I knew that there were people out there who love reading as much as I do. But I think reading quotes from some of the greatest people in history...just makes me feel so justified that reading is amazing and connects me to history even more. Will be posting these quotes everywhere and will be telling everyone to read this!

She Writes She Reads aka Thinking M & some other things... says

This is a nice little hardcover book that would make a good gift or stocking stuffer. It would also make a handy source of selected quotes or inspiration for a writer, reader or book blogger.

It is a small hardcover with a medium and satisfying weight. The paper is not as smooth and the type is not as bold as I had expected. The pages feel slightly rough like textured sketch paper which may or may not be intentional to go with the "book" theme. However, I am very particular about how books look and feel. I like gift books to be smooth and pleasant to the touch. It is the same reason that I prefer reading novels in the larger and higher quality (trade-back) soft-cover editions as compared to the tiny, mass market edition counterparts. It is because they look and feel better, and for me that makes them easier to read.

The print quality looks fine for all practical purposes. For me, the print and paper quality are a big deal, but I think most people would find this book perfectly acceptable on those measures. Overall, this book would make a thoughtful gift or stocking stuffer for most people. It is not over-stuffed full of quotes on numerous subjects as some quotation reference books are, but this instead has smaller selection of well-picked and meaningful quotes.

The outside of the book, (cover, back and spine) looks very classy!

I received this book for free from Goodreads Giveaways. By the terms of the giveaway, I am not obligated to leave a review but am happy to do so. This is my honest review.
