### **Kathy Wiederkehr says**

This was my first Jennifer Greene book. I don't usually read romance novels, but I was looking for light, fun reading. I was not disappointed -- it delivered exactly what I expected. The story is about three generations of Sinclair women who each made poor choices in their love lives. Together, the three women worked through their true feelings and each found pathways to find what they really wanted. The ending was predictable, but that doesn't matter. It was a fun read anyway.

### **Catherine says**

More than a romance novel, this was a story of three generations of women who struggle to find their self. There was humor, sadness, love and victory. An easy nice curl up read.

### **Car says**

The Woman Most Likely To. . . was not what I expected. I definitely liked it, though. The relationship between the Sinclair women was one I wish I had with my family--in a way. I also thought it was curious that Jon was so involved in his daughter, Becca's, life and how close they were even though he lived in a different place and he wasn't married to Becca's mother.

### **Jenn says**

Ho hum romance. Nothing new in here.

### **Sue says**

Light beach read; one of those books that makes you feel pretty and romantic at first...then lonely and annoyed with oneself.

### **Holly says**

predictable

## **Deb Julianne says**

Very nice story. Loved Susan, Loved Jon, LOVED they couldn't keep their hands off each other. Loved mom and dad taking care of Becca's boyfriend, YES! LOVED the fight scene with Lydia and Becca...I roared. Lydia is my new hero.

## **Katie says**

This was a fun read. At times a little aggravating because I just wanted to shake the characters into some sense! They eventually all did what they needed to do. It was realistic (not in a gory or "ultra-realistic" sense) but in a way that you could see this happening to your cousin or aunt.

## **Carmen says**

The writing was pretty mediocre, but I enjoyed the overwhelming pro-choice theme throughout. It was the saving grace of the book for me.

## **Vilo says**

This book was lacking the telltale little flower on the spine that warns me it's a romance. I did enjoy the characters and the situation--a fun read, if you can stop your "inner smart-aleck" that says, "this romantic obstacle has dragged on quite long enough!" (22 years seems like something of a record, but it's not my usual genre.)

## **Julianne says**

This one is great fun! Again, why have I not read more books by this author? I need to organize my life a little better so I spend more time reading things I really like and I really want to read, and not so much reading something someone else thinks I should read. Am I the only one? Or is that true of all of us?

## **Gayle Kee says**

It was a silly, funny book. It read very fast. I really liked it

**Kandyce Barber says**

"Scathing review" I really need to learn how to put a book down when it is a BIG waste of my time.

---

**Jewett says**

Run of the mill romance, but fun when you want light reading.
