His style of writing is very unique... He almost convinced me that he was an alien or definitely had contact with some. I really enjoyed the book it's short and extremely entertaining.

I am recommending that you read several of his books. Then let us know what you think. I will be waiting.

This short story is a paranormal science fiction... romance, in a way. It is about a man dying of lung cancer who discovers what life after death is really like. And believe me; it is nothing like anything mankind has ever dreamt up before.

It took me about ten minutes to write those three sentences above. Why? Because after reading it, I found it incredibly hard to describe the weirdness and trippy-ness of what I had just read. I'm going to just leave it at that, because if I say anymore I will give away spoilers, since the book reveals different twists and turns as it progresses. This story was short enough that I didn't have any problem finishing it, but I'm afraid that if it was any longer I might not have been able to. It was weird beyond belief! I'll give it two stars. Maybe somebody who likes really freaky and bizarre science fiction will enjoy it more than I did, though. :-)

I will agree with Daisy about this novel's unique aspect. I used that to bump my four to a five star. Be warned, this is deep science fiction, for true fans. That said, Taylor's style of writing is almost poetic and with just three stories out, and two of them short, I'm awed by the originality he brings to writing books. I found Second Life to be almost magical, then dark, the stunning as he pulled off another out-of-this-world ending. If you haven't read Taylor Kole, please do. I can't wait for his next novel.
