The Creator Revealed: A Physicist Examines the Big Bang and the Bible Michael G. Strauss

Do current scientific discoveries support or contradict the story of creation in the Bible? Does science give evidence for or against Gods existence? Does it matter what you think about origins, science, and the Bible? Does your understanding of science and creation affect your daily living or your relationship with God?

In *The Creator Revealed*, author and physicist Dr. Michael G. Strauss explores these central questions about science and faith in simple and entertaining language, showing how modern scientific discoveries about the origin and design of the universe proclaim the character of God and agree with the biblical story of creation. For the Christian confronted with possible inconsistencies between faith and science, and for the skeptic who believes modern science has shown that belief in God is unnecessary, *The Creator Revealed* can demonstrate the glory, power, and wonder of God by looking at science, the Bible, and the effect that truth has on peoples lives.

Reconciling the truth of scripture with the truth of science can change your perspective and your life. The message of *The Creator Revealed* will expand your idea of who God is, increase your faith in him, and provide a way to share this revelation of God in creation with others.

Terry L. Shelton says

The Creator Revealed was a great read.

I liked the balanced view of science and theology that Dr. Strauss used to approach a very challenging subject.

I could recommend The Creator Revealed to anyone interested in a balanced study of science and theology concerning creation.

This is the most succinct yet non-technical book I have read about the implications of the big bang on Christianity. I love that Strauss presents the basic case for the big bang from both nature and the Bible side-by-side. I loved his focus on Romans 1:20 and his clarifying that the big bang is inherently a theistic theory (it is not an atheistic theory, as many Christians incorrectly believe), and that is what actually caused the majority of the scientific community to reject the clear evidence for so long. I particularly appreciate his dedication to biblical inerrancy as he presents a careful and exegetical case from Scripture. He addresses the most common challenges and questions from Christians to help remove any fear that they are compromising Scripture or God's character at any point by following the evidence where it leads.

Strauss' concise descriptions, use of analogies, stories from his life, and the sprinkling of jokes throughout makes a rather dry subject very enjoyable, understandable, and exciting. The length of each chapter and the book as a whole are perfect for those who are curious but do not have the time to devote to the more in-depth and technical works available (although it may spark an interest in pursuing a deeper investigation). With all of these characteristics and the fact that it covers an extremely important evangelistic tool, "The Creator Revealed" is a must-have book for every Christian who is passionate about the Great Commission. This book needs to be in every church library and on the bookshelf of every Christian parent and educator and pastor. Most every Christian knows someone who has dismissed Christ from their lives because they believe that the creation, via the big bang, eliminates the need for the Creator. God has placed you in their life to show them how they have unnecessarily rejected their Savior. Get this book, and prepare yourself to "give [them] a reason for the hope that you have" (1 Peter 3:15).
