**Experience the epic start of 2018's must-read YA fantasy series in this 4 chapter sampler featuring two fiercely independent young women, centuries apart, who hold the power to save their world...or doom it.**

When assassins ambush her best friend, Rielle Dardenne risks everything to save him, exposing herself as one of a pair of prophesied queens: a queen of light, and a queen of blood. To prove she is the Sun Queen, Rielle must endure seven elemental magic trials. If she fails, she will be executed...unless the trials kill her first.

One thousand years later, the legend of Queen Rielle is a fairy tale to Eliana Ferracora. A bounty hunter for the Undying Empire, Eliana believes herself untouchable—until her mother vanishes. To find her, Eliana joins a rebel captain and discovers that the evil at the empire's heart is more terrible than she ever imagined.

As Rielle and Eliana fight in a cosmic war that spans millennia, their stories intersect, and the shocking connections between them ultimately determine the fate of their world—and of each other.

Liking the looks of this book. Looking forward to seeing Rielle and Eliana's full adventure. Hope Eliana joins the Rebels or gets a happy ending.

What do you mean this isn't a stand alone? Whaaaaat

The Rielle's chapters looked straight from a original story from Wattpad, but the the other girl's ones (I already forgot her name) were more Game of Thrones like. More like 1x09 like. Holy shit, I don't know if I should read the rest of the book.

Thank you Bookish First for providing me the first few chapters to read of Furyborn. It was a tease because it is now on my TBR list for my next book haul! I am full of questions..will Rielle beat the angelic forces trying to take over her soul? Is Eliana her decendant wearing the Queen Rielle's necklace and will the two lives colide? Queens fitting for the Iron Throne of Westeros are created by Legrand..I cant wait to read more of her work!..and Simon ..what happens to our time traveler? Does he fall in love with the baby he is sworn to protect? Fans of Shadowhunters and Kell in DarkerShadesOfMagic will adore the time bending and angelic/demon characteristics. I would love a book with Simon as the main character!

So many questions placed Furyborn at the top of my to read list .

Man this is great . I read it in two sittings, it jumps around some but that keeps the flow on maximum!

Only getting to read the first few chapters, it's really difficult to say how the remainder of this book will go.

While the premise is loud and in your face, a book like this requires perfect execution in order to get all of the details (not to mention 1000-year gapped storylines) in a row.

The book literally starts out with a bang. A lot is happening and thrown at the reader, which is a little overwhelming.

Reading some reviews on Furyborn, I know that it is NOT a Young Adult book and geared towards New Adult readers. That in and of itself also makes me leery to continue with it as New Adult books tend to be too focused on sexuality and explicit material. I'm not sure if I will end up picking up this book to finish or not.

Guys.... you neeeeed to read this book! Like really, go read it! I once again went in blindly to reading this book, and I knew that it was going to be one of my favorite books of the year about halfway through! This is a must read! In fact, now that I finished I'm planning on reading everything else that Claire Legrand has written because I loved her writing style! I will say heads up for younger readers this book definitely has some mature moments.

This book has multiple point of views; we follow both Rielle and Elaina who exist in different time periods but have a connection of sorts. Both of these point of views were absolutely amazing to follow! This book went by so fast because I was constantly wanting to continue the next povs story. I usually can tell what twists and turns are going to happen in a story, but this book really pleasantly surprised me! I loved the characters, and I cannot wait to get my hands on the next book! Seriously recommend this for fantasy lovers! One of the best starting books to a series!

So I got caught up enough to buy the Kindle version, against my better wishes. I've never paid \$10 for an ebook before. This saga better be worth it or I'll gripe throughout my reviews! LOL
