wasn't able to face the people responsible for her kidnapping and be able to see some vengeance.

We get to see snatches of Faye but we already know what went on there and what it took for Torkel to fully understand what she went through for him. It was somewhat of a relief that Lindsey was not totally alone in her prison, but when she got sick, I got a lot worried.

This is a great continuation of this story line. I can't wait to see what she had up next.
