Four kids on a quest to find the legendary Mines of King Solomon... and their parents.

Bick, Beck, Storm and Tommy are navigating their way down the Nile, from hot and dusty Cairo to deep dark jungles, past some seriously *bad* guys along the way.

They'll need all their survival instincts just to make it out alive...

Treasure Hunters is about 4 siblings that look for treasure. Their parents were kidnapped or captured and they are trying their best to find them. They need to find them and rescue them. Someone got into their truck and stole some important things.

They got some money so they could go to Egypt. Some people stole some of it. They have found their mom's aunt, but then she ran away. There are bad guys after them so they need to go quick.

Bick and Beck are the main characters in the book. They are twins and when they fight they call it a Twin Tirade. Bick's real name is Bickford. Beck's real name is Rebecca.

Bick and Beck have one brother and one sister. Their names are Tommy and Storm. They never fight with each other. They are the older siblings.

They lived on the sea for a long time. Then somehow their ship was sold to somebody. Everything on it was sold, too. They got money and went to live in Egypt.

Their parents were kidnapped. They have tried forever to find them. They have gotten a few videos from their mom. They haven't seen them for a long time.

The resolution is that they find their mom. They didn't rescue her though. They couldn't find their dad. They may never see their parents ever again.

The book was very adventurous. They were always running and fighting. They risked their lives to find their parents. They never found their dad, but they found their mom.

I would recommend this to lots of people. People who like adventure and taking risks. Some people don't like books like this, but some people do. I like books like this and I love to read.

The second book to the treasure hunter series, is about the kidds losing their fortune and go to real school!!!!!!But luckily no school can cage these kids, they get money that they can salvage and try finding there parents. The only problem is the troubles they face on their way. Including things you don't think would hurt you, or can they? Read the book to find out more.

This is illustrated. I read a review where the reviewer called a novel/graphic novel halfbreed. I completely agree. There are a lot of illustrations, and they have dialog bubbles.

This story is "told" to us by Bick Kidd and also conveyed through illustrations "drawn" by his twin sister Beck. They are on a quest to find their lost parents. Their journey is full of hiccups and bumps.

Kids love this book (I did too, 32). The illustrations are amazing. The story is constantly twisting and very imaginative, but also has little educational facts thrown in. I like sneaky authors who trick kids into learning!

I definitely recommend this to children who like adventure, pirate, James Patterson books, etc. This would

make a great addition to any personal school, private, or public library. I purchased a copy for both of my children for Xmas. I do natural regret the purchase at all.

This book truly is an amazing read it's a not putter' down book; it's funny, really a mysterious type, and it's really educative. It's about the Kidd siblings who go on an adventure to recover a special artifact to free their mother who has been captured but not all people want to necessarily agree with that; the Kidd's have to be careful because with spies, mysterious clues their father left them and...a boarding school.

Danger Down the Nile is a fiction book written by James Patterson. Danger Down the Nile is 480 pages. The book is based around the four Kidd children Beck, Rebecca, Tommy, and Bethany. The story took place in Africa. The main characters are Uncle Timothy, Rebecca, Tommy, Beck, Bethany, and Nathan Collier. The plot of the story is based around the kids trying to find the hidden treasure and to find their parents. The Kidd's mom was taken away and the only way to get her back is to find the ancient Ming dynasty vase which was worth millions.

I would recommend this book who likes a great story and very descriptive. I would only suggest reading this book after you read the first book of the series. My favorite character is Tommy because he is the leader and oldest of the children and leads them to where they need to go. My favorite part of the book was when the kids tricked the enemies in the jungle to thinking the vase was hidden in a mine because it showed the

children's wit. My least favorite part of the book was the ending because it left it on a cliffhanger while they were planning their trip to find their dad. If I could change any part of the story I would change the ending from a cliffhanger into a whole other part of the book. These were just some of the reasons to read this book.

The book *Treasure Hunters: Danger Down The Nile* by James Patterson and Chris Grabenstein is a great book. This story continues from the first part of *Treasure Hunters* and is about how the four kids go on an adventure to the legendary mines of King Solomon. They go through many obstacles just like how they did in the first book. They are still looking for their parents and terrorists are after them, so they have a lot on their chest.

This is the second book in the *Treasure Hunters* series by James Patterson and Chris Grabenstein.

I listened to the audiobook and it was entertaining, if a bit annoying at times. I appreciated Bryan Kennedy's ability to change his voice for the numerous characters, but I did not really like some of the stereotypical dialogue. Overall, the plot was very, very dramatic and the mystery was engaging.

I never looked at the PDF files with the audio CD set, but I did get a copy of this book from the 2016 National Book Festival (at the Scholastic booth). Seeing the cartoonish and funny illustrations certainly adds some charm to the book and I'm sure it will appeal to older elementary school-age and middle school-age children. I'm sure we'll read the next book in the series, but it won't be a top priority.

interesting quotes (page numbers taken from hardcover edition with ISBN13 9780316370868):

"I guess sometimes you just have to trust your big brother and sister. Not too often. Just every now and then." (p. 210)

"'Righty-oh, then,' he said. 'After young Master Bickford shuffles off this mortal coil, we press on, what-what?'" (p. 281)

The Kidd siblings are ready to follow their Dad's next big treasure hunt that will help them free their Mom...but "Uncle" Timothy rocks the boat and sends them to boarding school. All is not hopeless though because Dad evidently prepared the Kidds for just such a situation and they find the treasure-hunting trail anything but cold. Soon they are on their way to Africa in search of King Solomon's Mines. Or are they? If the African jungle doesn't manage to do them in, the pirates and conniving treasure hunters on their trail might, or horror of horrors, Uncle Timothy could send them back to boarding school! Can the Kidd kids manage to find the right item to satisfy Mom's captors in time?

I picked this one up thinking I'd just start it last night and before I knew it, I was done. Once again, the high action, touches of humor, and fun puzzles keep the story moving at a good pace (the large font and loads of pictures help too). Don't expect too much to get resolved in this book, after all, the Kidds have more adventures in store before their story can be over, but it's a fun ride. I enjoyed it (well, I had one issue with continuity about the custody court case in this book after Uncle Timothy sports guardianship papers in the last book, but that was my only qualm). I like how the authors have farmed out clues to each of the Kidds from their parents so that they can only figure things out completely as a team. I'm sure the adventure and spy enthusiasts will eat up this series. I was honestly a little skeptical about this series because, let's face it, James Patterson puts out more books than seems humanly possible; and generally when production seems a little too abundant quality seems to suffer. But earlier this year I read *House of Robots* by the duo and really enjoyed it, and of course *Escape from Mr. Lemoncello's Library* is pure genius, so I decided to give this series a shot. Yes, it does seem to have some basic patterns laid out for each book so far, but for the most part it's relatively hard to predict how the story will go in the details so it doesn't feel like it was just written to make money. There was obviously some thought and creativity put into each book. They're no literary masterpieces, but they don't feel like a computer formula spit them out either. I don't feel like they are a waste of money or reading time. I can definitely see these hooking reluctant readers, which make them books we need in the library, and they'd make great read alouds too. So if you too are wary of the seemingly over-abundant Patterson stamp, put aside your doubts and go ahead and let a middle grader you love give it a shot (or you yourself).

Notes on content: No language issues. No sexual content. Once again, there are violent situations but they are very much kiddy cartoonish in that everyone seems to end up ok with just some bandaids even though AK47s are involved. One person may have died in a crash, but they're a spy and they very well may have gotten away.

it was amazing.

This was just a fun read. I saw this book in Walmart last weekend and as per usual bought it on my kindle. I had not read the first book in this series but didn't really need to as this book pretty much told you what was

going on any way. I really enjoy James Patterson's novels for younger kids better than his books for adults probably because he turns out his adult novels really fast any more and they have lost a lot since he has been doing that. But I really enjoyed this and if your looking for a flat out fun read that dosen't take a lot of thought you would enjoy this book.

Marlana says

The first book in James Patterson's Treasure Hunters series was entertaining. Not the best thing ever written, but a quick, light hearted read. Something about this sequel was just tedious. Even though it was middle grade and not that long it took me two days to finish mostly because I just didn't have a whole lot of interest in it.

The Kidds kids adventures are becoming more and more outlandish and there's just so much deus ex machina it's embarrassing.

Still, the characters are likeable if not a bit flat and one dimensional and the illustrations are good. It's tolerable, but only a bit above 2 stars. More like 2.5 stars if I could give a half star.

I love this book I even more then the last one more twin trades and action mystery bad guys (like guy Branet) and more of tommy have ping crushes and losing the memory of their names no such. But why is storm all suddenly are acting like bick and becks mom and dad especially tommy acting like dad (who knew he was so good at acting.). Storm is definitely acting weird there new van is so cool sadly though the lost was sold at a boat sale. When they say they hate school you think there kidding around we'll they give it a try after 1 1/2 of a day the all ready snuck out. Uncle T is so acting weird and I am talking like sending a guy to killer there any weird and he did do that. The author is James Patterson pages 451 br2

Angela says

Like the first in the series, this book would be great for parents and kids to read together. No bad language, no gratuitous violence, just a lot of action and some sibling rivalry. All good clean fun..... well except a few incidents of smart mouthing to adults and breaking out of prep school.

I also think that the book could be a jumping point for some home school studies.

I would recommend it for kids 2nd grade and up for family story time.
