??i Ngô says

Sau n?a n?m, nhi?u l?n t?ng ch?ng nh? b? d? vì quá dài. Do b? sách này dài lên không ph?i ph?n nào c?ng h?p d?n. Nh?ng mình v?n kiên trì ??c, v? t?ng th? thì mình th?y n?i dung cu?n sách r?t r?t hay. Nh? m? m?t chân tr?i m?i ??i v?i mình, giúp mình hi?u thêm m?t chút v? th? gi?i c?a ng??i giàu, v? suy ngh? và t? duy c?a h?. N?u nh? không ??c thì mình có l? c?ng không bao gi? bi?t ??c ??n nh?ng ?i?u ?ó.

M?i ph?n là m?t bài h?c sâu s?c và ý ngh?a v? tài chính, v? quy lu?t c?a ??ng ti?n, v? b?n ch?t c?a xã h?i. Nh?ng nguy c? mà ng??i làm thuê có th? g?p ph?i. Giúp mình nh?n th?c ??c làm công ?n l?ng, h??ng b?o hi?m c?a chính ph? th?c ra l?i không an toàn chút nào. Ng?m thì th?y ?úng, q?y b?o hi?m, q?y l?ng h?u c?a n??c mình th?y c?ng mong manh, y?u ?t l?m. M?t n?m d?a v? không bi?t bao nhiêu l?n. ??c r?i m?i bi?t ?ây là tình tr?ng chung c?a m?i chính quy?n trên th? gi?i, không có cách gi?i quy?t d?t ?i?m, càng ngày càng nghiêm tr?ng. Ch? có 1 con ??ng duy nh?t là t? gi?i c?u l?y chính mình thôi. Còn gi?i c?u th? nào thì m?i ng??i ??c sách s? có 1 ý t?ng, hay ??ng l?c riêng. Mình tin ch?c là nh? v?y.

?i?m thú v? là cu?n sách v? kinh t? nh?ng ??c vi?t d?a trên kinh nghi?m và nh?ng bài h?c c?a cha nuôi tác gi?, m?t tri?u phú n?i ti?ng và nh?ng bài h?c t? cha ?? c?a tác gi?, m?t cán b? giáo d?c n?i ti?ng t?i Hawai, nh?ng l?i là 1 ng??i nghèo khó và th?t b?i cho ??n cu?i cu?c ??i. 2 ng??i cha, 2 th? gi?i, 2 bài h?c khác nhau cho cùng m?t v?n ??, nh?ng ??u có 1 ý ngh?a nào ?ó. T? nh?ng bài h?c này, chúng ta có th? th?y ??c s? khác bi?t trong t? duy c?a ng??i giàu và ng??i nghèo. B?n thân chính tôi sau khi ??c xong thì th?y mình ?ang có t? nghèo, r?t nghèo. Nh?ng c?ng ?ã h?c ??c r?t nhi?u ?i?u t? ng??i cha giàu và ?ang d?n thay ??i. Mình c?ng ??u t? mua b? trò ch?i cashflow, ch?i c?ng r?t thú v?, càng có l?ng cao thì càng khó thoát.

?i?m tr? ? b? này là dài và lan man quá, nhi?u bài h?c ??c tác gi? l?p ?i l?p l?i. Th? 2 là nghe gi?ng k? c?a tác gi? thì nh?ng ng??i có th?c m?c v?i tác gi? v? t? duy c?a ng??i giàu, thì tác gi? ch? tr? l?i chung chung, và m?c ??nh ng??i nghe ph?i t? duy nh? ng??i giàu r?i.

Mark Ruzomberka says

This book still holds up 10 years after it was written. In 2004 much of what was being discussed in the book was the stock market implosion in 2000, and the subsequent fall out. Like most Kiyosaki books there is a large amount of overlap with his seminal work "Rich Dad, Poor Dad", and this book touches on what was written in "Rich Dad's Prophecy" from 2002.

My favorite part is on page 116 called "Why do pilots wear parachutes?". In this section Robert gives a brief story explaining how we was taught how to eject from a plane long before he was taught how to fly a plane while at Naval Flight School. The moral of the story is have an exit strategy on every investment before you invest. Also, it shows how a 401(k) might not be the best strategy for everyone, because it hand cuffs the investor in many ways. He later goes on to insist you must keep your money moving rather than let it sit in a bank account or 401k, essentially hinting at what he calls velocity of money.

I also liked in, Part One, how he broke down many common professions and gave their view of the world, and how they would tell someone to invest. In part two he explains how a professional investor like himself would invest. Take your pick on where you get your advice but I'm sticking with a pro rather than the list of amateurs listed in the table of contents. The biggest take away's for me were: to start thinking longer term, to remember the 20-10-5 year cycles, and to take a more serious approach to tax planning.

## Francisco says

Robert Kiyosaki, conocido inversor de bienes raíces y uno de los autores incluidos en 'Aprendiendo de los mejores' (Alienta Editorial) te cuenta en este libro cuestiones muy interesantes para desarrollar tu educación financiera, algo clave porque "la educación financiera te lleva a la inteligencia financiera y la inteligencia financiera te lleva al éxito en el mundo del dinero".

## Sheldon says

Okay listen... His books are good for light reading but typically have the same themes and not a lot of depth; this book follows suit.

If it gets you into the mindset to handle your money, great, but I'd advise people to really research the areas of business and investing prior to jumping right in... find things that work for you and your temperament... not everything is for everyone.

---

## Joséphine (Word Revel) says

**Initial thoughts:** *Who Took My Money?* is an interesting follow-up to *Rich Dad, Poor Dad*. It's more detailed with regards to what investments are, the principles to look out for to make good investments and how to distinguish investing from gambling. In those regards, I found this to be good primer.

Organisation-wise, however, this book is repetitive and all over the place. If you need a lot of repetition to hammer information home, then that's alright. For me, I prefer to go back and specifically re-read relevant sections rather than to jump around from introductory topic to topic before revisiting them for a little more detail and then jumping around again. On that front, it could've been tighter.

Still, the question of *Who Took My Money?* is answered well, and makes you think about ways to increase assets with consistent returns over liabilities.

## Mayank says

This book blew me away. Although it doesn't have any specific actionable goals for you, because the author thinks what is right for one person is not right for everyone else, it is the first book which tells you to not invest for the long term in stocks/401k. In fact Robert doesn't even believe in 401k and retirement funds. He believes that everyone should be taught financial education early on to build a good base, so that people understand where their money is going and how to save. He believes that we should not hand out money to Fund Managers or any other institution without understanding how their money will be invested and how and on what principles it will grow. He has some sound principles on which he operates. He tells you to ask

people who tell you that your money will grow in stock market since the stock market has on an average given you 9% returns, are they going to guarantee that ? He believes you should always invest with insurance, similar to how we drive a car with insurance or how a bank lends you money with insurance and background checks. In stock market you invest using insurance using Puts and Calls and also talks about Hedge Funds investing. Again no actionable advice but lots of little nuggets which are not conventional wisdom. Another of his golden tenets is that who ever tells you to invest for the long term is completely wrong and since everything has cycles. For e.g. he thinks that stock market crashes every 20 years, every 10 years there is something(i forgot :-() and every 5 years there is a natural calamity. He believes we need to watch for such cycles and move money between assets(business, real estate, stocks, bonds, commodities, etc). He also talks about watching for trends in different areas like interest rates, population growth and demographics, debt and relating that to investing. I am going to finish all his books and see if i can learn something concrete.

### **Tao Lee says**

Note to self: Investros usually flee to commodities when markets are high. Businesses don't want you to know what they are doing. If you are technologically challenged, own the company! The word can't should be eliminated out of my vocabulary. You can't afford to be lazy. Don't get money tips from losers. Look for ways to make people's lives easier. Take the hard way. Don't let your baker lure you into bad debt, create good debts only! Four major asset classes:business, real estate, paper asset, and commodities. go to bankers and bankers, investor and investors - don't get answer from one, especially if they decline your request. Look for hotels to purchase. Get people to help you get into great investments. Don't waste your money, continue to reinvest. We have 4 quarters in life - business. You can benefit from taxes by concerting personal expenses into your business account a no tax event strategy. Charity give back to community to increase growth in business. Chose cash flow over capital gain. Keep learning about investing no matter how rich, old and smart you are. Everyday is a learning day. 20, 10, 5, cycle. Just a reminder of the cycles. 20 years - stock market and equities will go up. 10 years, stock will go down, commodities dominate, 5 years disaster. A growing population means higher home price = good for real estate. Never sell your properties, especially in a good area and you think it will continue to increase in value. Buy in bankruptcy, close store sales for good discounts. It is not the benevolence of the butcher, the brewer or the baker that we expect dinner, but from their regard of their self interest. Establish an expiration on initial investment. Divorces can make you lose everything! Education is very very important. Invest early. Newer properties build around old properties can devalue old properties and cause it to have low vacancy.

### **Martino says**

Some good ideas for beginners in the personal finance education like me. The book is worth the read but sometimes the advice feels repetitive. At the end of each chapter Sharon has a two pages space for developing her view most of the times it did not provide me with any additional knowledge whatsoever.
