The Omega Strain

Steve P. Vincent

The Omega Strain Steve P. Vincent

Meet Mitch Herron: unstoppable assassin and biological nightmare.

Herron's business is death and business is good. Though he's an assassin without equal, his latest job is no walk in the park. Fanatics hell-bent on cleansing the planet ambush Herron and turn him into a walking bioweapon.

With only days before he's used to spread the most lethal contagion in human history, Herron can surrender himself to quarantine or hunt down the fanatics, knowing he might be the only person who can.

The clock is ticking...

Will Decker says

I thought the concept was pretty good, but the delivery was iffy. The action scenes, and there are a lot of them, are well choreographed, but not so much the character development. If you're looking for a story with lots of killing and chasing and not wanting to sink too deep into the logic and un-reality of it, this one fits the bill.

Beth says

I was super lucky to jump on my newsletter from Steve ...that was giveaway of an Audible book of your choice ... I was like heck yeah!! count me in. please. He did contact me and was like which book are you interested in ... I was like ...hey ... which one would you suggest for me to start with ...he said this one considering i have yet to read any of his books ever!! I was so in love with this Audible listen. Love the cover. Mitch Herron Series, 3 books in the series so far. far. Maybe you are a fan of "Tom Jordon" he is a great narrator, I really appreciate it when an author picks a great narrator, well done, awesome! I mean it this was one of those listen/reads where you are so curious where it will head ... edge of your sit ... kind of patiently waiting for it to get there ...but not really 'cause you wanna know what will happen??! I am a go 2 mystery lover ... I appreciate the ideas and thoughts it must take to write one ...and I love it when they get ya ... like u can not figure it out still u get to the end. love that! Fast action thriller for sure! page turner, action, twists, turns, if that might strike your fancy? I say stop what you are doing and either do Audible or read this book!! such a great read. I do look forward to more from Steve and so happy that I pick a winner ... love that! score. (;

The Omega Strain. Steve P. Vincent

Mitch Herron is an assassin. Not your typical assassin who works for money, but who eliminates people who deserve to die. A deadly virus has been created , by the head of the CDC. He's an environmentalist who feels man has polluted and is killing our environment. Therefore, human life needs to die. His scientifically created virus has no cure or way of stopping the infection. Mitch Herron's mission is to locate all the self inflicted carriers and eliminate the threat. It may cost him his life, they have forcibly infected him. A top notch thriller! Enjoyed immensely!

Meet Mitch Herron: unstoppable assassin and biological nightmare.

Herron's business is death and business is good. Though he's an assassin without equal, his latest job is no walk in the park. Fanatics hell-bent on cleansing the planet ambush Herron and turn him into a walking bioweapon.

With only days before he's used to spread the most lethal contagion in human history, Herron can surrender himself to quarantine or hunt down the fanatics, knowing he might be the only person who can.

The clock is ticking...

Brad says

I have previously read 4 books of Steve P Vincent (The Foundation series) and I like his style and prose. However, this book did not sit as well with me.

Without giving anything away, the ending was good, but made little sense. I re-read the page several times, and in the end I just gave up, as I was clearly not getting it.

Luis Matos says

I received this book as part of the Murder and Mayhem Box Set and this story is exactly what I was expecting when I purchased it. There's a great deal of action and suspense, although the ending was a little bit rushed. I think the whole ticking clock bit could have been milked for more suspense, but that's a minor nit-pick. Really good read.

paul natale says

Wow

I really enjoy books like this because they keep you going from beginning to end. I also like the story because it is self contained. No cliff hanger to have to buy.

The characters were believable without all the normal superhero stuff. Though you were pretty sure the good guys would win, it was never a foreclosed conclusion.

Randi Robinson says

I love audiobooks and was thrilled to receive this one from the author.

The Omega Strain is a virus that is going to wipe out mankind if Mitch Herron does not stop it. At first he fails in his mission and is captured but that is just the beginning. He escapes and teams up with another prisoner who is a scientist from the CDC. They race against time to kill all the carriers and stop the spread of disease.

This audiobook was very well done with no glitches. The narrator was excellent. I like to hear the characters speak to get a better idea of their personalities. Tom Jordan did this well.

This book kept me on the edge of my seat and I can't wait to read the other books in this series. Thanks

Steve!

Sam says

This is an excellent fast paced thriller that will have you on the edge of your seat from the moment you start reading until you finish. The story follows Mitch Herron as he tries to prevent 'the bad guys' releasing a virus across the globe on Earth Day to punish mankind for the environmental damage wrought throughout the world. But this is not just any old virus, this is a custom made virus with no vaccine and no cure. And so begins a race across America to capture and kill the carries before the virus is activated and wipes out the human race.

Norma says

(Format : Audiobook)

" Out gunned, out of position and out of time. "

The reader is thrown straight into the action as The Omega Strain begins - and the race is on until the very ending. Mitch Herron is an assassin, but more than that. He's a loner who receives top secret assignments and prides himself on always completing them. But this time he has failed. Intelligence has determined that in just three days a terrorist organization will be releasing a virus that seriously threatens the whole population. His mission: to locate and destroy the fanatical group before they are able to complete their task. He was so close but then he was caught and the remaining terrorists departed, leaving him alive but with no idea what to do or where to go next, and time has nearly run out. Plus he has injuries that need some attention. Reluctantly, he finds himself with a travelling companion, tolerated only because she just might be able to help..

Action filled from start to finish, the book is written in clear, short sentences which add to the urgency of the plot. Some of the incidents along the way are brutal but clean - the violence, though frequent and viscious, never feels gratuitous. Both action and writing is stark, close to the bone: a perfect pairing of the story line and written word. The narration continues that same presentation. Tom Jordan reads with a gruff edge to his voice, perfectly in character for Herron, and his voicing of the other protagonists is similarly individual and appropriate. His intonation is good, his timing spot on and the whole is flawlessly read with understanding but no histrionics. A nice performance.

A very absorbing and enjoyable thriller

Cherry says

An edge-of-the-seat read! What an incredible story!

Mitch Herron doesn't leave things to chance but prepares for his missions very carefully until it all goes haywire and he's forced to act quickly to prevent evil from happening. Do you agree with his methods? What would you do if you were in his position? I couldn't put it down until I finished it. Kudos to the author for a fantastic story. I can't wait to read the next book in the series.

Cynthia says

This is one book that starts out as it ends with such thrilling excitement, danger and mystery. The author has no trouble holding you on the edge again and again with one thrilling ride that makes your heart beat faster not knowing when the end will come and who will be left alive. What happens when a mad man gets his hands on and unleashes a bio weapon that could end life as we know it on this planet killing thousands if not all humans. What a nightmare that would be as the lead character finds out this is no walk in the park trying to find the people responsible for this injustices. What follows is truly one exciting listen that holds you spellbound until the end with this life and death story that has compassion, danger, thrills, excitement and mystery.

The narrator as always does a wonderful job from his character voices to the emotion. His character voices are wonderful you always know who is talking and what they are feeling. His male to female voice are great and easy to follow with smooth and even when changing to one character to the next. He gives the right tones for the scenes you can hear the fear, excitement, danger in the characters voices. His performance is just outstanding. There is no background noises, no volume changes, no repeating of words just a very clean and clear audio that pulls you in. If any breaks were taken I could not tell it was just a very clean and clear audio that I got lost in. The narrator normal voice is just a wonderful as his character voice keeping you on the edge with danger and true emotion that makes your heart beat a little faster as the scenes unfold keeping you on the edge. Mr. Jordan does a great job bring the audio alive making you feel each emotion, danger and excitement that the author gives. It was a thrilling ride that I totally enjoyed from a very talented narrator.

Herron has been infected with the bio weapon, he must decide if he goes after the would be killers or go into quarantine in hopes of them finding the antidote to save his life. Of course our hero won't stand aside and watch others die he will go on the hunt for the mad man who wants to kill so many and hope when the end comes he is still alive. The author put a lot of thought into this giving detailed scenes that will keep you on the edge until the end with first one road block and then another. I have no trouble picturing this as a wonderful movie that people would love to watch. It has a little bit of everything in it but one thing is for sure you won't be able to put it down. The characters feel real almost like family as you want to reach in and pull them out time and time again from the danger that is before them. Herron does have a sidekick that helps him along the way. He more or less inherited her when she is found to be where he is being held and left to die just like him. She is a little bit of a mystery but adds so much to this story. I truly loved the characters, the plot, the twists and turns and how it all played out giving me hours of enjoyment. I found things to do, so I could listen longer before I knew it I came to the end not wanting it to end. I can hardly wait to see what book two will be like. If you are looking for a wonderful listen that keeps your attention and makes you enter act with the characters you have found it. I enjoyed this so much that I also bought another of this author audio. I just love his writing style and how he pulled me in with wonderful entertainment.

Joselyn Moreno Burke says

This one I won it on a raffle to review it and omg, it didn't let me down, I want to know what else will happen with Mitch.

Mitch is not your usual antihero either, a hitman gone superhero was quite interesting for me or maybe it was just Mitch's personality he was pretty cool and pretty I don't know sarcastic maybe, he was a very complex guy.

The addition of the doctor that will be like a side partner to him was something I actually liked, made him more human, and I like that Mitch wasn't just killing for the money but for doing some actual cleansing in this world.

I think I will stay with Mitch a long time or at least until I finish all the books he's on, they're super fun and amazing.

Ddkmc95 says

Mitch Herron is an assassin on a very dangerous assignment, where he was captured, albeit temporarily. His captors injected him with an unknown substance and, he later discovers that it's an unstoppable strain of smallpox. As Herron races against time to eliminate the other carriers, his unwitting partner is a scientist. No spoilers...read this story if you love thrillers...with a little gore. Looking forward to the next book in the series. I voluntarily accepted a complimentary copy of this book and this is my honest review.
