### Shawnette says

This is a BEAUTIFUL story..."Arms of a Stranger" is a touching and CAPTIVATING romance that also portrays the aftermaths of a natural disaster in a small town...Mrs. Carmichael makes it is easy to visualize and to feel what the survivors of the devastating Hurricane Katrina struggled through...it's also easy to understand their determination and desire to rebuild the things they lost...I was totally CAUGHT UP in the instant chemistry between Simone and Keithen...I also enjoy the leisurely pace in which their relationship develops...I love that they don't RUSH into a sexual relationship...but they take the time to get to know each other...so when they FINALLY act on their mutual attraction and desire it's such a SENSUAL, fun and heated encounter and it just leaves me breathless...and even though Simone and Keithen encounter a few obstacles in their budding relationship...such as hatred, jealousy, greed, revenge and social status...these challenges ONLY aid in making their love connection STRONGER...this is an endearing, CLASSIC romantic tale with a bit of mystery/suspense...Well done, Mrs. Carmichael.

The premise of the story was interesting, the execution not so much. It's a story of a rich man, Keithan going down to Biloxi, MS to help with the reconstruction of homes after seeing the destruction on TV. He realizes that he leads a shallow life and how he doesn't have that sense of community and true friendship until he meets the people of Biloxi. He meets a woman named Simone who shows him what life is really about through her actions. Keithan is attracted to her not only from her outer beauty, but inner beauty as well because of how she cares for others.

I don't know what to say about this book without being sarcastic. The book started off well enough with Keithan and Simone actually getting to know each other without automatically jumping into a physical relationship with one another. Their build up was nice to see, but the story was ruined by Keithan put down his life so much saying that all his friends were shallow, they only care about image and money, none of his friends had any good qualities, and the author made it seem like these people were hedonistic to the highest degree. The southerners on the other hand were the epitome of family and community and they couldn't do any wrong. Simone made everything come together, and without her nothing could have been accomplished in that book. Because of Simone those who didn't understand the plight of the Katrina survivors were enlightened after having a conversation with her. She was goodness and justice personified.

There was too much good (southerners) versus evil (rich people) going on in this book. I had to read in small doses because the problems were contrived and it was becoming ridiculous. It took me too long to finish this 230 page book.

This book was ok. Not as engaging as her other books. I did enjoy the inclusion of Katrina's devastation and continual efforts of many volunteers to revitalize the Gulf Coast area.

Arms of a Stranger nearly became the worst book I've ever read. It would have been the worst had the last three or four chapters not picked up in pace. That said I have a book mark that has the word BELIEVE inscribed into it. I noticed I referred to it often while reading this book and I've come to the realization that I did so to reaffirm my belief that I could/would finish the book.

There was nothing special about this book. The characters were flat. None of the people in the book popped off the page, well none of the ones we were supposed to care about. The best character in the book is Courtney. She's outrageous and your first instinct is to not like her. This character had fire and passion. Then there's the hero's name, Keithen what's up with that? All the other characters had normal names you didn't have to stumble over to read. An unusual name or spelling does not make a character different or interesting. The dialog was stilted and boring. The scenery of the gulf coast popped more than the story or characters.

What did come through is the author's passion for the gulf coast. It's too bad that passion didn't translate to her characters and story.
