Zander :-) says

It was interesting and it kept me on the edge.

Kelsey Gilstrap says

I read this in elementary school and can remember the story very well...an awesome book about The Watchers who can see into other worlds and even into the past, tells the story of Adam's new video camera that can rewind reality.

Fernando Villegas says

In the Watchers Adams find a tape that views the past and see his friend dies and now hes trying to change it.

I didn't like this book cause i didn't understand it.Also the author did put like specific thing and added all theses new people and it just got me confused.

If you like books that add more people and books that make you think really hard then i would recommend this book .

CeCe # 2 !!!! :) says

i love this book it is very intresting, how they can go back in time see and try too help there friend from dying i cant wait to find out if it really works.... ?

Daniel Ivanushkin says

I overall really liked this book, and, although it was a short read, I really liked the characters, and the story line went well for me. I would recommend this book for people who like mystery books.

Abraham says

The book Rewind (Watchers #2) by Peter Leranis is an interesting book. The book is about a boy named Adam Sarno who had caused the death of his best friend named Edgar,but he doesn't know the whole story and how it happened. Then every thing changes when he finds a video camera. That is why you should read

this book.

Jesus Orellana says

This book captured my full attention from the start. From finding the "camera" to the shocking ending that developed. Going back in time to try to change the past and save his best friend (edgar) from falling into the thin ice of the lake and dying. To see if he is successful then read Watchers by Peter Lerangis

SR says

I'm PRETTY sure I read this. I think.

Engel Dreizehn says

I would describe the "Watchers" series as middle-grade/YA Outer Limits or Twilight zone as the stories as episodic in length yet still packs the surreal-scifi story strengths. I find this one interesting because the supernatural item is relatively condone to the video camera and the interesting twists-surprises time travel provides.

Leah says

Again, very Twilight-Zone. Hooray for time-travel!
