Can a blind woman who shares a very special bond with her dog, gain her independence and choose between the love of TWO sailors?

In *Blind Seduction* an accident leaves Teresa March scarred and completely blind. Encouraged by the support of her friends, Teresa sets about adapting to life in the dark, reclaiming her independence.

Best friends make the toughest adversaries. Sebastian Declan and David Preston retire after twenty years of service to their country. Teresa's scars discourage neither man in their newest mission: winning her heart. Bastian's battle is uphill, overcoming Teresa's negative teenage impression. David is a virtual stranger who fell in love with Teresa through Bas' pictures and childhood stories. These sexy sailors will stop at nothing, including deploying military tactics, to secure Teresa for themselves.

Smart, opinionated, and handsome commonly describe German Shepherds. Teresa's service dog, Red, is all this, and then some. Red and Teresa are surprised to discover they share a bond which allows Red to speak into Teresa's mind. Red's adept tracking skills, and ability to deduce information, open new opportunities for the pair. More importantly, his quirky humor brightens Teresa's dark world.

Welcome to Team Red!

You will laugh out loud (the author apologizes in advance for the strange looks you will get when you start to giggle uncontrollably), in this Humorous, Spicy, Paranormal Romance.

WARNING: This book is INTENDED FOR MATURE ADULTS OVER 18. Contains swearing, which is unfortunate, as the dog repeats everything. When you have two hot, single-minded, sailors pursuing the same woman, graphic language and sexual situations are inevitable.

Christine Ernest says

Surprising

I have to say I was pleasantly surprised with this book. The author is new to me and I find I enjoy her distinctive voice, so much so, that I'm planning on reading the rest of the series available. I'd highly recommend this book to anyone looking for something different in the romance genre.

Jennifer Simon says

Fantastic books filled with humor and romance

Jacklynn Sizemore says

Wow I so love this book. I so love Teresa she is awesome cause she can talk and hear her amazing dog Red. Oh did I forget say she blind and not only does she have one sexy hot man after her but two oh so yummy men. To know more about this book grab your copy today a so so so must read!!!!!!!!!!

Denise Colvin says

Great book. A talking dog!!

DelSheree says

After a tragic accident, Teresa is left completely blind and is faced with relearning even the simple daily activities she once did on her own. Luckily, she has friends nearby who are there to encourage her, but she is surprised with one additional helper when her best friend presents her with a very special dog. Red appears to be an average German Shepard, but when Teresa finds herself able to communicate with Red she knows he is anything but ordinary. Then, to complicate her recovery even further two men drop into her life unexpectedly, both vying for her love.

I have to admit, the idea of a talking dog (although he doesn't actually speak out loud) wasn't one that immediately drew me in. I was a bit concerned it wouldn't work in an adult book. Red and Teresa's ability to communicate actually added a very fun element to the book. Red is a spunky dog with lots of opinions and a bad habit of repeating what he hears. There are many parts of the story that are serious in nature and Red adds in just the right amount of humor when it is needed. Red also provides a different kind of friendship for Teresa when she really needs it. He allows her to regain some of her independence and maybe even find a new purpose now that her life and career options have changed so drastically.

So, I actually ended up with a copy of Blind Seduction, not Red Rover (The new adult version). The romance in Blind Seduction is for mature readers (18+), but the Red Rover version is strictly PG-13, and more appropriate for the "new adult" audience. Both books tell the same story, but are geared at different reader groups.

The version I read was definitely intense and attention catching. In some ways it was the main focus of the book, more so than Red and his abilities. Hammond does a great job of creating drama with this love triangle. Teresa has hated Sebastian most of her life. Her ideas of sex and intimacy have been affected by him when she accidentally walked in on him with a woman. There is definitely chemistry between them, but the past is not easy for either of them to forget. Complicating their relationship is Sebastian's friend, David, goes after Teresa with no apologies, and she finds she doesn't want to resist him. Most of the book focuses on the romantic side, and even after Teresa makes her choice, I was left with the feeling that future books may change that and offer up even more romantic drama.

Make sure you pick up the right book for the right audience. The amount of sexual scenes and their level of descriptiveness in Blind Seduction makes this inappropriate for younger readers. It may not be for every adult reader, either. Personally, I thought Hammond could have been much less descriptive and still maintained the intensity of the relationships. There was also quite a bit of profanity as well. Had I known about the concurrent version, I would have preferred to read Red Rover, but that is just my personal preference.

Brenda Hook says

this book is a joy to read .it is laugh out loud funny. i liked this book so much i am buying the next one to see if it is just as good,

Nancy Stopper says

Blind Seduction is the first book in a 6 books series about Teresa and her dog Red. I typically don't like to read books in a series that include cliffhangers - I prefer the story to be completed in one volume and if related volumes are written, that's great. Blind Seduction is part of a larger series and there are more books that continue this series, but the author does provide a decent sense of closure at the end of the first book...she provides a teaser to get you interested in the second book, but you won't feel that it's incomplete when you finish the first book. While I was definitely interested in what the next book had to offer to the story line, I felt a nice sense of closure at the end of this book.

This book and the books that follow have a core group of characters with supporting characters coming in and out of the story. Red, however, is the hero in all of these books! Red is a German Shepherd, born on the day of Teresa's accident that blinded her, that has amazing abilities to connect with Teresa. These abilities are revealed over time to Teresa as she and Red form and deepen their relationship. Red has a wicked sense of humor, picks up sarcasm and jokes better than most humans, and has zero filter - he's known for repeating anything he hears and often at the most inopportune time. Although only Teresa can hear his thoughts, the entire family forms a bond with Red. Red is extremely intelligent and his deductive reasoning is highly

advanced - I was constantly amazed with what he was able to discern, analyze, and conclude with his observation - and he's a dog!

Teresa is a strong, confident woman who demonstrates over and over that she can persevere through many challenges. She has deep emotions and loves with her whole heart, which is what opens her up to being hurt so easily. She is also fiercely loyal and compassionate and a great heroine for these books. The author did a wonderful job of creating a heroine that we as readers can relate to, connect with, and cheer for!

We are also introduced to Bastian and David in *Blind Seduction*. Bastian and David are both "alpha males" and both have set their sites on Teresa - *The Seige of Teresa March* has begun. I found myself laughing out loud several times as Bastian and David found ways to scuttle each other's dates with Teresa, using all resources (including some technological ones) to shanghai the other's chances! In the end, Teresa went with her heart and moved forward to deepen the relationship that she believes will lead to a long term commitment and love in her life.

Throughout this book, we see snippets of risk and suspense as Teresa and Red, and David and Bastian navigate the challenges of the new abilities they have discovered in Red; David and Bastian's work; and the exposure of Red and Teresa's abilities to the local police department. These suspenseful and dangerous situation set the stage for incredibly suspenseful stories in future books.

The intimacy scenes are well written - they are somewhat explicit, as warned in the description, but they don't overwhelm the book with continued sexual content. It's introduced as appropriate to the story line and while it supports the story line, it's not the focus of the story line - the relationship between Red and the family / team, and the relationships forming between Teresa and the men in her life and the situations that bring them closer together are the primary focus of the book and the balance creates a well written book that was an easy read, front to back. I look forward to the next book in the Team Red series!

Jocelyn Sanchez says

This book tells a story about a woman named Teresa. After a terrible accident that results in Teresa losing her sight, Teresa is trying to move on with her life when an amazing surprise comes to her door. A German shepherd named Red. She finally gets a dog she had wanted since before the accident and not only is he cute and loyal, but he can do something that other dogs could only dream to do: he can speak to Teresa in her mind. What happens when you add a beautiful woman with a sassy and opinionated dog? Well let's just say be careful what you say around the dog, he repeats everything! As more people realize Teresa's gift to hear Red, many think she can help make a difference if she uses her power's to help others like the police department. Not only does this book have a relatable woman with enough charm to keep you entertained for hours but when you add a talking dog to the mix you will laugh for hours with tears in your eyes. Let's not forget the two gorgeous men that are seeking her affection creating steamy and wonderful scenes that will leave you drooling. This book was brilliant and I couldn't put it down. I love how the characters, especially Teresa, are relatable to the reader and you can feel the emotion in the book. You learn important lessons reading about Teresa's life after the accident and see how a dog and a witty woman is a truly an amazing idea to make a book about. This book will keep you smiling, laughing, and reading for hours. I highly recommend this book.

BJ says

The h is smart, gorgeous and blind. She has amazing friends, amazingly no money worries, and her has an amazing dog. It was so - amazing, except the focus for 2 possible Hs who are both in love with her, were the scars on her face. Everyone made light of being blind. I'm not a fan of everyone being perfect. She was the most beautiful, the H was the smartest, the other H was the biggest, yada yada yada - all of them smug, and life was too easy. The dog could talk, and even he spoke sarcastically and he was still a puppy.

Laurie says

Cute and funny, Red reminds me of the Dog in the Iron Druid books. 3.5 Stars.

Danielle Taylor says

I was given both Blind Seduction and Color Blind by the author. She said I didn't have to read or review Blind Seduction, but me being a little anal, I had to read book 1 first. And I am SO bloody glad I did. For me, Blind Seduction has it all; the broken and scarred character who, despite the hand she was dealt, held her head up high, and retained her humour and spark. There's intrigue, suspicion, even an annoying yet gorgeous best friend's brother. There are run-ins with the police, too.

I think writing a blind character would be one of the most difficult in a novel, especially from a first person POV. We usually rely on the explanations of their surroundings to tell us what the settings and people look like, however, Ms. Hammond blew me out of the water here. There was so much more going on that I honestly didn't miss the descriptions. And Red, let me tell you. Ms. Hammond did an amazing job with this character. You sometimes forget he's a puppy until she has him think something like, 'oh my gosh, a park! I can smell the grass! So many amazing places to pee!'

I loved Teresa, and I loved being there with her while she fell in love with a sexy-as-sin ex-Navy man. I won't say who she chooses, you'll have to get a copy of the book and find out for yourself!

Now, the reason this book is so special to me isn't because I know anyone who has lost their vision or requires the use of a guide dog. No, Blind Seduction just reached into my chest, curled up alongside my heart, and made itself at home there. Teresa's story, combined with Red's enthusiasm and charm, is by far my favourite of the year – maybe even this decade.

Victoria says

“Red talks to me. Since you're family , in a matter of speaking, I'm surprised Janey hasn't mentioned it to you yet.”

“Oh, Janey said you talked to your dog, she forgot to mention he talks back.”

Oh gosh...I'm just not sure what to say on this one. I'm actually quite surprised I read it and am still not quite

sure why I chose to. This isn't a book that normally would appeal to me. But, it was a free download, I'm a dog lover, and I liked the premise of the story. Sometimes you just have to say "what the hell" and dig in.

Unfortunately, it just wasn't a hit for me. It's a cute read for sure, if you can get your head around the talking dog. Yep, the talking dog. Now, I knew about the dog going in but I couldn't quite work it out in my mind once the story got going. I'll admit I don't read a lot of fantasy or paranormal, I'm pretty much a straight up romance reader. While Red (the dog) added some fun and laughs to the story line, it distracted me from the romance. I actually thought the romance part of the story had some potential, it just all didn't mesh well for me. I'm actually kind of disappointed because I would have liked to have seen what comes next for Bastian. Unfortunately, I'm not continuing on with the series.

Overall, I think this book was cute and had some funny parts. The three stars is just based on my overall enjoyment of the story. I do give the author props for coming up with something unique - it just didn't work for me.

T. says

Hey, I wrote it... what other kind of rating would I give it? I'm tired of it popping up asking me to rate it (even though I have an author account and this book is listed as mine :))I loved writing about a woman blinded in an accident that finds she is able to hear her dog's thoughts. Added to the mix are some crazy friends and two hot guys that decide to competitively pursue her. The story is sassy, sarcastic, and very spicy! It is not a children's book. The Red Rover version is probably equivalent to a PG13 rating with a less erotic storyline.

Lea says

This is a great book, I couldn't put it down. I read the PG version of this book Red Rover some time ago and really enjoyed it so when I found the not so PG version for free on Smashwords (and iTunes and Barnes and Noble....pretty much everywhere but Amazon) I thought I should give it a try too and boy am I glad I did! This book is the story of Theresa March and her talking guide dog Red. Theresa is blinded in a freak accident and is given Red about 8 months later. They quickly learn that he can "mind speak" to her. This makes them a valuable potential asset to police and military contacts alike. While there is some suspense and crime solving involved the bulk of this book is about the relationships. This book has a great cast of characters: Theresa; Janey, her best friend; Bastian, Janey's older brother; David, Bastian's best friend; Ken, Theresa's assistant. There are so many great characters and excellent chemistry between them. It made the book a joy to read. The love triangle between David, Theresa and Bastian was very interesting to me and I actually enjoyed it quite a bit (unusual since love triangles usually drive me crazy). This one was very well written and while I disagree with the one she picked (trying to avoid spoilers here) I loved watching them vie for her affections. There is a companion book In Love With Theresa March which is from their perspectives and I recommend that you read it after this one. It reinforced my opinion she made the wrong choice but maybe that will be corrected in later books (as I know there are 3 more currently out) . Red is by far the most

entertaining character I have read in a long time, he is such a smart ass! There were several times I was laughing so hard my husband stopped what he was doing to ask what was so funny. I highly recommend this book, to everyone, if you want to avoid the explicit scenes (which are very well written and smoking hot) and language go for the Red version of the series instead of the Blind. Gotta go, book two Color Blind is calling my name!

Hollie says

This was a sweet romance with hot sex. I love how our blind heroine could speak with her dog. I found this read started slow but it picked up pace and I'm glad I stuck it out. I also appreciate it was offered as a freebie. I'm likely to check out the next book in this series.
