Earth in 2075 is a place of chaos and struggle. An alien species has poisoned Earth's water in an unsuccessful attempt to take the planet. Bianca suspects she may know how to reverse the poisoning and steals a special crystal from Aloysius Finch, controller of the pure-water. Angelo, a Guardian of the Order, tracks down and arrests Bianca. Bianca is forbidden to Angelo, but she tempts him like no other woman. Angelo sees beyond her practiced facade to the vulnerable woman within. In turn, she is the only person who has ever unearthed his darkest secret. Bianca has grown jaded and weary in her fight for survival. Every brush of Angelo's hand on her body breaks down her barriers, he alone seems to have enough heat to melt the coldness within her. He makes her want a man's touch for the first time in many years and awakens every carnal and dark erotic yearning within her. Together, in a world thirsting for drinkable water, they make fire and endeavor to transform their dark reality.

~Sara~ says

This was a rare treat for me - an erotic novel that actually had a plot that existed for a greater purpose than just getting the main characters into bed (or I guess more accurately into each other :D). For a girl that likes a healthy dose of romance in her sci-fi, fantasy, etc, this book was fantastic and I loved every minute of it! Unfortunately the storyline had holes you could drive a hovercraft through and the character development was a little lacking, especially concerning the alien species, so it gets a 3 instead of 4 but still an enjoyable and fun read.

Not really what I thought it would be but it was an ok read.
