Alan Garrett says

A great resource to answer questions about some difficult passages.

Scott Burton says

I have read a number of books by F.F. Bruce now. He is very prolific. This was one of the better commentaries he has written. One of the things I enjoyed was his paraphrase of the texts. It was very assessable. His insights into Paul and his thinking is balanced and without dogmatism. He is just a very, very reasonable thinker and writer. I am always happy to read someone who is doing more than grinding an ax.

Spencer says

An ok commentary. Positions taken with minimal explanation, some parts are stronger than others. There are better options out there.

Parker says

One of the best treatments of one of Paul's most theology rich books.
