J.D. Weston says

This book delves straight into the action. The author manages to convey information through dialogue well, it doesn't feel unrealistic to learn the name of a place or historical data.

I enjoyed the fast pace and the characters felt real, although I didn't feel anything toward them. A few editing mistakes, but nothing that disrupts the flow.

I'd read more of the authors work for sure.

Pamela says

This was a fast paced, action packed adventure that I never wanted to put down. Not my usual genre, but it came well recommended and lived up to the suggestion. If you are up for a good adventure, one that keeps you on the edge of your chair, this is it!

Peter Thomas says

“Prepare for a wild and wooly ride. You will encounter not only the sea’s deadliest wave, but also adventure, suspense, murder, treasure, and romance. This is the type of story where you forget to breathe. Cussler, Grisham, Clancy, and Ludlum have attracted enormous readerships to the mystery/adventure genre. I’ve read most of their books—The Golden Catch compares favorably with any of them. .. Tie yourself down ‘cause you’re in for a heck of a ride.” –Jeff Tickson

“Well-written, and there is much in it of history, adventure, and suspense.” The Writer’s Edge reviewer

Never judge a book by its cover? In this case, definitely. A rubbish cover to match a very below average book. Badly written, some typos, and only got going about 75% of the way through.....

A fun ride that sees our hero Frank find a cache of Korean gold on the remote island he lives on. He meets up with American archaeologist to validate the find, but unfortunately a Korean mob boss gets wind of the find and wants it for himself. What ensues is a deadly hunt over the island while a bad storm plays havoc. I quickly devoured this book, racing through to see what would become of Frank, the mob and the gold. Recommended.

T.W. Barton says

An action/thriller from an author with a history of great books in the genre.

Frank is an ex-CIA assassin haunted by his past and at times, crippled by a crushing guilt.

Living on a remote island in Alaska, working to accept his past and looking for a redemption he can never gain, running from a storm he and his son make a discovery that will have historic ramifications and may just allow Frank to gain back the very thing he's searching for. Redemption.

Traveling to the far east to gather intel on his discovery Frank unwittingly starts a chain of events that will leave a body count across the globe.

Tipped off by alarms he placed years ago, a very rich and ruthless man discovers that Frank has found a treasure lost many years ago. A vast treasure that very few even know exists. He's a man used to getting what he wants and he has no problem killing anyone that stands in his way. Women, children, nothing stands in his way. He has no idea the bear he's about to poke but by the end, he'll learn that some men can be even more ruthless than when their loved ones are threatened and not all treasure is worth the cost.

If you're looking for action then you can check that off the list with this book. It will deliver even more. Not just the typical story line, this book is filled with historical intrigue and a plot line that will have your inner pirate bursting to get out.

Michelle says

Pretty good book. Wouldn't mind reading more books from this author.

Frank Murdoch and his son find a cave full of pirated Korean treasure. They are pursued by a ruthless man and his henchmen, head of a corrupt organisation. Murdoch himself has been a ruthless assassin so it's hard to warm to him as a hero. The story is very action packed and fast moving, sometimes to the extent of stretching credibility. I enjoyed the 'thrill of the chase' aspect of the story a great deal.

However, I felt the book needed a little tidying up in terms of wording but that's easily sorted. Overall though, an exciting adventure story. If you like your swash tightly buckled, it's the book for you!
