Review for Linsey Hall's Ancient Magic

Wow!!! This definitely rates more than 5 stars!!!

Imagine Indiana Jones, Lara Croft: Tomb Raider and Harry Potter all rolled into one story. Right! That's how good this is! As usual, Linsey Hall delivers another story that will definitely stay with you even after you've read the last page!

At the start of the story, you will be sucked into the thrill and action! It's the kind of story that you won't be able to put your reader down!

And the characters are just so engaging you will definitely fall in love with them! I can't wait to read more of the adventures these characters will get into.

Well so far I have only read Ancient Magic by Linsey Hall and Wilde Bear by Holly Eastman and Terra Wolf in this set but I am anxious to get to more of the books and will update my review as I get thru them:

Ancient Magic Linsey Hall - 3 girls wake up in a field with no memory of who they are or where they come from. What happens next is a wonderfully weaved tale of them learning to hide in plain sight and thrive. That is until Cass takes a job that threatens their safety and lives. And who is this strange man that awakens things in Cass that terrifies her. I love the characters and the story line and can't wait to see where this series goes. There is excitement, intrigue, some stuff blown up and more. A true page turner in a way that only this author can do!

Wilde Bear Holly Eastman and Terra Wolf - Team up and bring us a bear/fox shifter tale. Too bad ignorance and prejudice is alive and well and making it hard on those that are a little different. Laurel and Xavier both have some secrets and issues they need to deal with in their past but now that they have met working to keep that past in the past and deal with their future will take work. Will their past keep them apart or make them stronger together.

Looking forward to more awesome reads from the amazing list of talent included in this boxset.

If this is the book about people shifting into animals it's a great read. My only complaint is that it's too short!!

Good plot exciting action sexy as hell

Ended way too soon I'm sure the sequel will be just as good and I will read it asap

Heaven and Hell is a urban fantasy and paranormal romance collection of 10 full length novels by various authors. To date, this review pertains only to Ancient Magic by Linsay Hall. Once I've finished this collection, said review will be updated.

Ancient Magic by Linsey Hall is the first book in the Dragon's Gift: Huntress Series. An urban fantasy, this series is geared towards young readers, and has so much to offer to those that peek between the pages. This book is well-written, has a fantastic storyline, engaging characters and is filled with all kinds of supernatural goodies to make a paranormal readers heart flutter. Add in a lil titter of romance, heaps of action and voila...you have this wonderful start to a brand new series.

Please note that an ARC was generously provided in exchange for an honest review of which this is both honest and completely voluntary.

Ancient Magic by Linsey Hall - Waking up in the middle of nowhere with no memories except a few words among two other girls that you have no memory of would be horrifying in itself. Then to figure out you have powers that are forbidden would definitely make me want to run and hide. Cass, Nix, and Del become very strong women/sisters in a world that is strange and confusing to them in the beginning then when things start to take a turn and Aidan (The Origin himself) shows up things get even rockier. Cass and Aidan make a team to be reckoned with once Cass finally lets go even for a small amount of time. Linsey Hall grabbed me with The Mythean Arcana series and holds on tight with this one. I can't wait to read more of this series.

More to come...
