## **Knit Together** Angela Dominguez

New from an award-winning illustrator comes a sweet story of mothers and daughters, drawing and knitting, and learning to embrace your talents—just right for Mother's Day.

Drawing is fun, but knitting is better—because you can wear it! Knitting isn't easy, though, and can be a little frustrating. Maybe the best thing to do is combine talents. A trip to the beach offers plenty of inspiration. Soon mom and daughter are collaborating on a piece of art they can share together: a special drawing made into a knitted beach blanket.

For every mom and daughter, this is an arts-and-crafts ode creative passion and working together.

### **Laura Harrison says**

Adorable, original story. Lovely illustrations.

---

### **Sarah says**

An artistic little girl & her knitting mother collaborate to create something beautiful. With sweet illustrations, this would be a great book to read one on one.

---

### **Jill says**

Fabulous book celebrating a mother and daughter's individual talents and bringing them together. I like how the mom explains that "sometimes the best ideas come when your brain is resting." And that the author uses the word "collaboration" with the definition built in, "We'll make something together."

---

### **Mari says**

I remember being young and frustrated that I couldn't create what I could see in my head. I would have loved this book.

---

### **Samantha says**

A young girl loves to draw, but admires the way her mother knits beautiful art that you can wear. She tries to learn how to knit, but finds it a tough hobby and focuses instead on a way that she can collaborate with her mother on a joint project.

Good story with read aloud text and a nice problem/solution. Gouache, ink and digital artwork. PreK-2.

---

### **Joseph says**

I get the story with the mom and daughter and that is great and all...but didn't really like it.

---

### **Alexa says**

So sweet. I need more knitting parents in my life so I can send this to them to read with the kids. Otherwise I feel like it would be propaganda from their knitting friend. Ha!

---

### **Claire says**

Such a sweet story (and talented two!). The story is easily translatable as it is quite literal and not dependent on wordplay. However, only read it if you have no talent in yarn crafts or are quite talented, because little ones are likely to ask for the blanket at the end of the book (or one of their own design).

---

### **Penny McGill says**

This book could not be any more delightful. A mother-daughter story where they work together to create something was spot on for Mother's Day weekend and the illustration style is gorgeous. One image in particular will always stick with me - of the little girl tied up in yarn and frustration - after trying again to master knitting. Her expression is perfect and the whole book hit the spot. I loved it.

---

### **Brittany says**

A great mother daughter book! A sweet read.

---

### **Jesse says**

I loved this book! The mother-daughter bond and working on a project together using their own strengths legit made me tear up. Super sweet with adorable illustrations! I'm beginning to love Angela Dominguez's work.

---

### **Michelle Gray says**

An absolutely delightful story about a mom and daughter working together using their own special talents to create something they both love.

Themes: family, knitting, sharing

---

### **Jillian Heise says**

A charming story about a mother and daughter who collaborate to create a knit blanket when the daughter wants to be like the mother but isn't able to actually do the knitting so draws the picture for the design instead. I really liked the illustration style in this one a lot. Not sure about the audience though if they have never seen knitting, they might not totally grasp it.

---

### **GalindoLibrarian says**

Cute book about creativity & working together.

---

### **Jen says**

Very cute book about collaboration and valuing each other's gifts. I'm not sure whether I'm excited or scared to share it with my daughter, as my talents could not be used in quite this way. ;)
